**Educational Innovation in Economics and Business II** Dirk T. Tempelaar, Finn Wiedersheim-Paul, Elving Gunnarsson, 2012-12-06 This volume consists of the revised versions I of a selection of papers of the second EDINEB conference held in Uppsala from 17 19 August 1995 As with the first edition the conference and these proceedings are rooted in the participant s involvement with EDucational INnovation in Economics and Business The thematic focus is quality audit quality assessment and quality improvement all of them collected in the theme In Search of Quality For the first EDINEB conference which took place in Maastricht December 1993 Problem Based Learning was chosen as leading theme The introduction of problem based learning in the curriculum of any faculty is to be regarded as a major innovation in the educational system In contrast the dedication to the search of quality in education resulted in a large variety of case studies and theoretical contributions on educational innovations aiming at increasing the quality of teaching and learning This contrast between the one major step and the many small steps has been the decisive factor for the editors to compose these proceedings as a kind of allegory of Robert M Pirsig s famous novel Zen and the art of Motorcycle Maintenance an Inquiry into Values ZAMM Of course on top of the very obvious reason that the conference had been saddled with a theme that is identical to the title that many critics probably those who aren t so fond of motorcycling used to rename ZAMM

**Transferred Illusions** Marilyn Deegan, Kathryn Sutherland, 2016-02-24 This is a study of the forms and institutions of print newspapers books scholarly editions publishing libraries as they relate to and are changed by emergent digital forms and institutions In the early 1990s hypertext was briefly hailed as a liberating writing tool for non linear creation Fast forward no more than a decade and we are reading old books from screens It is however the newspaper for around two hundred years print s most powerful mass vehicle whose economy persuasively shapes its electronic remediation through huge digitization initiatives dominated by a handful of centralizing service providers funded and wrapped round by online advertising The error is to assume a culture of total replacement The Internet is just another information space sharing characteristics that have always defined such spaces wonderfully effective and unstable loaded with valuable resources and misinformation that is both good and bad This is why it is important that writers critics publishers and librarians in modern parlance the knowledge providers be critically engaged in shaping and regulating cyberspace and not merely the passive instruments or unreflecting users of the digital tools in our hands
