**The End of an Illusion** Jean De Kervasdoue, John R. Kimberly, Victor G. Rodwin, 2023-04-28 The End of an Illusion The Future of Health Policy in Western Industrialized Nations critically examines the evolving challenges in health policy focusing on the unsustainable nature of current systems in the face of rising medical costs and limited resources The book argues that while health has long been regarded as a fundamental right the growing burden of healthcare expenditures in Western countries challenges the idea that the welfare state can continue to provide unlimited access to services for all As healthcare costs outpace economic growth the illusion of abundant resources fades forcing difficult decisions about the allocation of medical services Central themes include the growing role of the state in healthcare the implications of new medical technologies the ethical dilemmas of healthcare rationing and the shift from idealism to realism in health policy The book aims to frame the debate on the future of health care identifying key issues that will shape policy discussions in the 1980s and beyond The book is structured in four parts Part 1 reflects on the historical context of state involvement in health systems and its impact on the current state of affairs It critiques the notion that healthcare can remain a purely private matter highlighting how economic retrenchment will push for alternative conceptions of medicine Part 2 explores various perspectives on the role of the state in health policy analyzing historical debates on disease prevention the evolution of medical technology and the ethics of healthcare rationing Part 3 provides case studies from France Britain the United States and Quebec to offer insights into the practical realities and potential solutions in these nations health systems Finally Part 4 synthesizes the findings from the case studies speculating on the future direction of health policy The book aims to contribute to a more informed realistic discourse on health policy by addressing the complex interplay between economics technology ethics and social values This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1984

**Doctors and the State** David Wilsford,1991 All advanced health care systems face severe difficulties in financing the

delivery of today's sophisticated medical care. In this study David Wilsford compares the health systems in France and the United States to demonstrate that some political systems are considerably more effective at controlling the cost of care than others. He argues that two variables, the autonomy of the state and the strength and cohesiveness of organized medicine, explain this variance. In France Wilsford shows the state is strong in the health policy domain while organized medicine is weak and divided. Consequently physicians exercise little influence over health care policymaking. By contrast in the United States the state is weak, the employers and insurers who pay for health care are fragmented and organized medicine is strong and well financed. As a result medical professionals are able to exert a greater influence on policymaking, thus making cost control more difficult. Wilsford extends his comparison to health care systems in the United Kingdom, West Germany, Italy, Canada, and Japan. Whether the private or public sector finances health care, he discovers there is now an important trend in all of the advanced industrial countries toward controlling escalating costs by curbing both the medical profession's clinical autonomy and physicians' incomes.

**Rights to Health Care** Thomas J. Bole III, W.B. Bondeson, 2007-08-23 Human existence is marked by pain, limitation, disability, disease, suffering, and death. These facts of life and of death give ample grounds for characterizing much of the human condition as unfortunate. A core philosophical question is whether the circumstances are in addition unfair or unjust in the sense of justifying claims on the resources, time, and abilities of others. The temptation to use the languages of rights and of justice is understandable. Faced with pain, disability, and death, it seems natural to complain that someone should do something; this is unfair, or it just isn't right that people should suffer this way. Yet it is one thing to complain about the unfairness of another's actions and another thing to complain about the unfairness of biological or physical processes. If no one is to blame for one's illness, disability, or death, in what sense are one's unfortunate circumstances unfair or unjust? How can claims against others for aid and support arise if no one has caused the unfortunate state of affairs? To justify the languages of fights to health care or justice in health care requires showing why particular unfortunate circumstances are also unfair in the sense of demanding the labors of others. It requires understanding as well the limits of property claims. After all, claims regarding justice in health care or about fights to health care limit the property rights of those whose resources will be used to provide care.

The Corporate Transformation of Health Care Warren Salmon, 2020-11-25 The author explores how the corporate transformation of hospitals, HMOs, and the insurance and pharmaceutical industries has resulted in reduction in services, dangerous cost cutting, poor regulation, and corrupt research. He sheds light on the political lobbying and media manipulation that keeps the present system in place. Exposing the shortcomings of reform proposals that do little to alter the status quo, he makes a case for a workable single-payer system. This is an essential read for today's practitioners, policy makers, healthcare analysts, and providers, and all those concerned with the precarious state of America's under- and uninsured.
