Riedel, 2006-11-07 Article 9 of the International Covenant on Economic Social and Cultural Rights on the right to social security is the shortest article in the entire Covenant and for that reason alone highly abstract and vague A comprehensive analysis of the article 9 is still lacking not least because it is widely regarded as a Pandora's box better not to be opened Experience has shown that the quality of the state reporting procedure is greatly improved once the Committee on Economic Social and Cultural Rights has adopted a General Comment Thus it seems very desirable to close this gap For the reason an International Expert Workshop on the Right to Social Security was held in April 2005 at the German Institute for Human Rights whose purpose was to highlight specific issues of the right to social security which should be addressed by the Committee when drafting a General Comment on article 9 The results of this workshop are published in this volume providing an insight into the current challenges on social security as a human right **Managing Social Change and Social Policy in Greater China** Ka-Ho Mok, Maggie K. W. Lau, 2013-11-07 East Asia is at the heart of the global economic transformation and the countries of the region are witnessing rapidly changing labour markets alongside the pressure to cut production costs and lower taxes in order to become successful competition states These changes have resulted in increased welfare demands which governments organizations and agencies across the region have had to address This book examines welfare regimes in the Greater China region encompassing mainland China Hong Kong Macao and Taiwan In so doing it explores the ways in which the rapid growth and internationalisation of the economy across Greater China is presenting new social policy challenges that governments social welfare organizations and agencies in the region are having to respond to Rather than simply describing and categorising welfare systems the contributors to this volume add to our understanding of how one of the major economic transformations of the contemporary era in East Asia is shaping welfare provision in the region In turn in this context of economic change they examine the new strategies and measures that have been adopted in order to reduce the heavy burden on the state in terms of welfare provision whilst also attempting to diversify funding and provision sources to meet the pressing welfare needs Based upon extensive fieldwork by leading scholars of social policy this book will appeal to students and scholars of Asian social policy comparative development and social policy social welfare and Chinese studies **Recent Financial Crises** The late Lawrence R. Klein, Tayyeb Shabbir, 2007-01-01 Financial crises are recurring phenomena that can

cause significant economic and societal loss This book is therefore vitally important as it analyzes why and how financial crises occur the extent of their impact and what can be done to prevent their recurrence or reduce the damage they cause Comprising original and never before published papers by distinguished economists this book offers insights about lessons that were or should have been learned from recent outbreaks of such crises in East Asia and elsewhere Recent Financial Crises also presents a set of econometric studies of issues such as labor market behavior investment and productivity and exchange rate adjustments Although China did not have a crisis its economic behavior was closely monitored in order to see if that had any effect on the crisis conditions In this respect the book contains an estimation of China's core inflation rate as well as its true cost of living index over a 20 year period spanning the Asian financial crisis In general collectively the studies point to a need for ongoing structural reforms to minimize vulnerability to crises or soften their impact The necessity for resorting to viable safety nets is also stressed Policymakers and central bankers will find this book of great value as will scholars and researchers at many levels of academe involved in financial business and international economics **Full and**

Productive Employment in Developing Economies Rizwanul Islam, 2019-07-30 The United Nations Sustainable Development Goals include a specific target for full and productive employment However what constitutes full employment in developing countries is not yet clearly understood And likewise there is no clear direction for developing strategies and policies to address this challenge Drawing on the author's deep knowledge of employment and inclusive development this book presents a broad framework which could enable us to pursue the challenging goal of full productive employment in developing countries It revisits the conceptual foundations of full employment and carefully examines the issue of suitable indicators for monitoring progress It also examines the challenges created by globalized production chains and labour market fluctuations caused by economic crises This book throws light on a major lacuna in development thinking on how the challenge of creating productive employment for all in developing countries needs to be addressed It provides a solution by re-examining relevant theories and empirical evidence and by bringing out their implications for development strategies and policies Finally the focus falls on the effective implementation of employment strategies and policies This authoritative work will appeal to a diverse readership of academic researchers think tanks international organizations and development partners

Handbook on East Asian Social Policy Misa Izuhara, 2013-01-01 Dramatic socio-economic transformations over the last two decades have brought social policy and social welfare issues to prominence in many East Asian societies Since the 1990s and in response to national as well as global pressure there have been substantial developments and reforms in social policy in the region but the development paths have been uneven Until recently comparative analysis of East Asian social policy tends to have focused on the established welfare state of Japan and the emerging welfare regimes of four Tiger Economies Much of the recent debate indeed preceded China's re-emergence onto the world economy In this context this Handbook brings China more fully into the contemporary social policy debates in East Asia Organised around five themes from welfare

state developments to theories and methodologies to current social policy issues the Handbook presents original research from leading specialists in the fields and provides a fresh and updated perspective to the study of social policy Providing a comparative international approach this Handbook will appeal to academics researchers and students at both undergraduate and postgraduate levels working in the fields of social policy as well as policy makers and practitioners who are interested in social policy lessons from other societies Welfare Reform in East Asia Chak Kwan Chan, King Lun Ngok, 2011 In many Western countries social welfare payments are increasingly being made conditional on recipients doing voluntary work or attending job training courses a system known as welfare to work or workfare Although social welfare in Asia is very different to the West with much smaller social welfare budgets a strong self reliance and a much higher dependency on family networks to provide support the workfare approach is also being adopted in many Asian countries This is the first book to provide a comprehensive overview of how welfare reform around work is implemented in leading East Asian Based on the experiences of seven East Asian economies including China Japan South Korea Taiwan Singapore Hong Kong and Macau this book critically analyses current trends the social economic and political factors which lead to the implementation of workfare compares the similarities and differences of workfare in the different polities and assesses their effectiveness

Employment and Inclusive Development Rizwanul Islam, Iyanatul Islam, 2015-02-11 Issues relating to employment and labour have once again come to the fore of global policy debates in the wake of the widespread unemployment that has accompanied the current financial crisis In the developing world there is a growing realization that productive employment promotion and social protection have to be at the core of inclusive growth and development This book supports the view that employment is a cross cutting issue shaped by macroeconomic and microeconomic policy interventions and provides a capacious framework to analyse the complexity of this global debate It covers a wide range of issues that have received insufficient attention in the discourse of development and labour economics These include the impact of macroeconomic policies on employment labour rights the development of human capabilities and employability youth employment the benefits and costs of labour market flexibility and the importance of social protection for all This important book aims at filling this gap by revisiting old debates and reconnecting them to the contemporary context combining analyses with relevant empirical evidence It will appeal to a diverse readership of academic institutions and think tanks international organizations bilateral donors working on development issues and policy makers in developing countries *Social Development in Asia* Kwong-leung Tang, 2012-12-06 Most Asian countries have shown a strong commitment to rapid economic development Economists have argued that the fruits from economic development will be spread equitably throughout the population In the absence of a strong tradition of social rights social development in Asia has long been taken for granted This collection documents social development in the Asian countries of China Hong Kong Taiwan South Korea Thailand and India and concludes that social development has lagged behind economic development This has given rise to

distorted development in many countries Serious development problems of poverty and inequalities have lingered even in these economically advanced countries of Hong Kong Taiwan and Singapore These problems have been exacerbated in the wake of the Asian economic crisis In order to harmonize social development with economic growth Asian states ought to be more proactive in their development agendas As a text on social development in Asia this book is primarily intended for practitioners and students of social work social administration and social policy It is also relevant for students and practitioners of sociology economics and public policy *Mitigating the Human Impact of the Asian Crisis* United Nations Development Programme. Regional Bureau for Asia and the Pacific, Carl Riskin, United Nations Development Programme, 1999 Discusses the social impact of the Asian crisis and the response of the UNDP regarding the protection of human development in the regions concerned Includes a more detailed review of responses in the six countries most affected in an Annex
