The Long Twentieth Century Giovanni Arrighi, 1994 Winner of the American Sociological Association PEWS Award 1995 for Distinguished Scholarship The Long Twentieth Century traces the epochal shifts in the relationship between capital accumulation and state formation over a 700 year period Giovanni Arrighi masterfully synthesizes social theory comparative history and historical narrative in this account of the structures and agencies which have shaped the course of world history over the millennium Borrowing from Braudel Arrighi argues that the history of capitalism has unfolded as a succession of long centuries ages during which a hegemonic power deploying a novel combination of economic and political networks secured control over an expanding world economic space The modest beginnings rise and violent unraveling of the links forged between capital state power and geopolitics by hegemonic classes and states are explored with dramatic intensity From this perspective Arrighi explains the changing fortunes of Florentine Venetian Genoese Dutch English and finally American capitalism The book concludes with an examination of the forces which have shaped and are now poised to undermine America's world power

Recent developments have made obsolete the division of the globe into three worlds of capitalist state socialist and underdeveloped countries This book traces the interconnectedness of the disorganisation of capitalism in the industrialised west the transformation of former state socialist societies and the divergent fortunes of third world countries It argues that comparative sociology continues to have relevance in the age of globalisation and provides a framework within which these developments can be placed in their proper perspective **Economies of Signs and Space** Scott Lash,John Urry,1993-12-09

This is a novel account of social change that supplants conventional understandings of society and presents a sociology that takes as its main unit of analysis flows through time and across space Developing a comparative analysis of the UK and US the new Germany and Japan Lash and Urry show how restructuration after organized capitalism has its basis in increasingly reflexive social actors and organizations The consequence is not only the much vaunted postmodern condition but also a growth in reflexivity In exploring this new reflexive world the authors argue that today s economies are increasingly ones of signs information symbols images desire and of space where both signs and social subjects refugees financiers tourists and fl ci aneurs are mobile over ever greater distances at ever greater speeds **Class**

Manuel A. Vasquez,1998 This 1997 study explores one of the most dramatic current interactions between religion and politics the development of progressive Catholicism in Latin America In particular it examines economic social and religious obstacles to progressive theology in Brazil This popular church built a utopian vision of social emancipation drawing on Catholic social thought humanistic Marxism and existentialism It was a major democratizing force as Brazil emerged from dictatorship in the late 1970s In the 1980s however the popular appeal of progressive Catholicism came under threat Focusing on a Catholic community near Rio de Janeiro Manuel A V squez s incisive study shows how economic and political
