Indifference to patients needs and suffering may be injurious to nurses health all of whom have a conscience This must be respected protected and used as a guide to truly care for the patient s benefit regardless of laws and professional pathways which may prove harmful to many vulnerable patients The questioning nurse on ethical issues and dilemmas needs consideration respect and support when attempting to act as the patient advocate Managers at all levels need to be aware of the concerns of front line nurses and to be mindful that recruitment and retention are both equally important factors for the quality of patient care and nurse morale and work satisfaction The NHS was a wonderful creation which is only as good as its staff at all levels Its managers and government ministers must remember that the more authority invested in them the more the accountability and transparency expected by both health professionals their patients and the public
