## **The Emergent Self:**

The Emergent Self William Hasker, 2001-11-29 In The Emergent Self William Hasker joins one of the most heated debates in analytic philosophy that over the nature of mind His provocative and clearly written book challenges physicalist views of human mental functioning and advances the concept of mind as an emergent individual Hasker begins by mounting a compelling critique of the dominant paradigm in philosophy of mind showing that contemporary forms of materialism are seriously deficient in confronting crucial aspects of experience He further holds that popular attempts to explain the workings of mind in terms of mechanistic physics cannot succeed He then criticizes the two versions of substance dualism most widely accepted today Cartesian and Thomistic and presents his own theory of emergent dualism Unlike traditional substance dualisms Hasker's theory recognizes the critical role of the brain and nervous system for mental processes It also avoids the mechanistic reductionism characteristic of recent materialism Hasker concludes by addressing the topic of survival following bodily death After demonstrating the failure of materialist views to offer a plausible and coherent account of that possibility he considers the implications of emergentism for notions of resurrection and the afterlife The Emergent Self Adrian L. Van Kaam, Engelbert Johannes Van Croonenburg, Susan Annette Muto, 1968 **The Emergent Self** William Hasker, 2001 The Emergent Self Peter Philippon, 2018-03-26 This book tracks a particular understanding of self philosophically from research evidence and in its implications for psychotherapy At each step the author includes first the theory he is working from then the clinical implications of the theory followed by some links to the philosophical outlook inherent in the theory and finally a more extended case example It takes the view that the continuing self is partly an illusion partly a construct and that we in fact have to work to stay the same in the face of all the different possibilities the world offers us The author believes that we do this for two reasons First of all continuity allows deeper contact friendships loving relationships with partners and families Secondly and balancing this the predictable is less anxiety producing and that we avoid this existential anxiety by acting in a stereotyped way and avoiding some of the depths of contact The Emergent Self Adrian Van Kaam, Susan Muto, Bert Van Croonenburg, 1985-01 **The emergent self, book II ; self and others** Adrian L. Van Kaam, 1968 **The Emergent Self, Book I ; the Self** Adrian L. Van Kaam, Engelbert Johannes Van Croonenburg, Susan Muto, 1968 *The emergent self, book IV ; self and reality* Adrian L. Van Kaam, 1968 *The Emergent Method: A Modern Science Approach to the Phenomenology and Ethics of Emergentism* Michael E. Kean, 2019-02-06 Emergentism New form of Emergentism Ethics Philosophy of Mind Popular Science Self Improvement Phenomenology Existentialism Emergentism is the study and tentative explanation of how order arises in everything from quantum fluctuations to human consciousness The aim of The Emergent Method is to use the new philosophy of Emergentism and the findings of modern science to challenge the way we think and thereby help fulfil our highest purposes The Ludic Self in Seventeenth-Century English Literature Anna K. Nardo, 1991-01-01 This book argues that play offered Hamlet John Donne

George Herbert Andrew Marvell Robert Burton and Sir Thomas Browne a way to live within the contradictions and conflicts of late Renaissance life by providing a new stance for the self Grounding its argument in recent theories of play and in a historical analysis that sees the seventeenth century as a point of crisis in the formation of the western self the author demonstrates how play helped mediate this crisis and how central texts of the period enact this mediation **Jungian**

**Psychotherapy and Contemporary Infant Research** Mario Jacoby, 2003-09-02 Infant research observations and hypotheses have raised serious questions about previous mainstream psychoanalytic theories of earliest childhood development In Jungian Psychotherapy and Contemporary Infant Research Mario Jacoby looks at how these observations are relevant to psychotherapeutic and Jungian analytical practice Using recent findings in infant research along with practical examples from therapeutic practice he shows how early emotional exchange processes though becoming superimposed in adult life by rational control and various defenses remain operative and become reactivated in situations of intimacy Jungian Psychotherapy and Contemporary Infant Research will be of interest to both professionals and students involved in analytical psychology and psychotherapy *The Reciprocating Self* Jack O. Balswick, Pamela Ebstyne King, Kevin S. Reimer, 2005-04-28

On the basis of a theologically grounded understanding of the nature of persons and the self Jack O Balswick Pamela Ebstyne King and Kevin S Reimer present a model of human development that ranges across all of life s stages infancy childhood adolescence young adulthood middle adulthood elder adulthood They do this by drawing on a biblical model of relationality where the created goal or purpose of human development is to become a reciprocating self fully and securely related to others and to God Along the way they provide a context for understanding individual development issues concerns tensions worries or crises encountered by the self in the context of change Awareness of these issues is most pronounced at developmental transitional points learning to talk and walk beginning to eat unassisted going to school developing secondary sexual physical features leaving home obtaining full time employment becoming engaged and then married having a child for the first time parenting an adolescent watching children move away from home retiring experiencing decline in physical and mental health and finally facing imminent death Throughout Balswick King and Reimer contend that since God has created human beings for relationship to be a self in reciprocating relationships is of major importance in negotiating these developmental issues Critically engaging social science research and theory *The Reciprocating Self* offers an integrated approach that provides insight helpful to college and seminary students as well as those serving in the helping professions Those preparing for or currently engaged in Christian ministry will be especially rewarded by the in depth discussion of the implications for moral and faith development nurtured in the context of the life of the church Adolescence Mark

McConville, 2013-06-17 Many therapists can attest to the fact that adolescents can be difficult and frustrating clients problems are seldom well defined clearly delineated symptoms are more exception than the rule and troubling situations often involve the entire family Gestalt therapist Mark McConville draws on his more than twenty years of professional experience to offer

clinicians an effective model for understanding and treating adolescents He outlines the Developmental Tasks Model which describes adolescents struggles temporary insanity and ultimately triumph of development He clearly demonstrates that the Gestalt therapeutic model bridges the theoretical and clinical gap and offers an indepth exploration of the various aspects of clinical work Adolescence offers valuable nuts and bolts advice on initiating therapy with adolescents who are not yet ready to do the self reflective exploratory work In addition the book examines the therapeutic method of engaging and cultivating the adolescent s emerging inner world With perception and sensitivity McConville explains how the clinician can guide the adolescent in the very personal and subjective process of birthing and existential self The book details the process of the creative reorganization of the self during adolescence and explores the changes that take place in the adolescent s relationships with peers parents and others in the adult world The author also tracks the interplay of intrapsychic and interpersonal boundary development and shows how this interplay manifests itself in relationships and evolves from early through late adolescence The Gestalt model of therapy allows the clinician to make sense of the confusion of the adolescent world and map out the multiple possibilities of clinical interventions

Book Symposium on The Emergent Self by William Hasker William Hasker,2000      *On the Lyricism of the Mind* Dana Amir,2015-12-14 On the Lyricism of the Mind

*Psychoanalysis and Literature* explores the lyrical dimension or the lyricism of the psychic space It is not presented as an artistic disposition but rather as a universal psychic quality which enables the recovery and recuperation of the self The specific nature of human lyricism is defined as the interaction as well as the integration of two psychic modes of experience originally defined by the psychoanalyst Wilfred Bion The emergent and the continuous principles of the self Dana Amir elaborates Bion s general notion of an interaction between the emergent and the continuous principles of the self offering a discussion of the specific function of each principle and of the significance of the various types of interaction between them as the basis for mental health or pathology The author applies these theoretical notions in her analytic work by means of literary illustrations showing how the lyrical dimension may be used to teach psychoanalytic readings of literature and explore the connection between psychoanalytic and literary languages *On the Lyricism of the Mind* presents a new psychoanalytic understanding of the capacity to heal to grieve to love and to know using literary illustrations but also literary language in order to extract a new formulation out of the classic psychoanalytic language of Winnicott and Bion This book will appear to a wide audience to include psychoanalysts psychotherapists and art therapists It is also extremely relevant to literary scholars including students of literary criticism philosophers of language and philosophers of mind novelists poets and to the wide educated readership in general      **Self and Spirit in the Therapeutic Relationship** Kenneth

Bragan,2006-04-07 Centered on an understanding of the self *Self and Spirit in the Therapeutic Relationship* acknowledges the spiritual component in therapy and healing but places it firmly withing a psychological framework Drawing on a wide range of reading and personal experience Kenneth Bragan offers a valuable introduction to ideas about the self for those just

beginning on their own journey as a psychotherapist of counsellor He shares with the reader how Kohut's theories about the self have illuminated his clinical work and explains simply what these ideas are He shows how support for these ideas can be found in the work of Jung and also in works of literature poetry and philosophy where the findings of self psychology are anticipated This book addresses a question which is becoming increasingly urgent for many people must we simply resign ourselves to the spiritual poverty of these times

**The Creation of Self** Joshua R. Farris, 2023-06-30 Situated in broader science and religion discussions The Creation of Self is the first book length defense of a creationist view of persons as souls This book therefore serves as both a novel argument for God's creation of selves and as a critique of contemporary materialist and emergent self alternatives critically examining naturalistic views that argue for a regular law like process behind the emergence of personhood Author Joshua Farris argues on the assumption that persons are fundamentally unique individuals that look more like singularities of nature rather than material products grounded in regularity or predictability from past events By extending the basic intuition that we are unique and mysterious individuals Farris develops a sophisticated analytic defense of the soul that requires a sufficient explanation not found in nature but made by a Creator who has intentions and the power to bring about novel entities in the world The Creation of Self gives philosophers theologians and the lay intellectual grounding for thinking about persons as religious beings It aims to help readers understand why recent scientifically motivated objections to the soul are unsuccessful and why we must consider a religious conception of persons as souls as a common starting point

**On Multiple Selves** David Lester, 2017-09-08 On Multiple Selves refutes the idea that a human being has a single unified self Instead David Lester argues the mind is made up of multiple selves and this is a normal psychological phenomenon Lester expands on his earlier work on the phenomenon illuminating how a multiple self theory of the mind is critically necessary to understanding human behavior Most of us are aware that we have multiple selves We adopt different facade selves depending on whom we are with Lester argues that contrary to the popular psychological term false self these presentations of self are all part of us not false they simply cover layers of identity He asserts that at any given moment in time one or another of our subselves is in control and determines how we think and act Lester covers situations that may encourage the development of multiple selves ranging from post traumatic stress resulting from combat to bilinguals who speak two or more languages fluently Lester's views of multiple selves will resonate with readers individual subjective experience On Multiple Selves is an essential read for psychologists philosophers and social scientists and will fascinate general readers as well
