The Head Of A Banjo:

The New England Life of Cartoonist Bob Montana Carol Lee Anderson,2013-10-01 The true story of the artist whose high school years in Massachusetts inspired Riverdale Bob Montana creator of the Archie comic strip and one of America s greatest cartoonists always considered himself a true New Englander Filled with the antics of the rambunctious teenagers of the fictional Riverdale High Montana s comic strip was based on his high school years in Haverhill Massachusetts At the height of his career he lived as a beloved resident in the quaint picturesque town of Meredith in the heart of the Lakes Region of New Hampshire For nearly thirty years he was considered an extraordinarily respected contributor to the community Drawing from the Yankee humor he saw around him Montana deftly included local scenes events and characters in the puns and pranks of Archie s comic strip life Join Lakes Region historian Carol Lee Anderson as she takes readers beyond the comic strip and tells the story of the remarkable New England life of Bob Montana Melody ,1925 *Musical Merchandise Combined for the Duration [with] The Music Trade Review* ,1925 *The Science of String Instruments* Thomas D. Rossing,2010-12-15 Thomas D Rossing String instruments are found in almost all musical cultures Bowed string instruments form the backbone of symphony orchestras and they are used widely as solo inst ments and in chamber music as well Guitars are used universally in pop music as well as in classical music The piano is probably the most versatile of all musical inst ments used widely not only in ensemble with other musical instruments but also as a solo instrument and to accompany solo instruments and the human voice In this book various authors will discuss the science of plucked bowed and hammered string instruments as well as their electronic counterparts We have tried to tell the fascinating story of scienti c research with a minimum of mathematics to maximize the usefulness of the book to performers and instrument builders as well as to students and researchers in musical acoustics Sometimes however it is dif cult to translate ideas from the exact mathematical language of science into words alone so we include some basic mathematical equations to express these ideas It is impossible to discuss all families of string instruments Some instruments have been researched much more than others Hopefully the discussions in this book will help to encourage further scienti c research by both musicians and scientists alike
