Bechtol, 2025-04-01 A Death of the World offers a phenomenological description of what happens to the world for those who survive the death of someone Bringing Jacques Derrida's works into conversation with the philosophies of Martin Heidegger Emmanuel Levinas Jean Luc Marion Maurice Blanchot and Claude Romano the poetry and literature of Paul Celan W H Auden Emily Dickinson Ovid and Jonathan Safran Foer and psychological works concerning trauma mourning epigenetics and memory author Harris B Bechtol provides interdisciplinary language for understanding the death of the other as an event He argues that such death must be understood as an event because this death is more than just the loss of the other who has died insofar as the meaning of the world to and with this other is also lost Such loss manifests itself through the transformations of both the spaces in which meaning takes place and the lived time of a survivor's world These transformations of the world culminate in his account of workless mourning which establishes the contours of the life after these deaths of the world      Encyclopedia of Death and Dying Glennys Howarth, Oliver Leaman, 2003-12-16 In recent years there has been a massive upsurge in academic professional and lay interest in mortality This is reflected in academic and professional literature in the popular media and in the proliferation of professional roles and training courses associated with aspects of death and dying Until now the majority of reference material on death and dying has been designed for particular disciplinary audiences and has addressed only specific academic or professional concerns There has been an urgent need for an authoritative but accessible reference work reflecting the multidisciplinary nature of the field This Encyclopedia answers that need The Encyclopedia of Death and Dying consolidates and contextualizes the disparate research that has been carried out to date The phenomena of death and dying and its related concepts are explored and explained in depth from the approaches of varied disciplines and related professions in the arts social sciences humanities medicine and the sciences In addition to scholars and students in the field from anthropologists and sociologists to art and social historians the Encyclopedia will be of interest to other professionals and practitioners whose work brings them into contact with dying dead and bereaved people It will be welcomed as the definitive death and dying reference source and an essential tool for teaching research and independent study      **Economic Lives** Viviana A. Zelizer, 2010-09-27 Revealing the human side of economic life Over the past three decades economic sociology has been revealing how culture shapes economic life even while economic facts affect social relationships This work has transformed the field into a flourishing and increasingly influential discipline No one has played a greater role in this development than Viviana Zelizer one of the world's leading sociologists Economic Lives synthesizes and extends her most important work to date demonstrating the full breadth and range of her field defining contributions in a single volume for the first time Economic Lives shows how shared cultural understandings and interpersonal relations shape everyday economic activities Far from being simple responses to narrow individual incentives and preferences economic actions emerge persist and are transformed by our relations to others Distilling three decades of research the book offers a

distinctive vision of economic activity that brings out the hidden meanings and social actions behind the supposedly impersonal worlds of production consumption and asset transfer Economic Lives ranges broadly from life insurance marketing corporate ethics household budgets and migrant remittances to caring labor workplace romance baby markets and payments for sex These examples demonstrate an alternative approach to explaining how we manage economic activity as well as a different way of understanding why conventional economic theory has proved incapable of predicting or responding to recent economic crises Providing an important perspective on the recent past and possible futures of a growing field Economic Lives promises to be widely read and discussed
