The Art Of Natural History Animal Illustrators And Their Work:

The Art of Natural History S. Peter Dance, 1990 **The Art of Natural History** S. Peter Dance, 1990 **Milton and the Natural World** Karen L. Edwards, 2005-07-07 Milton and the Natural World overturns prevailing critical assumptions by offering a fresh view of Paradise Lost in which the representation of Eden's plants and animals is shown to be fully cognizant of the century's new scientific natural history. The fabulous lore of the old science is wittily debunked and the poem embraces new imaginative and symbolic possibilities for depicting the natural world suggested by the speculations of Milton's scientific contemporaries including Robert Boyle, Thomas Browne, and John Evelyn. Karen Edwards argues that Milton has represented the natural world in Paradise Lost with its flowers and trees, insects and beasts as a text alive with meaning and worthy of close reading.

Natural History Investigations in South Carolina Albert E. Sanders, William Dewey Anderson, 1999 The story of South Carolina's natural history investigations especially in zoology and botany. It describes the state's diverse flora and fauna, the impact of social, political, and economic events on natural history, and the role Charleston played in the state's scientific heritage.

British Naturalists in Qing China Fa-ti FAN, Fa-ti Fan, 2009-06-30 In the eighteenth and nineteenth centuries, Western scientific interest in China focused primarily on natural history. Prominent scholars in Europe as well as Westerners in China, including missionaries, merchants, consular officers, and visiting plant hunters, eagerly investigated the flora and fauna of China. Yet despite the importance and extent of this scientific activity, it has been entirely neglected by historians of science. This book is the first comprehensive study on this topic. In a series of vivid chapters, Fa-ti Fan examines the research of British naturalists in China in relation to the history of natural history, of empire, and of Sino-Western relations. The author gives a panoramic view of how the British naturalists and the Chinese explored, studied, and represented China's natural world in the social and cultural environment of Qing China. Using the example of British naturalists in China, the author argues for reinterpreting the history of natural history by including neglected historical actors, intellectual traditions, and cultural practices. His approach moves beyond viewing the history of science and empire within European history and considers the exchange of ideas, aesthetic tastes, material culture, and plants and animals in local and global contexts. This compelling book provides an innovative framework for understanding the formation of scientific practice and knowledge in cultural encounters.

Table of Contents Acknowledgments Introduction I The Port 1 Natural History in a Chinese Enterprise 2 Art, Commerce, and Natural History II The Land 3 Science and Informal Empire 4 Sinology and Natural History 5 Travel and Fieldwork in the Interior Epilogue Appendix Selected Biographical Notes Abbreviations Notes Index Fa-ti Fan's study of the encounter between the British culture of the naturalist and the Chinese culture of the Qing is both a delight and a revelation. The topic has scarcely been addressed by historians of science, and this work fills important gaps in our knowledge of British scientific practice in a noncolonial context and of Chinese reactions to Western science in the eighteenth and nineteenth centuries. In addition to the culture of Victorian naturalists and Sinology, Fan shows an admirable grasp of visual

representation in science Chinese taxonomic schemes Chinese export art British imperial scholarship and journeys of exploration His treatment of the China trade and descriptions of Chinese markets and nurseries are especially welcome I learned a great deal and I strongly recommend this book Philip Rehbock author of *Philosophical Naturalists Themes in Early Nineteenth Century British Biology* By focusing on the experiences of British naturalists in China during a time when it was gradually being opened up to foreign influences Fan makes at least two important contributions to history of science He gives us an authoritative study of British naturalists in China as far as I know the only one of its kind and he forces us to rethink some of our categories for doing history of science including how we conceive of the relationship between science and imperialism and between Western naturalist and native Fan's scholarship is meticulous with careful attention to detail and his prose is clear controlled and succinct Bernard Lightman editor of *Victorian Science in Context*

Who Owns the Wildlife? James A. Tober, 1981-11-25 Tober does a commendable job of tracing changes in policy and enumerating the causative factors which brought about these changes He considers the process by which property in wildlife resources has become increasingly well defined with scarcity The book is good reading to gain a better understanding of the logic behind our present fish and game laws and regulations Environmental Professional [Francis Lee Jaques](#) Don T. The Animal Estate Harriet Ritvo, 1989-01-01 Harriet Ritvo gives us a vivid picture of how animals figured in English thinking during the nineteenth century and by extension how they served as metaphors for human psychological needs and sociopolitical aspirations

Victorian Animal Dreams Deborah Denenholz Morse, Martin A. Danahay, 2017-05-15 The Victorian period witnessed the beginning of a debate on the status of animals that continues today This volume explicitly acknowledges the way twenty first century deliberations about animal rights and the fact of past and prospective animal extinction haunt the discussion of the Victorians obsession with animals Combining close attention to historical detail with a sophisticated analytical framework the contributors examine the various forms of human dominion over animals including imaginative possession of animals in the realms of fiction performance and the visual arts as well as physical control as manifest in hunting killing vivisection and zookeeping The diverse range of topics analyzed from a

contemporary perspective makes the volume a significant contribution to Victorian studies The conclusion by Harriet Ritvo the pre eminent authority in the field of Victorian animal studies provides valuable insight into the burgeoning field of animal studies and points toward future studies of animals in the Victorian period A Bibliographic History of the Book Joseph Rosenblum,1995 skillfully compiled should be useful to anyone interested in placing his or her studies in the context of printed and bound literature ENGLISH LITERATURE IN TRANSITION 1880 1920 *Plant, Animal & Anatomical Illustration in Art & Science* Gavin D. companions Reassembling the Strange Thomas Anderson, 2018-10-15 This book examines how Westerners understood and processed Madagascar and its environment during the nineteenth century Madagascar's unique ecosystem crafted its reputation as a strange place full of unusual species Westerners however often minimized Madagascar's peculiar features to stress the commonality of its fauna and flora with the world The attempt to understand the island through science led to a domestication of its environment that created the image of a tame and known world capable of being controlled and used by Western powers At the heart of the exploration of Madagascar and its transformation in Western eyes from a strange world to a cash crop colony were missionaries and naturalists who relied upon global experiences to master the island by normalizing the peculiar qualities of Madagascar's environment This book reveals how the environment played a dominant role in understanding the island and its people and how current environmental debates have evolved from earlier policies and discussions about the environment Political Animals Jesse Donahue, Erik Trump, 2007-01-01 Political Animals offers a unique study and perspective on the relationship between politics and the art found in American zoos and aquariums Jesse Donahue and Erik Trump examine the ways that zoos and aquariums have successfully served as sculptural gardens for the masses and have incorporated art and architecture that convey political messages about both the patrons and the animals This book demonstrates how art has been used for a range of economic and political purposes including providing jobs a medium to reach out to minority interest groups a fundraising tool and a surrogate for the animals themselves Donahue and Trump skillfully analyze and compare zoos to other areas of public art to highlight the calculated strategies on the part of the zoos that have incorporated a range of artistic styles for different audiences Incorporating photographs of zoo and aquarium art from around the country Political Animals is an exciting and captivating text for the mind and eye *Drawn from Life* Victoria Dickenson, 1998-01-01 An illustrated archeology of the imagination that reveals how artists and writers from the late 16th to the early 19th century most of whom had never seen North America portrayed the natural history and landscape of North America to European readers How to Show Pictures to Children Estelle May Hurl, 1914 **Darwin's Pictures** Julia Voss, 2010-06-15 Not only does Voss weave about these images a story on the development and presentation of Darwin's theory she also addresses the history of Victorian illustration the role of images in science the technologies of production and the relationship between specimen words and images Jacket
