**The Cambridge Introduction to American Literary Realism** Phillip J. Barrish, 2011-10-06 Between the Civil War and the First World War realism was the most prominent form of American fiction. Realist writers of the period include some of America's greatest such as Henry James, Edith Wharton, and Mark Twain, but also many lesser-known writers whose work still speaks to us today. For instance, Charles Chesnutt, Zitkala-ah, and Sarah Orne Jewett. Emphasizing realism's historical context, this introduction traces the genre's relationship with powerful, often violent social conflicts involving race, gender, class, and national origin. It also examines how the realist style was created, the necessarily ambiguous relationship between realism produced on the page and reality outside the book, and the different, often contradictory forms realism took in literary works by different authors. The most accessible yet sophisticated account of American literary realism currently available, this volume will be of great value to students, teachers, and readers of the American novel.

**The Invention of Native**

**American Literature** Robert Dale Parker, 2018-08-06 In an original, widely researched, and accessibly written book, Robert Dale Parker helps redefine the study of Native American literature by focusing on issues of gender and literary form. Among the writers Parker highlights are Thomas King, John Joseph Mathews, D. Arcy McNickle, Leslie Marmon Silko, and Ray A. Young Bear, some of whom have previously received little scholarly attention. Parker proposes a new history of Native American literature by reinterpreting its concerns with poetry, orality, and Indian notions of authority. He also addresses representations of Indian masculinity, uncovering Native literature's recurring fascination with restless young men who have nothing to do or who suspect or feel pressured to believe that they have nothing to do. *The Invention of Native American Literature* reads Native writing through a wide variety of shifting historical contexts. In its commitment to historicizing Native writing and identity, Parker's work parallels developments in scholarship on other minority literatures and is sure to provoke controversy.

**The Biocultural Basis of Health** Lorna G. Moore, 1987      [Research in Education](#), 1974      **Indigenous Research of Land, Self, and Spirit** Throne, Robin, 2020-12-04 Indigenous cultures meticulously protect and preserve their traditions. Those traditions often have deep connections to the homelands of indigenous peoples, thus forming strong relationships between culture, land, and communities. Autoethnography can help shed light on the nature and complexity of these relationships. *Indigenous Research of Land, Self, and Spirit* is a collection of innovative research that focuses on the ties between indigenous cultures and the constructs of land, self, and agency. It also covers critical intersectional feminist and heuristic inquiries across a variety of indigenous peoples. Highlighting a broad range of topics, including environmental studies, land rights, and storytelling, this book is ideally designed for policymakers, academicians, students, and researchers in the fields of sociology, diversity, anthropology, environmentalism, and history.
