James P. Hogan,2004 Galileo may have been forced to deny that the Earth moves around the Sun but in the end science

triumphed Nowadays science fearlessly pursues truth shining the pure light of reason on the mysteries of the universe Or does it As bestselling author James P Hogan demonstrates in this fact filled and thoroughly documented study science has its own roster of hidebound pronouncements which are Not to be Questioned And those who question them may face a modern day Inquisition As the author puts it This book is not concerned with cranks or simple die hards who are entitled to their foibles and come as part of life s pattern Rather it looks at instances of present day orthodoxies tenaciously defending beliefs in the face of what would appear to be verified fact and plain logic or doggedly closing eyes and minds to ideas whose time has surely come In short where scientific authority seems to be functioning more in the role of religion protecting doctrine and putting down heresy than championing the spirit of the free inquiry that science should be Among the dogma laden topics he examines are Darwinism global warming the big bang problems with relativity radon and radiation holes in the ozone layer the cause of AIDS and the controversy over Velikovsky Hogan explains the basics of each controversy with his clear informative style in a book that will be fascinating for anyone with an interest in the frontiers of modern science Book jacket
