The Asian Challenge:

The East Asian Challenge for Human Rights Joanne R. Bauer, Daniel A. Bell, 1999-02-13 The East Asian Challenge for Human Rights shows that critical intellectuals in East Asia have begun to chart a middle ground between the extremes of the international debate on human rights making particular headway in the areas of group rights and economic social and cultural ethnic minority rights The chapters form a collective intellectual inquiry into the following areas critical perspectives on the Asian values debate theoretical proposals for an improved international human rights regime with greater input from East Asians the resources within East Asian cultural traditions that can help promote human rights and key human rights issues facing East Asia as a result of rapid economic growth in the region Advantage: How American Innovation Can Overcome the Asian Challenge Adam Segal, 2012-01-09 Segal presents a contrarian analysis of how the United States can succeed in the technological race with Asia The Asian Challenge John Andrews, 1991-01-01 **The East Asian Challenge for Democracy** Daniel A. Bell, 2013-08-12 The rise of China along with problems of governance in democratic countries has reinvigorated the theory of political meritocracy But what is the theory of political meritocracy and how can it set standards for evaluating political progress and regress To help answer these questions this volume gathers a series of commissioned research papers from an interdisciplinary group of leading philosophers historians and social scientists The result is the first book in decades to examine the rise or revival of political meritocracy and what it will mean for political developments in China and the rest of the world Despite its limitations meritocracy has contributed much to human flourishing in East Asia and beyond and will continue to do so in the future This book is essential reading for those who wish to further the debate and perhaps even help to implement desirable forms of political change **An East Asian Challenge to Western Neoliberalism** Niv Horesh, Kean Fan Lim, 2017-08-03 Analysts generally agree that in the long term the biggest challenge to American hegemony is not military but rather China's economic rise This perception is spread in no small measure because Xi Jinping has in the face of patent military inferiority conducted himself much more boldly on the world stage than Hu Jintao Meanwhile China has also begun conjuring up an alternative vision for global leadership now widely termed as the China model This book therefore offers a critical and comprehensive explanation of the China model and its origins Using a range of case studies covering varying historical and geographical approaches it debates whether the Chinese experience in the last three decades of economic reform should be interpreted as an answer to the reigning hegemony of neoliberalism or rather a further reinforcement of it To answer these questions it provides an investigation into what China may have learned from its East Asian neighbours earlier economic successes It also examines how it is responding to and might even reconfigure the world political economic system as it develops fresh and potentially more powerful regulatory capacities Providing a multi dimensional analysis of the China model the book will be of interest to students and scholars of Chinese Economics Economic Geography and Chinese Studies **The Asian Modern** C.J.W.-L.

Wee,2007-10-01 How does one comprehend the phenomenon of the modernization of an Asian society in a globalized East Asian context With this opening question the author proceeds to give an account of how the modernization processes for postcolonial societies in Asia such as those of India Malaysia and Singapore are fraught with collaborations and conflicts between different socio political historical economic and cultural agents Such ambivalent dynamics contribute to what Wee argues as a revealing distortion of the extant models of Western modernity which is nonetheless rooted in the politics of worldwide capitalism Wee s narrative refuses to accept the uncritical interpretation of the modernizing processes in Asia as liberation from the hegemony of Euro American capitalism But neither is Wee prepared to concede that all cultural initiatives in the postcolonial societies are therefore denied all power to devise alternative forms of expression in the face of this haunting presence It is the persistent effort to see the many faces of modernization in Asia in their full complexity that sets this study apart Readers will discover that what seems to be the modernization of a single geopolitical entity is inevitably linked to the dynamics of various agents in other locations at different times which makes us reflect on the existence of the many distortions in our societies

Challenges of International Law in the Asian Region Vitit Muntarbhorn,2021-06-14

This book provides an innovative outlook of the various challenges of international law in the Asian region Moving away from the Eurocentrism prevalent in the literature on the subject it provides a comprehensive Asian perspective without adopting a monolithic or homogeneous Asian approach Although Asian countries converge on certain issues related to international law such as engagement with the United Nations at times there is a significant divergence such as in the case of agricultural trade liberalisation Given the vastness of the region and the differing political systems there are many discrepancies to consider The book takes into account the viewpoint of civil society so as to avoid a vertical state centred approach Offering an easy to understand presentation of key issues concerning the region this book is a useful introduction to this complex topic for students academics and practitioners of international law

redefine Latin America's relations with India is a question of increasing relevance for policymakers. This volume offers a review of key cross regional trends and critical policy issues involving the changing relationship between these two Asian giants and Latin America. Selected country case studies: Argentina, Brazil, Chile, and Mexico provide a more in depth analysis of the implications of China's and India's evolving interaction with the region. *The North Korean Nuclear Challenge* United States. Congress. House. Committee on International Relations. Subcommittee on Asia and the Pacific, 2005. **Challenges to Global Security** Hussein Solomon, 2007-10-24. Ours is an age of great upheaval where change sometimes appears to be the only constant. Three of the most important forces driving such change are globalization, regionalization, and democratization. This substantial work makes a concerted attempt to understand these forces and to show how they impact on the vitally important question of global security. The volume brings together a wide range of scholars who hold diverse views and who collectively make a very significant contribution to current discourses within international relations and contemporary geopolitics. Such is the book's breadth that it covers every region of the world, addressing in turn security problems in the USA, Latin America, South Asia, South East Asia, Europe, Russia, and environs, the Middle East, and Africa. Each discourse receives substantial coverage from economics and politics to religion, religious fundamentalism, and human rights. *Challenges to Global Security* offers one of the richest comparative volumes yet to be published on the subject and will have strong appeal to students, scholars, and policymakers in the fields of international relations, ethics, and politics.

International Environmental Law and Asian Values Roda Mushkat, 2004. Following decades of vigorous economic expansion, Asia is confronting the environmental consequences of unfettered development. This poses a challenge because of the strong bias of prevailing cultural systems in the region toward the goal of lifting standards of living over achieving ecological sustainability. This book juxtaposes international environmental norms and practices with relevant Asian policies and their applications in key areas. Roda Mushkat examines the fundamental principle of public participation in environmental law making as well as the rights approach against the emergence of democratic and human rights norms in the region. The complex relationship between trade and the environment is also discussed in light of the strong regional emphasis on economic growth, trade liberalization, and the aversion to conditionalities. Given regionalization processes in Asia Pacific and elsewhere, this work seeks to establish to what extent such processes have led to the regionalization of international environmental law. *International Environmental Law and Asian Values* concludes that although some gaps can be identified between international imperatives and regional responses, Asian values have not proved to be an insurmountable barrier to the spread of international environmental legal ideas. On the whole, the region is responding to impulses emanating from the global arena rather than resisting them consciously. The analysis and conclusions of this comprehensive and original work will be of considerable interest to scholars of international law and relations, environmental policy, comparative culture, economic development, and social change. **Learning from the Asian Tigers** Sanjaya

What's Wrong with Rights? Nigel Biggar, 2020-09-25 Are natural rights nonsense on stilts as Jeremy Bentham memorably put it Must the very notion of a right be individualistic subverting the common good Should the right against torture be absolute even though the heavens fall Are human rights universal or merely expressions of Western neo imperial arrogance Are rights ethically fundamental proudly impervious to changing circumstances Should judges strive to extend the reach of rights from civil Hamburg to anarchical Basra Should judicial oligarchies rather than legislatures decide controversial ethical issues by inventing novel rights Ought human rights advocates learn greater sympathy for the dilemmas facing those burdened with government These are the questions that *What's Wrong with Rights* addresses In doing so it draws upon resources in intellectual history legal philosophy moral philosophy moral theology human rights literature and the judgments of courts It ranges from debates about property in medieval Christendom through Confucian rights scepticism to contemporary discussions about the remedy for global hunger and the justification of killing And it straddles assisted dying in Canada the military occupation of Iraq and genocide in Rwanda *What's Wrong with Rights* concludes that much contemporary rights talk obscures the importance of fostering civic virtue corrodes military effectiveness subverts the democratic legitimacy of law proliferates publicly onerous rights and undermines their authority and credibility The solution to these problems lies in the abandonment of rights fundamentalism and the recovery of a richer public discourse about ethics one that includes talk about the duty and virtue of rights holders
