The Earth Report 2 Monitoring The Battle For The Environment:

The Earth Report 2 Edward Goldsmith, Nicholas Hildyard, 1990-01-01 **Nature's Web** Peter Marshall, 2015-02-12

This powerful book provides the first comprehensive overview of the intellectual roots of the worldwide environmental movement from ancient religions and philosophies to modern science and ethics and synthesizes them into a new philosophy of nature in which to ground our moral values and social action. It traces the origins and evolution of the dominant worldview that has built our industrial technocratic man centered civilization and brought us to the current ecological crisis. At the same time it uncovers an alternative cultural tradition in the world's different religions and philosophies and describes how these ideas are now surfacing and coalescing to form an ecological sensibility and a new vision of nature which recognizes the interrelatedness of all living things. Finally this book integrates these varied traditions with modern physics and the science of ecology into a larger philosophical whole that provides the environmental movement with a comprehensive vision of an organic and sustainable society in harmony with nature. As ecological disasters continue to threaten our planet becoming worse with every passing moment of indifference it has become clear that we must take action. We must change our relationship with nature and return to the days when our lives were intimately connected to and dependent upon the natural world. Nature's Web lays the foundations for that change by explaining where our complex ideas about nature come from why they are wrong and what we can do to change them.

The Politics of Industrial Agriculture Tracey Clunies-Ross, Nicholas Hildyard, 2013-11-05. In the last forty years agriculture in the industrialised countries has undergone a revolution. That has dramatically increased yields but it has also led to extensive rural depopulation, widespread degradation of the environment, contamination of food with agrochemicals and bacteria, more routine maltreatment of farm animals and the undermining of Third World economies and livelihoods through unfair trading systems. Confronted by mounting evidence of environmental harm and social impacts, mainstream agronomists and policy makers have debatedly recognized the need for change. Sustainable agriculture has become the buzz phrase. But that can mean different things to different people. We have to ask sustainable agriculture for whom? Whose interests are benefiting? And whose are suffering? At issue is the question of power of who controls the land and what it produces. Most of the changes currently under discussion will actually strengthen the status quo and the underlying causes of the damage. The result will be greater intensification of farming, environmental destruction and inequality. There are no simple off the shelf alternatives to industrial agriculture. There are however groups throughout the world who have contributed to this report and who are working together on a new approach. An agriculture that in Wendell Berry's words depletes neither soil nor people. Originally published in 1992.

From the Ground Up Helena Norberg-Hodge, Peter Goering, John Page, 2001-02. Modern industrial agriculture is in crisis. The dream of global abundance promised by chemical and biological technology is becoming a nightmare of health risks, degraded land and ailing communities. There is mounting public distrust of conventional agricultural practices. *From the Ground Up* explores the
