Communication and the Work-Life Balancing Act Elizabeth Fish Hatfield,2016-12-27 Communication and the Work Life

Balancing Act Intersections across Identities Genders and Cultures offers scholarly research related to work life balance in today's environment with a particular focus on the fields of communication and gender studies. The chapters examine the choices, challenges, and gendered experiences that women and men face as they navigate structures of work, domestic duties, and childcare in search of balance. Underpinning this text is the notion that work life balance affects everyone but is experienced differently through the intersections of sex, age, gender, socioeconomic status, and race. Recommended for scholars of communication, gender studies, organizational communication, sociology, and family communication. Working Mother, 2001-05. The magazine that helps career moms balance their personal and professional lives. Women in Academic Leadership, Susan J. Bracken, Jeanie K. Allen, Diane R. Dean, 2023-07-03. Colleges and universities benefit from diversity in their leadership roles and profess to value diversity of thought or experience of person. Yet why do women remain underrepresented in top academic leadership positions and in key positions along the academic career ladder? Why don't they advance at a rate proportional to that of their male peers? How do internal and external environmental contexts still influence who enters academic leadership and who survives and thrives in those roles? Women in Academic Leadership complements its companion volumes in the Women in Academe series, provoking readers to think critically about the gendered nature of academic leadership across the spectrum of institutional types. It argues that leadership, the academy, and the nexus of academic leadership remain gendered structures steeped in male-oriented norms and mores. Blending research and reflection, it explores the barriers and dilemmas that these structures present and the professional strategies and the personal choices women make in order to successfully surmount them. The authors pose questions about how women leaders negotiate between their public and private selves. They consider how women develop a vital sense of self-efficacy along with the essential skills and knowledge they need in order to lead effectively, how they cultivate opportunity, and how they gain legitimacy and maintain authenticity in a male-gendered arena. For those who seek to create an institutional environment conducive to equity and opportunity, this book offers insight into the pervasive barriers facing women of all colors and evidence of the need for a more complex, multi-dimensional view of leadership. For women in academe who seek to reach their professional potential and maintain authenticity, it offers encouragement and a myriad of strategies for their growth and development. **A Study On Women Employees Attitude About Work Life Balance** Dr A Vanitha Dr S Meenakumari,
