

THE AUCTION PROCESS

Searching

Ready to get started? Decide on your budget and buying strategy first to lock down the details, like where you'll search and how you'll pay. Once you've found a property you like, don't forget to do your due diligence research before you bid.

Bidding

Once you have a well-researched property, it's on to the fun part. To get prepped to make your offer, refer back to your bidding strategy. Don't forget to look at all the costs that go into the purchase! When you're ready, place that bid and keep an eye on the auction.

Buying

You've won an auction, and now it's time to check out! Make sure you fill out the checkout form within 24 hours with your financing and other important information. The seller will review your offer and, if it's accepted, you'll move on to the closing process.

Owning

Finally, the best part — ownership! You've gone through the whole auction process, and now it's time to take possession and activate your owning strategy, whether that's moving in, fix and flip, finding new tenants, or more. Enjoy your new property!

Wolfgang Jank,Galit Shmueli,2010-12-01 Explore cutting edge statistical methodologies for collecting analyzing and modeling
online auction data Online auctions are an increasingly important marketplace as the new mechanisms and formats
underlying these auctions have enabled the capturing and recording of large amounts of bidding data that are used to make
important business decisions As a result new statistical ideas and innovation are needed to understand bidders sellers and
prices Combining methodologies from the fields of statistics data mining information systems and economics Modeling
Online Auctions introduces a new approach to identifying obstacles and asking new questions using online auction data The
authors draw upon their extensive experience to introduce the latest methods for extracting new knowledge from online
auction data Rather than approach the topic from the traditional game theoretic perspective the book treats the online
auction mechanism as a data generator outlining methods to collect explore model and forecast data Topics covered include
Data collection methods for online auctions and related issues that arise in drawing data samples from a Web site Models for
bidder and bid arrivals treating the different approaches for exploring bidder seller networks Data exploration such as
integration of time series and cross sectional information curve clustering semi continuous data structures and data
hierarchies The use of functional regression as well as functional differential equation models spatial models and stochastic
models for capturing relationships in auction data Specialized methods and models for forecasting auction prices and their
applications in automated bidding decision rule systems Throughout the book R and MATLAB software are used for
illustrating the discussed techniques In addition a related Web site features many of the book s datasets and R and MATLAB
code that allow readers to replicate the analyses and learn new methods to apply to their own research Modeling Online
Auctions is a valuable book for graduate level courses on data mining and applied regression analysis It is also a one of a kind
reference for researchers in the fields of statistics information systems business and marketing who work with electronic
data and are looking for new approaches for understanding online auctions and processes Visit this book s companion
