The ATOM Darwin Gross,1998 Development, Growth, and State of the Atomic Energy Industry United States. Congress. Joint Committee on Atomic Energy,1963 **Life in the Universe** James Newsome Pierce,2008 This book explores the science of extraterrestrial life with a particular emphasis on the existence of intelligent alien civilizations It introduces the reader to the basic chemistry associated with life on Earth and describes the planetary and stellar environments that allow us to exist It also discusses the likelihood of alien life developing at other locations in our galaxy along with the possibility that we will meet or communicate with them This book is suitable for use as a text in an introductory Life in the Universe course **REVIEWS** Blog Critics Magazine written by Regis Schilken <http://blogcritics.org/archives/2009/03/16/082715.php> *Science Is Not A Quiet Life: Unravelling The Atomic Mechanism Of Haemoglobin* Max F Perutz,1998-01-15 Linus Pauling called haemoglobin the most interesting and important of molecules This important volume shows how X ray crystallography was used to determine its bewilderingly complex atomic structure and to unravel the stereochemical mechanisms of its respiratory functions It introduces isomorphous replacement with heavy atoms which led to the first protein structures haemoglobin and its simpler relative myoglobin Later papers deal with the stereochemistry of the cooperative effects of haemoglobin with the relationships between the structures and impaired functions of abnormal haemoglobin with species adaptation of haemoglobin and with its action as a drug receptor and as an oxygen sensor The final papers deal with amino acid repeats which act as polar zippers and their role in certain inherited neurodegenerative diseases
