Cornelius O'Boyle, *The art of medicine: medical teaching at the University of Paris, 1250–1400*, Education and Society in the Middle Ages and the Renaissance, Leiden, Brill, 1998, pp. xv, 330, €104.00, \$121.00 (hardback 90-04-11124-7).

Any good general history of medieval medicine will tell the reader briefly about a collection of short medical texts later known as the *Articella*, saying that it provided an introduction to medicine and established the authority of Hippocratic and Galenic medicine, and that it became the core of medical teaching in medieval universities. Cornelius O'Boyle explores what it meant at the university of Paris up to 1400, first describing the origins and development of the medical faculty and the origins and careers of medical students, before analysing the origins and various forms of the collection. The collection had three main stages and names. (1) The *Art of medicine* (*Ars medicinae*), started out with five texts, the *Isagoge* (*Introduction*) of Johannitius, the Hippocratic *Aphorisms* and *Prognostics*, and two texts of Byzantine origin on urines and the pulse. (2) The much larger *Commented art* (*Ars commentata*) also included Galen's commentaries on three Hippocratic treatises and Haly Ridwan's on Galen's *Tegni*, while (3) the *Little art* (*Articella*) contained only these last four commented texts. O'Boyle's database is about 180 manuscripts of the *Art*, and these enable him to chart in detail these three manifestations and their many

and various subordinate forms. The origins of the *Art* and its earliest form are linked to translations at Monte Cassino and Salerno in the eleventh century, twelfth-century teaching at Salerno, and (possibly) the development of scholastic techniques in the schools of northern France, while later forms are linked to the later development of university teaching and also to regionalism, with the *Commented art* triumphing in Paris and the *Articella* in Italy. O'Boyle concludes with chapters describing how the *Art* was acquired, taught and learnt.

O'Boyle is always firm in his view and clear in exposition, witness, for example, his careful summary of conflicting modern theories about the origins of the *Art*. His concern for detail and the concrete is already seen early in the book, in the chapter on Parisian medical men. While necessarily relying on Ernest Wickersheimer's biographical dictionary of medieval French medical practitioners and Danielle Jacquart's supplement and prosopographical study of them, he reworks the material to bring named individuals closer to the reader. The concern is even more striking in the middle and later chapters. These parade before the reader's eyes the *Commented art* as a folio book, physically much larger than the *Art of medicine*; they show where a copy could or could not be borrowed; they reveal how much a copy cost and how long it took to copy it out. In two splendid concluding chapters O'Boyle looks at the layout of texts and various sorts of emendations, marginalia, diagrams and notes, and uses these to bring back to life the teaching and learning of the text in those now remote classrooms. Most readers will be impressed and some may be moved by O'Boyle's intellectual passion: to demonstrate as tangibly as possible what his manuscripts show.

I have only two caveats, both minor and neither of them serious criticisms of the author. One is that more active copy-editing was needed, and the other that the reader
