[The Book of the High Romance](#) Michael Williams, 1924 [The High License Court](#) Frank Dumont, 1902 [The High King of Montival](#) S. M. Stirling, 2010-09-07 S. M. Stirling provides another fabulous postapocalyptic thriller to his Change saga. Alternative Worlds Rudi Mackenzie traveled to Nantucket where he found and took up the Sword of the Lady and with it his destiny. His return journey to the area known as Montival in the Pacific Northwest is a treacherous one since he and his companions must cross three thousand miles making both allies and adversaries along the way. When he reaches his destination, he will face the legions of the Prophet. To achieve victory, Rudi must assemble a coalition of those who were his enemies just months before, then forge them into an army that will rescue his homeland and tear the heart out of the Church Universal and Triumphant once and for all. Only then will Rudi be able to come to terms with how the Sword has changed him as well as the world and assume his place as Artos, High King of Montival. **Walking the High Desert** Ellen Waterston, 2020-06-22 Former high desert rancher Ellen Waterston writes of a wild, essentially roadless, starkly beautiful part of the American West. Following the recently created 750-mile Oregon Desert Trail, she embarks on a creative and inquisitive exploration, introducing readers to a trusting, naïve, earnest, stubbly, grumpy old man of a desert that is grappling with issues at the forefront of national, if not global, concern: public land use, grazing rights for livestock, protection of sacred Indigenous ground water rights, and protection of habitat for endangered species. Blending travel writing with memoir and history, Waterston profiles a wide range of people who call the high desert home and offers fresh perspectives on nationally reported regional conflicts such as the Malheur Wildlife Refuge occupation. *Walking the High Desert* invites readers wherever they may be to consider their own beliefs, identities, and surroundings through the optic of the high desert of southeastern Oregon. **Avatar: The High Ground Omnibus** James Cameron, Sherri L. precautionary principle The unique feature which sets this book apart from the other similar publications is that it is firmly entrenched in general international law i e deals in a very erudite manner with the issues of fragmentation and harmonisation of international law in the context of conservation This book will appeal not only to the experts on the law of the sea but also to general international lawyers \_ Malgosia Fitzmaurice Queen Mary University of London UK This is an excellent book which has taken apart a very complicated part of international law and reassembled it in a manner which is up to date accessible insightful and coherent In doing so this work plugs a gap in the scholarship in this area for which the author is to be truly commended It is an essential addition for all practitioners scholars and students who work or study in one of the foremost environmental challenges of the 21st century conservation on the high seas \_ Alexander Gillespie University of Waikato New Zealand The conservation of living marine resources with diverse characteristics and life styles has become an international concern Borg s book provides an examination of the regulatory and legal implications of marine conservation The analysis takes account of UNCLOS Treaties and the UNCED 1992 that aid a more holistic response by States towards conservation the marine environment and socio economic needs Despite shortcomings and failures there have been success stories that highlight the potential of effective interaction between fisheries law and environmental law The book addresses the legal aspects of international regimes aimed at setting conservation obligations compliance and enforcement This is a path breaking work that shows how international law can diversify itself into different legal streams to ensure flexibility and a degree of adaptation to the different interests of the States involved \_ John McEldowney University of Warwick UK This timely book discusses various international norms that qualify the right which all states have to access and exploit living resources in marine areas beyond national jurisdiction in order to promote the conservation of such species An intricate body of norms has accumulated over the last few decades consisting of prior and subsequent rules addressing the same issues as well as a number of specialized rules that supplement more general ones However this process has also exposed the fragmentation of the relevant international regimes with evolving and diverse interpretations of the same legal terms fine tuning or qualifying earlier treaties Uncertainty prevails as to how these norms interrelate with each other The book assesses to what extent the harmonization of these international regimes is possible It highlights current trends and developments which aim at better coherence and discusses legal techniques that could serve to harmonize both the objectives of these international norms and their scope of applicability The author also demonstrates that in some cases gaps and conflicts in the existing legal framework cannot be simply interpreted away but require the further development of international law in order to be resolved properly This unique book will appeal to academics and students in international law especially those researching marine conservation and the applicable legal framework It will be equally useful to organizations both public and private with an interest in marine conservation beyond national jurisdiction Environmental groups and policy makers in maritime affairs environmental issues and fisheries management will also find much to interest
