The Austrian Electoral Reform Of 1907:

The Austrian Electoral Reform of 1907 William Alexander Jenks, 1950 In 1815 the forces of nationalism and democracy which had been propagated in Europe during the Revolutionary and Napoleonic years were halted momentarily by a coalition of European powers which included Metternich's Austria. A hundred years later the Habsburg monarchy found itself involved in its last fateful struggle with these forces. This study has as its purpose the description of one of the last efforts made to reconcile nationalism and democracy with Habsburg tradition in the period preceding the final collapse of the empire.

Preface A Short History of Electoral Systems in Western Europe Andrew McLaren Carstairs, 2013-04-15 This book provides a concise and accessible account of the historical experience of European parliaments: why different electoral systems were adopted, how they have functioned, how they have affected the development of political parties, and in what respects they have been found over time to be either suitable or unsatisfactory. The book begins with a summary of the main electoral systems, analysing and re-assessing each in the light of historical experience. The core of the book, however, is a country-by-country account of the systems which have operated in each of the main West European countries in the context of their own constitutional, political, and social developments.

The Problem of Peace and Austrian Society, 1889-1914 Richard Robert Laurence, 1968 *Austria 1867-1955* John W. Boyer, 2022-09-15 Austria 1867-1955 connects the political history of German-speaking provinces of the Habsburg Empire before 1914, Vienna and the Alpine Lands, with the history of the Austrian Republic that emerged in 1918. John W. Boyer presents the case of modern Austria as a fascinating example of democratic nation building. The construction of an Austrian political nation began in 1867 under Habsburg Imperial auspices, with the German-speaking bourgeois Liberals defining the concept of a political people, *Volk*, and giving that *Volk* a constitution and a liberal legal and parliamentary order to protect their rights against the Crown. The decades that followed saw the administrative and judicial institutions of the Liberal state solidified, but in the 1880s and 1890s the membership of the *Volk* exploded to include new social and economic strata from the lower bourgeoisie and the working classes. Ethnic identity was not the final structuring principle of everyday politics as it was in the Czech lands. Rather, social class, occupational culture, and religion became more prominent variables in the sortition of civic interests, exemplified by the emergence of two great ideological parties, Christian Socialism and Social Democracy, in Vienna in the 1890s. The war crisis of 1914-1918 exploded the Empire, with the Crown self-destructing in the face of military defeat, chronic domestic unrest, and bitter national partisanship. But this crisis also accelerated the emergence of new structures of democratic self-governance in the German-speaking Austrian lands, enshrined in the republican Constitution of 1920. Initial attempts to make this new project of democratic nation building work failed in the 1920s and 1930s, culminating in the catastrophe of the 1938 Nazi occupation. After 1945, the surviving legatees of the Revolution of 1918 reassembled under the four-power Allied occupation, which fashioned a shared political culture which proved sufficiently flexible to accommodate intense partisanship, resulting

by the 1970s in a successful republican system organized under the aegis of elite democratic and corporatist negotiating structures in which the Catholics and Socialists learned to embrace the skills of collective but shared self governance

Steenson,2010-11-23 In this book Gary P Steenson offers new interpretations of the history and nature of socialist movements in Germany France Austria and Italy from after Karl Marx s death until World War I Based largely on Friedrich Engels s correspondence and those of other socialist party leaders Steenson analyzes Engels s view of European politics and those of his strategic counsel He also derives the standards of Marxian orthodoxy from party publications and the political press The central importance of Engels is clear as is the seductive appeal of his frequently insightful often misguided counsel to working politicians Steenson also finds that this period saw no contradiction in adherence to Marxism and full participation in democratic representative politics and that in those countries where democratic forms did not exist Marxists led the struggle to obtain them The Politics of Ethnic Survival Gary B. Cohen,2006 This book examines how one of Imperial Austria s principal ethnic conflicts that between Czechs and Germans developed in one of the major cities during the era of industrialization and urban growth It shows how

the inhabitants of Prague the capital of Bohemia constructed and articulated ethnic group loyalties and social solidarities over the course of the nineteenth century The German speaking inhabitants of the Bohemian capital developed a group identification and defined themselves as a minority as they dealt with growing Czech political and economic strength in the city and with their own sharp numerical decline in the 1910 census only seven percent of the metropolitan population claimed that they spoke primarily German The study uses census returns extensive police and bureaucratic records newspaper accounts and memoirs on local social and political life to show how the German minority and the Czech majority developed demographically and economically in relation to each other and created separate social and political lives for their group members The study carefully traces the roles of occupation class religion and political ideology in the formation of German group loyalties and social solidarities The social relations which bound together the members of the German speaking minority and the social boundaries which separated them from the Czech majority at the end of the nineteenth century proved to be selective and considerable contact went on across the lines in many facets of individuals everyday life As the German minority developed a shared group life what came to define them and to separate them from the Czech majority was a shared Austro German ethnic and national loyalty an Austro German national liberal ideology the defense of common middle class and lower middle class social and political interests and a shared German public life Both German speaking Catholics and Jews could share in the sense of German community and group solidarity provided they upheld middle class liberal values The bonds of community for the middle class and lower middle class Germans in Prague established in the 1860s tended to exclude German speaking wage laborers and lower middle class radical nationalists who might challenge liberal national values Despite all the efforts to strengthen German community solidarity and combat assimilation of German speakers with the Czech majority from the 1880s to after 1900 the organized German community could do little to prevent the absorption of working class German speakers into the Czech population of the industrial districts

Constitutionalism, Legitimacy, and Power Kelly L Grotke, Markus J Prutsch, 2014-09-25 If one counts the production of constitutional documents alone the nineteenth century can lay claim to being a constitutional age one in which the generation and reception of constitutional texts served as a centre of gravity around which law and politics consistently revolved This volume critically re examines the role of constitutionalism in that period in order to counter established teleological narratives that imply a consistent development from absolutism towards inclusive participatory democracy Various aspects of constitutional histories within and outside of Europe are examined from a comparative transnational and multidisciplinary historical perspective organized around five key themes The first part looks at constitutions as anti revolutionary devices and addresses state building monarchical constitutionalism and restorations The second part takes up constitutions and the justification of new social inequalities focusing on women s suffrage human rights and property The third part uses individual country studies to take on questions of how constitutions served to promote nationalism The use of

constitutions as instruments of imperialism is covered in the fourth part and the final part examines the ways that constitutions function simultaneously as legal and political texts These themes reflect a certain scepticism regarding any easy relationship between stated constitutional ideals and enacted constitutional practices Taken together they also function as a general working hypothesis about the role of constitutions in the establishment and maintenance of a domestically and internationally imbalanced status quo of which we are the present day inheritors More particularly this volume addresses the question of the extent to which nineteenth century constitutionalism may have set the stage for new forms of domination and discrimination rather than inaugurating a period of progress and increasing equality

Culture and Political Crisis in Vienna John W. Boyer, 1995 In this sequel to *Political Radicalism in Late Imperial Vienna* John Boyer picks up the history of the Christian Social movement after founder Karl Lueger's rise to power in Vienna in 1897 and traces its evolution from a group of disparate ward politicians through its maturation into the largest single party in the Austrian parliament by 1907 to its major role in Imperial politics during the First World War Boyer argues that understanding the unprecedented success that this dissident bourgeois political group had in transforming the basic tenets of political life is crucial to understanding the history of the Central European state and the ways in which it was slowly undermined by popular electoral politics The movement's efforts to save the Austrian Empire by trying to create an economically integrated but ethnically pluralistic state are particularly enlightening today in the shadow of ethnic violence in Sarajevo where began the end of the Austrian Empire in 1914 The most comprehensive account of any mass political movement in late nineteenth century Central Europe this two volume work is crucial reading for anyone interested in Hapsburg history German history or the history of social democracy

Aristocracy and the Modern World Ellis Wasson, 2017-09-16 Ellis Wasson offers one of the first comprehensive studies of the European ruling class during the 19th and 20th centuries Distilling a wealth of recent research Wasson analyses the role of aristocracy in modern times focusing on the tensions that exist between egalitarian values and the way elites shape society Wasson explodes myths and jettisons stereotypes in sweeping coverage that takes the story from the Congress of Vienna to Stalingrad The study recounts the change from the genteel world of court balls to Caf Society and finally on to Eurotrash It also contrasts the paradox of continued aristocratic social power and cultural leadership with the gradual decline in their political authority *Aristocracy and the Modern World* covers key topics such as The fabulous wealth of the great magnates The relationship between servants and masters Interaction with the middle classes Concepts of honour Culture recreation and gender Local authority and national power Lively and authoritative the book reviews developments in Scandinavia the Austro Hungarian Empire France Italy and Spain as well as in Britain Germany and Russia It is essential reading for all those with an interest in modern European history

Beneš, 2017 This book tells the story of how nationalism spread among industrial workers in central Europe in the twentieth century addressing the far reaching effects including the democratization of Austrian politics the collapse of internationalist socialist solidarity before World War I and the twentieth century triumph of Social Democracy in much of Europe **Austria-Hungary and the Origins of the First World War** Samuel R. Williamson Jr, 1990-12-12 A major re examination of Habsburg decision making from 1912 to July 1914 the study argues that Austria Hungary and not Germany made the crucial decisions for war in the summer of 1914 Based on extensive new archival research the book traces the gradual militarization of Austro Hungarian foreign policy during the Balkan Wars The disasters of those wars and the death of the Archduke Franz Ferdinand the heir apparent and a force for peace in the monarchy convinced the Habsburg elite that only a war against Serbia would end the South Slav threat to the monarchy s existence Williamson also describes Russia s assertive foreign policy after 1912 and stresses the unique linkages of domestic and foreign policy in almost every issue faced by Habsburg statesmen
