The Eastern Origins Of Western Civilisation:

The Eastern Origins of Western Civilisation John M. Hobson, 2004-06-03 Publisher Description **The Eastern Origins of Western Civilisation** John M. Hobson, 2004 **Sustainable History and Human Dignity** Nayef R.F. Al-Rodhan, 2022-01-27 Sustainable History and the Dignity of Man is a new philosophy of history This volume outlines how sustainable history is propelled by good governance which balances the tension between the attributes of human nature emotionality amorality and egoisms and human dignity needs such as reason security human rights accountability transparency justice opportunity innovation and inclusiveness The author proposes minimum criteria for good governance that are sensitive to local cultures and histories but meet certain common global values to ensure maximum and sustainable moral and political cooperation Using an ocean model of a single collective human civilisation the author argues that we should think in terms of a common human story that is comprised of multiple geo cultural domains and sub cultures with a history of mutual borrowing and synergies The author argues that today all geo cultural domains must succeed if humanity as a whole is to triumph This collective triumph will also depend on reason and a recognition that a great deal of knowledge is indeterminate and may be temporally spatially and perhaps culturally constrained as is outlined in the author s new theory of knowledge Neuro rational Physicalism Dr Nayef R F Al Rodhan is Senior Scholar in Geostrategy and Director of the Programme on the Geopolitical Implications of Globalisation and Transnational Security at the Geneva Centre for Security Policy Geneva Switzerland This book is an exceptionally wide ranging examination of past and present approaches to the securing of a qualitatively adequate social life on the planet The need for intercultural dialogue is pressing and stated as a matter of urgency in the text That argument is well presented and it is helpfully accompanied by a large amount of empirical evidence The book is also a strong and ethically attractive humanist statement about the value of human interaction that incorporates a vision of mutual respect based on a mixture of scientific arguments and normative aspirations Those features are very impressive Professor Michael Freeden Professor of Politics Director of the Centre for Political Ideologies Professorial Fellow Mansfield College University of Oxford United Kingdom **Political Philosophy in the East an West** Jaan Islam, 2018-01-10 In the 21st century amid the convergence of global political social and economic forces we are asking ourselves the fundamental values we hold true facing an antagonism between different school of philosophy between left and right politics The proposed book provides a comprehensive analysis of western political philosophy and underlines the core principles of each argument It then argues that non have solved or have any pathway to eventually solve the question of right and wrong we are essentially moral relativists in disguise In order to break out of this cycle of uncertainty the book purposes a solution of knowledge based cognition policy based on a concrete and prove understanding of an absolute and certain body of truths This requires an analysis and blending of non western political philosophical traditions such as those espoused by Islam and Confucianism This book gives an original critique of western political philosophy and is the first book to engage in

a philosophical reconstruction of Islamic political philosophy *How the West Came to Rule* Alexander Anievas, Kerem Nişancıoğlu, 2015-06-20 Winner of International Studies Association ISA's International Political Sociology Best Book Prize for 2017 Winner of British International Studies Association BISA's International Political Economy Working Group Book Prize of 2016 Shortlisted for the ISA Book Prize Mainstream historical accounts of the development of capitalism describe a process which is fundamentally European a system that was born in the mills and factories of England or under the guillotines of the French Revolution In this groundbreaking book a very different story is told How the West Came to Rule offers an interdisciplinary and international historical account of the origins of capitalism It argues that contrary to the dominant wisdom capitalism's origins should not be understood as a development confined to the geographically and culturally sealed borders of Europe but the outcome of a wider array of global processes in which non-European societies played a decisive role Through an outline of the uneven histories of Mongolian expansion New World discoveries Ottoman Habsburg rivalry the development of the Asian colonies and bourgeois revolutions Alexander Anievas and Kerem Nisancıoğlu provide an account of how these diverse events and processes came together to produce capitalism **Time's Arrow, Time's Cycle** Peter A. Coclanis, 2006 No part of the world has been affected more by globalization in recent decades than Southeast Asia This has led many observers to believe that the region's present experience with globalization is at once unprecedented inevitable and irreversible Professor Peter A Coclanis challenges such beliefs and in so doing provides a history of globalization in Southeast Asia over the past two millennia Employing Stephen Jay Gould's famous temporal metaphors time's arrow and time's cycle Coclanis traces the trajectory of globalization arguing that globalization has ebbed and flowed in the region over the centuries that globalization is best viewed as a process rather than a permanent condition and that its effects have differed considerably across space and over time Professor Peter A Coclanis is Associate Provost for International Affairs and Albert R Newsome Professor of History and Economics at the University of North Carolina at Chapel Hill He was Raffles Visiting Professor in the Department of History at the National University of Singapore in 2005

Recent Themes in World History and the History of the West Donald A. Yerxa, 2009 New insights on global histories and Western civilization from leading scholars in the field Described as the New York Review of Books for history Historically Speaking has emerged as one of the most distinctive historical publications in recent years actively seeking out contributions from a pantheon of leading voices in historical discourse from both inside and outside academia Recent Themes in World History and the History of the West represents some of the best writing on Western civilization and world history in the past five years This collection of essays and interviews from Historically Speaking gives leading historians approaches to the continually evolving field of world history with a specific emphasis on the relationship of Western civilization to the history of the world The book also discusses the effect of empire on global history and the many ways empire continues to manifest in the contemporary world The contributors discuss world history as an intricate story of the connections within the global

community rather than a tidy static narrative that attempts to summarize everything in our global past In this volume the study of world history is presented as a constantly comparative endeavor concerned with the major themes that link and divide humanity The Gaze of the West and Framings of the East S. Nair-Venugopal,2012-05-09 This volume explores Western attitudes towards the phenomenon of Easternization drawing upon Eastern perspectives and examining the impact upon contemporary culture to argue that Easternization is another type of globalization **Eastern Approaches to Western Film** Stephen Teo,2019-07-11 Eastern Approaches to Western Film Asian Aesthetics and Reception in Cinema offers a renewed critical outlook on Western classic film directly from the pantheon of European and American masters including Alfred Hitchcock George Lucas Robert Bresson Carl Dreyer Jean Pierre Melville John Ford Leo McCarey Sam Peckinpah and Orson Welles The book contributes an Eastern Approach into the critical studies of Western films by reappraising selected films of these masters matching and comparing their visions themes and ideas with the philosophical and paradigmatic principles of the East It traces Eastern inscriptions and signs embedded within these films as well as their social lifestyle values and other concepts that are also inherently Eastern As such the book represents an effort to reformulate established discourses on Western cinema that are overwhelmingly Eurocentric Although it seeks to inject an alternative perspective the ultimate aim is to reach a balance of East and West By focusing on Eastern aesthetic and philosophical influences in Western films the book suggests that there is a much more thorough integration of East and West than previously thought or imagined **Post-Western World** Oliver Stuenkel,2016-09-22 With the United States superpower status rivalled by a rising China and emerging powers like India and Brazil playing a growing role in international affairs the global balance of power is shifting But what does this mean for the future of the international order Will China dominate the 21st Century Will the so called BRICS prove to be a disruptive force in global affairs Are we headed towards a world marked by frequent strife or will the end of Western dominance make the world more peaceful In this provocative new book Oliver Stuenkel argues that our understanding of global order and predictions about its future are limited because we seek to imagine the post Western world from a parochial Western centric perspective Such a view is increasingly inadequate in a world where a billions of people regard Western rule as a temporary aberration and the rise of Asia as a return to normalcy In reality China and other rising powers that elude the simplistic extremes of either confronting or joining existing order are quietly building a parallel order which complements today s international institutions and increases rising powers autonomy Combining accessibility with expert sensitivity to the complexities of the global shift of power Stuenkel s vision of a post Western world will be core reading for students and scholars of contemporary international affairs as well as anyone interested in the future of global politics A fascinating interpretation of our understanding of politics and global affairs which demonstrates the evolving nature of power today Oliver Stuenkel presents a compelling argument not just about the Rise of the Rest but also the overlooked power and influence of the non Western world Highly engaging

and instructive Dr Shashi Tharoor India's Minister of State for External Affairs 2009-10 Oliver Stuenkel is one of the best new voices in the field of international politics In Post Western World he explores the primary challenges of the global order and critiques the parochial Eurocentric vision which conforms to international power structures This book is essential reading for anyone seeking to understand what a multipolar world order would look like and how it might be effectively realized Celso Amorim Brazil's Minister of External Relations 1993-5 2003-11 and Minister of Defence 2011-15 **On Justice** Mathias Risse, 2020-09-10 Though much attention has been paid to different principles of justice far less has been done reflecting on what the larger concern behind the notion is In this work Mathias Risse proposes that the perennial quest for justice is about ensuring that each individual has an appropriate place in what our uniquely human capacities permit us to build produce and maintain and is appropriately respected for the capacity to hold such a place to begin with Risse begins by investigating the role of political philosophers and exploring how to think about the global context where philosophical inquiry occurs Next he offers a quasi historical narrative about how the notion of distributive justice identifies a genuinely human concern that arises independently of cultural context and has developed into the one we should adopt now Finally he investigates the core terms of this view including stringency moral value ground and duties of justice The Alliance Without Enemy: a Post Cold War History of West Dr. Priyabhishek Sharma, 2019-07-15 This book has the following features When we say West what do we really mean The prologue sets out to explore this question from literary historical strategic philosophical and cultural vantage points In order to understand today's West different shades of the long and arduous transatlantic dialogue starting with Christopher Columbus's accidental discovery of America to the collapse of Soviet Union have been reasonably accounted for The second chapter traces back this evolutionary journey in simple easily understandable way The book has been a fifteen year story of phenomenal change which redefined the very nature of the Western Alliance after the collapse of Soviet Union Changes in the geopolitical map of Europe emergence of European Union re orientation of NATO and the mutual play between the United States and Europe all throughout the decade of 1990s have been woven into the narrative of this book with the aim to understand how the West if at all has changed Three major events of post Cold War history the Balkan Crisis the 9/11 and Iraq War 2003 had played major stimulus in re understanding the West Detailed chronological accounts of these events have been presented before the reader What are the rationale motivations and implications of EU and NATO's enlargements to the East and how has the enlargement impacted the Alliance The epilogue reflects upon what has changed and what continues in today's West across different historical phases How have the schemes of European security in post cold war era been coexisting with the changing face of NATO is yet another theme this book seeks to address **International Law and Boundary Disputes in Africa** Gbenga Oduntan, 2015-06-26 Africa has experienced a number of territorial disputes over land and maritime boundaries due in part to its colonial and post colonial history This book explores the legal political and historical nature of disputes over territory in the African continent

and critiques the content and application of contemporary International law to the resolution of African territorial and border disputes Drawing on central concepts of public international law such as sovereignty and jurisdiction and socio political concepts such as colonialism ethnicity nationality and self determination this book interrogates the intimate connection that peoples and nations have to territory and the severe disputes these may lead to Gbenga Oduntan identifies the major principles of law at play in relation to territorial and boundary disputes and argues that the predominant use of foreign based adjudicatory mechanisms in attempting to deal with African boundary disputes alienates those institutions and mechanisms from African people and can contribute to the recurrence of conflicts and disputes in and among African territories He suggests that the understanding and application of multidisciplinary dispute resolution mechanisms and strategies can allow for a more holistic and effective treatment of boundary disputes As an in depth study into the legal socio political and anthropological mechanisms involved in the understanding of territorial boundaries and a unique synthesis of an African jurisprudence of international boundaries law this book will be of great use and interest to students researchers and practitioners in African and Public International Law International Relations and decision makers in need of better understanding the settlement of disputes over territorial boundaries in both Africa and the wider world **The European**
