The Politics of the Asian Economic Crisis T. J. Pempel, 2018-09-05 In the summer of 1997 a tidal wave of economic problems swept across Asia Currencies plummeted banks failed GNP stagnated unemployment soared and exports stalled In short the vaunted Asian Economic Miracle became

the Asian Economic Crisis with serious repercussions for nations and markets around the world While the headlines are still fresh a group of experts on the region presents the first account to focus on the political causes and implications of the crisis The events of 1997-98 involved not just property values financial flows portfolio makeup and debt ratios they argue but also the power relationships that shaped those economic indicators As they examine the domestic regional and international politics that underlay the economic collapse the authors analyze the reasons why the crisis affected the nations of Asia in radically different ways The authors also consider whether the crisis indicates a radical change in Asia's economic future

Industrial Development in Pre-Communist China Sybil B. G. Eysenck, 2017-07-05 The Chinese economy has been the subject of substantial research in recent years in the United States and abroad Much has been made of significant strides toward industrial development since the Communist takeover But it is impossible to understand what has been achieved unless one measures these gains against economic events in the pre-Communist period This book offers a record of China's industrialization with its comprehensive statistical analysis of the industrial growth of pre-Communist China Industrial Development in Pre-Communist China covers the period from 1912 to 1949 and deals with all of China irrespective of changes in political boundaries For purposes of this study industrial production includes mining metallurgy manufacturing and fuel and power the construction industry is not included Chang finds that the average annual rate of growth of the modern industrial sector during the pre-World War I period was about 8 or 9 percent including Manchuria During the period from 1928 to 1936 under the Nanking Government political unification was achieved Peace and order were maintained and the necessary foundations for economic transformation in the post-World War II period were established At the time of its original publication in 1969 Chang's work represented an important first step toward a comprehensive quantitative study of the history of China's industrialization and a benchmark against which the Communist achievement can be measured this work forces reconsideration of widely held views on China's economic and industrial development An important reference for the study of Chinese history and economics especially for the Republican period Chang's work is of continuing value to all Sinologists and to specialists in economic development and economic history **How Asia Works** Joe Studwell, 2013-07-02

A good read for anyone who wants to understand what actually determines whether a developing economy will succeed Bill Gates Top 5 Books of the Year An Economist Best Book of the Year from a reporter who has spent two decades in the region and who the Financial Times said should be named chief myth buster for Asian business In How Asia Works Joe Studwell distills his extensive research into the economies of nine countries Japan South Korea Taiwan Indonesia Malaysia Thailand the Philippines Vietnam and China into an accessible readable narrative that debunks Western misconceptions shows what really happened in Asia and why and for once makes clear why some countries have boomed while others have languished Studwell's in-depth analysis focuses on three main areas land policy manufacturing and finance Land reform has been essential to the success of Asian economies giving a kick start to development by utilizing a large workforce and providing

capital for growth With manufacturing industrial development alone is not sufficient Studwell argues Instead countries need export discipline a government that forces companies to compete on the global scale And in finance effective regulation is essential for fostering and sustaining growth To explore all of these subjects Studwell journeys far and wide drawing on fascinating examples from a Philippine sugar baron s stifling of reform to the explosive growth at a Korean steel mill Provocative How Asia Works is a striking and enlightening book A lively mix of scholarship reporting and polemic The Economist

The Pacific in the Age of Early Industrialization Kenneth Pomeranz, 2017-05-15 The essays selected for this volume show how the Pacific rapidly became part of an industrializing world Its raw materials notably rubber and copper were critical some of its handicraft industries were devastated by mechanized competition others survived and adapted contributing to distinctive patterns of industrialization that made Japan a new center of power and also laid the groundwork for later growth in Taiwan Korea and coastal China The Pacific coast of the Americas was also first drawn into an industrial world largely as an exporter of raw materials but North and South diverged rapidly portending futures even more different than those of Northeast and Southeast Asia By the 1930s when the uneven effects of industrialization would have much to do with plunging the Pacific into war one can already glimpse in outline the structural bases for many of the region s contemporary characteristics All this is set in context in the important introduction by Kenneth Pomeranz
