The Atomic Bomb The Great Decision:

The Atomic Bomb Paul R. Baker, 1976 The Great Decision: the Secret History of the Atomic Bomb Michael Amrine, 1959 An informative account of some of the events surrounding President Truman's decision to use the atom bomb against the Japanese **The Decision to Use the Atomic Bomb** Gar Alperovitz, 1996-08-06 With a new preface by the author Controversial in nature this book demonstrates that the United States did not need to use the atomic bomb against Japan Alperovitz criticizes one of the most hotly debated precursory events to the Cold War an event that was largely responsible for the evolution of post World War II American politics and culture Bulletin of the Atomic Scientists, 1959-05 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin's iconic Doomsday Clock stimulates solutions for a safer world The Secret of the Manhattan Project Doreen Gonzales, 2012-01-01 Describes the events and people surrounding the creation of the atomic bomb and examines the effects of its use during World War II The Great Decision Michael Amrine, 1959 **Reminiscences of Los Alamos 1943-1945** Lawrence Badash, J.O. Hirschfelder, H.P. Broida, 2012-12-06 Although the World War II efforts to develop nuclear weapons have inspired a very large literature it struck us as noteworthy that virtually nothing existed in the form of firsthand accounts Now It Can Be Told by General Leslie Groves the Manhattan Project's military commander is probably the most prominent exception but the scientists themselves seem to have shown little interest in publishing their reminiscences Believing that it would be not only worthwhile for posterity but extremely interesting for the present generation to hear about the aspirations fears and activities of those who participated in this watershed of science and government collaboration we arranged the public lecture series represented by this book We chose to focus upon Los Alamos since the project's efforts culminated there The isolated laboratory in New Mexico was created to design and construct the first atomic bombs More scientific brainpower was accumulated there than at any time since Isaac Newton dined alone and the interactions with this community are of sociological interest as the results of their work are of political import Conflict in the Modern World Dean Smart, 2000 A resource pack providing coverage of the modern world GCSE history syllabus requirements for AQA NEAB schools and students One of a series it contains units of work key issues analysis key issues question and answer model answer and answer constructor It covers the following core content areas the lead up to World War I the Western Front the Home front 1914 1918 the lead up to World War I World War II The Home Front 1939 1945 the lead up to the Cold War the Nuclear Age 1945 1963 The Decision to Use the Atomic Bomb Louis G. Morton, 1960 **Five Days in August** Michael D. Gordin, 2015-08-18 Most Americans believe that the Second World War ended because the two atomic bombs dropped on Japan forced it to surrender Five Days in August boldly presents a different interpretation that the military did not clearly understand the atomic bomb's revolutionary strategic potential that the Allies were almost as stunned by the surrender as the Japanese were by the attack and that not only had experts planned and fully

anticipated the need for a third bomb they were skeptical about whether the atomic bomb would work at all With these ideas Michael Gordin reorients the historical and contemporary conversation about the A bomb and World War II Five Days in August explores these and countless other legacies of the atomic bomb in a glaring new light Daring and iconoclastic it will result in far reaching discussions about the significance of the A bomb about World War II and about the moral issues they have spawned

Morality's Muddy Waters George Cotkin,2010 George Cotkin looks at diverse yet central issues such as the problem of evil moral responsibility racial identity and capital punishment juxtaposed against events such as the bombing of civilians during World War II the My Lai Massacre and the invasion of Iraq to demonstrate that moral complexity and confusion can be productive
