Handbook for Achieving Gender Equity Through Education Susan S. Klein, Barbara Richardson, Dolores A. Grayson, Lynn H. Fox, Cheris Kramarae, Diane S. Pollard, Carol Anne Dwyer, 2014-05-22 First published in 1985 the Handbook for Achieving Gender Equity Through Education quickly established itself as the essential reference work concerning gender equity in education This new expanded edition provides a 20 year retrospective of the field one that has the great advantage of documenting U S national data on the gains and losses in the efforts to advance gender equality through policies such as Title IX the landmark federal law prohibiting sex discrimination in education equity programs and research Key features include Expertise Like its predecessor over 200 expert authors and reviewers provide accurate consensus research based information on the nature of gender equity challenges and what is needed to meet them at all levels of education Content Area Focus The analysis of gender equity within specific curriculum areas has been expanded from 6 to 10 chapters including mathematics science and engineering Global Diversity Focus

Global gender equity is addressed in a separate chapter as well as in numerous other chapters. The expanded section on gender equity strategies for diverse populations contains seven chapters on African Americans, Latinos, Asian and Pacific Island Americans, American Indians, gifted students, students with disabilities, and lesbian, gay, bisexual, and transgender students. Action Oriented. All chapters contain practical recommendations for making education activities and outcomes more gender equitable. A final chapter consolidates individual chapter recommendations for educators, policymakers, and researchers to achieve gender equity in and through education. New Material Expanded from 25 to 31 chapters, this new edition includes more emphasis on male gender equity and on sexuality issues, special within population gender equity challenges, race ability and disability, etc. coeducation and single sex education, increased use of rigorous research strategies such as meta analysis, showing more sex similarities and fewer sex differences, and of evaluations of implementation programs. Technology and gender equity is now treated in three chapters: women's and gender studies, communication skills relating to English, bilingual and foreign language learning and history, and implementation of Title IX and other federal and state policies. Since there is so much misleading information about gender equity and education, this Handbook will be essential for anyone who wants accurate, research-based information on controversial gender equity issues: journalists, policy makers, teachers, Title IX coordinators, equity trainers, women's and gender study faculty, students, and parents.

School Recess and Playground Behavior Anthony D. Pellegrini, 1995-01-01. The recess period represents a unique part of the school day. It is one of the few times when children can interact with their peers on their own terms with minimal adult intervention. Consequently, it represents one of the few places in primary and middle schools to observe spontaneous peer interaction. *School Recess and Playground Behavior* offers a programmatic examination of a neglected aspect of children's behavior and informs related literatures such as the educational, social, developmental, and cognitive developmental literatures. Dr. Pellegrini goes well beyond what has been done in the past by systematically pursuing an underlying theme that revolves around the educational significance of recess periods. Due to the relatively new interest in understanding the developmental significance of playground experiences, most past work has been topical in nature. By using a theme, the author has taken the next logical step in bringing coherence to this line of inquiry. The result is a readable and coherent volume that clearly demonstrates the value of recess periods in enhancing children's cognitive and social/emotional development.

Kids Can Be Kids Shelly J. Lane, Anita C. Bundy, 2011-11-11. This groundbreaking text by two noted educators and practitioners with contributions by specialists in their fields presents a comprehensive, evidence-based approach to pediatric therapy. Their work reflects the focus of practice today: facilitating the participation of children and their families in everyday activities in the context of the physical and cultural environments in which they live, go to school, and play. The authors describe the occupational roles of children in an ecocultural context and examine the influence of that context on the participation of a child with physical, emotional, or cognitive limitations.

Recess Battles Anna R. Beresin, 2011-05-27

Winner of the Opie Prize from the Children's Folklore Section of the American Folklore Society As children wrestle with culture through their games recess itself has become a battleground for the control of children's time Based on dozens of interviews and the observation of over a thousand children in a racially integrated working class public school *Recess Battles* is a moving reflection of urban childhood at the turn of the millennium The book debunks myths about recess violence and challenges the notion that schoolyard play is a waste of time The author videotaped and recorded children of the Mill School in Philadelphia from 1991 to 2004 and asked them to offer comments as they watched themselves at play These sessions in *Recess Battles* raise questions about adult power and the changing frames of class race ethnicity and gender The grown ups' clear misunderstanding of the complexity of children's play is contrasted with the richness of the children's folk traditions *Recess Battles* is an ethnographic study of lighthearted games a celebratory presentation of children's folklore and its conflicts and a philosophical text concerning the ironies of everyday childhood Rooted in video micro ethnography and the traditions of theorists such as Bourdieu Willis and Bateson *Recess Battles* is written for a lay audience with extensive academic footnotes International scholar Dr Brian Sutton Smith contributes a foreword and the children themselves illustrate the text with black and white paintings
