The Baffle:

The Baffle Book Lassiter Wren, Randle McKay, 1929 **Internal flow mechanism of modern hydraulic machinery**
Kan Kan, Zhiquan Daniel Deng, Yongguang Cheng, Pengcheng Guo, Daqing Zhou, 2023-02-03 Pressure Vessel Design Manual
Dennis R. Moss, Michael M. Basic, 2012-12-31 Pressure vessels are closed containers designed to hold gases or liquids at a pressure substantially different from the ambient pressure. They have a variety of applications in industry including in oil refineries, nuclear reactors, vehicle airbrake reservoirs, and more. The pressure differential with such vessels is dangerous and due to the risk of accident and fatality around their use, the design, manufacture, operation, and inspection of pressure vessels is regulated by engineering authorities and guided by legal codes and standards. *Pressure Vessel Design Manual* is a solutions-focused guide to the many problems and technical challenges involved in the design of pressure vessels to match stringent standards and codes. It brings together otherwise scattered information and explanations into one easy-to-use resource to minimize research and take readers from problem to solution in the most direct manner possible. Covers almost all problems that a working pressure vessel designer can expect to face with 50 step-by-step design procedures including a wealth of equations, explanations, and data. Internationally recognized, widely referenced, and trusted with 20 years of use in over 30 countries, making it an accepted industry standard guide. Now revised with up-to-date ASME, ASCE, and API regulatory code information and dual unit coverage for increased ease of international use. *Proceedings of the International Field Exploration and Development Conference 2023* Jia'en Lin, 2024-03-15 This book focuses on reservoir surveillance and management, reservoir evaluation and dynamic description, reservoir production stimulation, and EOR ultra-tight reservoir, unconventional oil and gas resources, technology, oil and gas well production testing, and geomechanics. This book is a compilation of selected papers from the 13th International Field Exploration and Development Conference (IFEDC) 2023. The conference not only provides a platform to exchange experience but also promotes the development of scientific research in oil and gas exploration and production. The main audience for the work includes reservoir engineers, geological engineers, enterprise managers, senior engineers, as well as students. Proceedings of the 7th International Symposium of Space Optical Instruments and Applications H. Paul Urbach, Huilin Jiang, 2023-08-30 This proceedings book contains selected and expanded contributions presented at the 7th International Symposium of Space Optical Instruments and Applications held in Beijing, China, on Oct 21-23, 2022. The meeting was organized by the Sino-Holland Space Optical Instruments Joint Laboratory and supported by Beijing Institute of Space Mechanics and Electricity. In the recent years, space optical payloads are advancing toward high spatial resolution, high temporal resolution, high radiometric resolution, and high spectral resolution, and becoming more and more intelligent. Commercial remote sensing industry has made steady progress in terms of the scope of satellite systems and applications. Meanwhile, space optical remote sensing data has been extensively applied to monitoring of resources, meteorology, ocean environment, disaster reduction, and many other fields. The symposium focused

on key innovations of space based optical instruments and applications and the newest developments in theory technology and applications in optics in both China and Europe It thus provided a platform for exchanges on the latest research and current and planned optical missions The major topics covered in these conference proceedings are 1 Advanced space optical remote sensing application technology 2 Deep space exploration and astronomical observation technology 3 Advanced space optical remote sensing instrument technology 4 Commercial optical observation technology and services

Fuselage-drag Tests in the Variable-density Wind Tunnel Ira H. A. Abbott, 1937 Results are presented on drag tests of six bodies of revolution with systematically varying shapes and with a fineness ratio of 5 The formes were derived from source sink distributions and formulas are presented for the calculation of the pressure distributions of the forms The tests were made in the N A C A variable density tunnel over a range of values of Reynolds number from about 1 500 000 to 25 000 000 The results show that the bodies with the sharper noses and tails have the

lowest drag coefficients are based on the two thirds power of the volume The data show the most important single characteristic of the body form to be the tail angle which must be fine to obtain low drag Let the Water Do the Work Bill Zeedyk, Van Clothier, 2014 Let the Water Do the Work is an important contribution to riparian restoration By thinking like a creek one can harness the regenerative power of floods to reshape stream banks and rebuild floodplains along gullied stream channels Induced Meandering is an artful blend of the natural sciences geomorphology hydrology and ecology which govern channel forming processes Induced Meandering directly challenges the dominant paradigm of river and creek stabilization by promoting the intentional erosion of selected banks while fostering deposition of eroded materials on an evolving floodplain The river self heals as the growth of native riparian vegetation accelerates the meandering process Not all stream channel types are appropriate for Induced Meandering yet the Induced Meandering philosophy of going with the flow can inform all stream restoration projects Induced meandering strives to understand rivers as timeless entities governed by immutable rules serving their watersheds setting their own timetables and coping with their own realities as they carry mountains grain by grain to the sea Anyone with an interest in natural resource management in these uncertain times should read this book and put these ideas to work **The Foundations of Acoustics** Eugen Skudrzyk, 2012-12-06 Research and scientific progress are based upon intuition coordinated with a wide theoretical knowledge experimental skill and a realistic sense of the limitations of technology Only a deep insight into physical phenomena will supply the necessary skills to handle the problems that arise in acoustics The acoustician today needs to be well acquainted with mathematics dynamics hydrodynamics and physics he also needs a good knowledge of statistics signal processing electrical theory and of many other specialized subjects Acquiring this background is a laborious task and would require the study of many different books It is the goal of this volume to present this background in as thorough and readable a manner as possible so that the reader may turn to specialized publications or chapters of other books for further information without having to start at the preliminaries In trying to accomplish this goal mathematics serves only as a tool the better our understanding of a physical phenomenon the less mathematics is needed and the shorter and more concise are our computations A word about the choice of subjects for this volume will be helpful to the reader Even scientists of high standing are frequently not acquainted with the fundamentals needed in the field of acoustics Chapters I to IX are devoted to these fundamentals After studying Chapter I which discusses the units and their relationships the reader should have no difficulty converting from one system of units to any other **Official Gazette of the United States Patent and Trademark Office**, 1976 *The Proceedings of the 2018 Asia-Pacific International Symposium on Aerospace Technology (APISAT 2018)* Xinguo Zhang, 2019-06-08 This book is a compilation of peer reviewed papers from the 2018 Asia Pacific International Symposium on Aerospace Technology APISAT 2018 The symposium is a common endeavour between the four national aerospace societies in China Australia Korea and Japan namely the Chinese Society of Aeronautics and Astronautics CSAA Royal Aeronautical Society Australian Division
