Local Societies in Bronze Age Northern Europe Nils Anfinset, Melanie Wrigglesworth, 2014-10-14 This book aims to understand the process of the Bronze Age societies of Northern Europe which are often regarded as the periphery and a bleak contrast to the Central European Bronze Age The Bronze Age is the first globalised period with new types of societies and new modes of exchange and trade In this context there is considerable local variation and diversity within the Bronze Age societies of Northern Europe which is poorly understood although there have been advances and changes in this research Therefore this book challenges some of the mainstream opinions on the Bronze Age of Northern Europe and focus on local and regional aspects This is done by a series of articles from significant contributors that deal with these issues on theoretical and empirical levels with regards to differences cultural dualism boundaries regions and

regionality in a period of increased globalisation The result is a movement away from local and regional aspects toward communications travels and contacts between northern Europe and the greater world not only towards Central Europe and the Near East but also towards the east Northern Arctic Europe is often left out in these discussions and this book will contribute to this greater picture of the Bronze Age world *Orogenic Processes in the Alpine Collision Zone* Nikolaus Froitzheim, Stefan M. Schmid, 2009-12-08 This book covers a multitude of Alpine type working areas and processes active in collisional mountain building in the form of 16 selected very up to date review and research articles covering the Alps Carpathians and Dinarides These data were presented at the 8th workshop on Alpine Geological Studies in Davos held in October 2007 The compilations and new data are of interest to earth scientists interested in mountain building in general and those interested in processes of continental collision in particular The book is virtually indispensable for advanced students and scientists involved in Alpine studies *International Environmental Agreements and Domestic Politics* Arild

Underdal, Kenneth Hanf, 2019-06-04 This title was first published in 2000 In examining the domestic politics of international co operation this book addresses two important questions 1 Why do governments often take different positions in negotiations about common problems why do some states push for international regulation while others hold back 2 How can variance in the domestic implementation of and compliance with international agreements be explained why do some states deliver more than they have promised others less The authors report findings and observations from a major study which focused on efforts to establish international regulations to cope with the problem known as acid rain They provide in depth case studies of nine European countries as well as a comparative analysis searching for patterns and general conclusions

A European Geography Tim Unwin, 2017-09-29 A European Geography provides a geographical interpretation and exposition of the whole of Europe Beginning with a historical and environmental introduction the text covers the cultural identity political structure economic organisation and social context of Europe examining the complex issues that are shaping the characteristics and meaning of contemporary Europe More than fifty contributors are drawn from Europe and North America contributing a wealth of research expertise in their specialist subject areas Detailed case studies provide empirical examples of the broader research themes examined A European Geography is written for undergraduate students taking courses on Europe Regional Geography European Studies and European Integration It will provide valuable reading for anyone interested in developing a detailed understanding of the processes shaping contemporary Europe *The New*
