Smith, 2021-08-04 A Sensory History Manifesto is a brief and timely meditation on the state of the field It invites historians who are unfamiliar with sensory history to adopt some of its insights and practices and it urges current practitioners to think in new ways about writing histories of the senses Starting from the premise that the sensorium is a historical formation Mark M Smith traces the origins of historical work on the senses long before the emergence of the field now called sensory history interrogating exploring and in some cases recovering pioneering work on the topic Smith argues that we are at an important moment in the writing of the history of the senses and he explains the potential that this field holds for the study of history generally In addition to highlighting the strengths of current work in sensory history Smith also identifies some of its shortcomings If sensory history provides historians of all persuasions times and places a useful and incisive way to write about the past it also challenges current practitioners to think more carefully about the historicity of the senses and the desirability even the urgency of engaged and sustained debate among themselves In this way A Sensory History Manifesto invites scholars to think about how their field needs to evolve if the real interpretive dividends of sensory history are to be realized Concise and convincing A Sensory History Manifesto is a must read for historians of all specializations      **A User's Guide to the Age of Tech** Grant Wythoff, 2025-05-27 How users experience and influence technological change when so much of that change feels out of our control Every day we casually employ one of the most complex tools ever created using it to read the news plan our day and connect with friends In A User's Guide to the Age of Tech Grant Wythoff investigates the process by which now ubiquitous technologies like our phones become integrated into our lives showing how the gadget stage before devices are widely

**The Logic of Filtering** Melle Jan Kromhout, 2021 The Logic of Filtering traces the profound impact of technical media on the sound of music asking how do media technologies shape sound How does this affect music And how did it change what we listen for in music Since the invention of sound recording in the second half of the nineteenth century media that transmit record store and reproduce physical sound inspired dreams of perfect reproduction but were also confronted with the inevitable introduction of noise Based on a wide range of historical technical and theoretical sources author Melle Jan Kromhout explores this one hundred and forty year history of sound media and shows why noise should not be understood as unwanted by effect but instead plays a foundational role in shaping the sonic contours of recorded music The Logic of Filtering develops an extensive media archaeological analysis of the noise of sound media encompassing all the disturbances distortions and interferences that these media add to the sounds they reproduce It thereby stands to enrich our understanding of the way in which sound media changed and continue to change the sonorous qualities of music and offers new perspectives on the interaction between music media and listeners

Kaleidophonic Modernity Brett Brehm, 2023-02-21 What stories remain hidden behind one of the most significant inventions of the nineteenth century Kaleidophonic Modernity reexamines the development of mechanical sound recording technology by charting the orbits of writers scientists and artists in France and the United States Working between comparative literature the history of science and urban studies Brehm builds a bridge between visual culture and sound studies Kaleidophonic Modernity places the poet and inventor Charles Cros and his lover the celebrated concert pianist and

salonnière Nina de Villard at the heart of modern aesthetic and scientific vanguards. Cross's scientific endeavors ranged from color photography to telecommunications to mechanical sound reproducibility. In his poetry, the Surrealists found an ancestor and inspiration. His literary and scientific works prove startling and relevant to predicaments of technological media in his own time and ours. For nearly twenty years, Nina de Villard presided over a supremely daring intellectual salon. There she welcomed manifold literary, artistic, and musical luminaries into a veritable crucible of the artistic avant-garde and precursor to the famous Chat Noir cabaret. Together, these two forgotten but pivotal figures, Cross and Villard, help reframe our thinking on Edgar Allan Poe, Charles Baudelaire, and Walt Whitman, icons of urban modernity who can now be seen and heard in a kaleidophonic light, one that offers a compelling new perspective on modern mediascapes. In elaborating this transatlantic phenomenon, *Kaleidophonic Modernity* illuminates the prehistory of the phonograph as it intersects with the aesthetics of sound reproducibility, Franco-American literary exchange, Poe's aesthetic and intellectual legacy, the sounds of modern cities and technologies, and the genealogy of audiovisual experimentation found in such movements as Dada, Futurism, and the sound art of today.

**A Cultural History of the Senses in the Modern Age** David Howes, 2014-10-23 In the 20th century, many aspects of life became a matter of perception in the wake of the multiplication of media, stylistic experimentation, and the rise of multiculturalism. Life sped up as a result of new modes of transportation: automobiles and airplanes, and communication: telephones and personal computers, which emphasized the rapid movement of people and ideas. The proliferation of synthetic products and simulated experiences, from artificial flavors to video games, in turn created heady virtual worlds of sensation. This progressive mediation and acceleration of sensation, along with the sensory and environmental pollution it often spawned, also sparked various countertrends, such as the back-to-nature movement, the craft movement, slow food, and alternative medicine. This volume shows how attending to the sensory dynamics of the modern age yields many fresh insights into the intertwined processes which gave the 20th century its particular feel of technological prowess and gaudy artificiality. *A Cultural History of the Senses in the Modern Age* presents essays on the following topics: the social life of the senses, urban sensations, the senses in the marketplace, the senses in religion, the senses in philosophy and science, medicine, and the senses in literature, art, and the senses and sensory media.

**The Routledge Companion to Sound Studies** Michael Bull, 2018-10-29 The *Routledge Companion to Sound Studies* is an extensive volume presenting a comparative and historically informed understanding of the workings of sound in culture, while also mapping potential future directions for research in the field. Experts from a variety of disciplines within sound studies cover such diverse topics as politics, gender, media, race, literature, and sport. Individual sections consider the importance of sound in an increasingly mediated world, the role that sound media play in the construction of experience, and the ways in which sound has been theorized to produce a distinctive sensory contribution to knowledge. This wide-ranging and vibrant collection provides a rich resource for scholars and students of media and culture.

[A Cultural History of the Violin in](#)

Nineteenth-Century London Tom Wilder, 2025-03-18 Examines the violin's evolution as not just instrument but valued objet d'art through the eyes of musicians collectors makers dealers connoisseurs journalists auctioneers and traders The nineteenth century saw developments in the composition performance and reception of classical music that led to an unprecedented shift in how the violin was appreciated from humble craft object to one of art A utilitarian tool defined in 1800 by its tonal properties became by century's end an expensive objet d'art classified almost exclusively in terms of physical visible properties In London's vibrant musical life Cremonese violins acquired special significance and in turn helped shape the beliefs knowledge and behaviour of the disparate actors connected to the instrument musicians collectors makers dealers connoisseurs journalists auctioneers and traders By 1880 London had supplanted Paris as the centre of the international violin trade One firm in particular W E Hill Sons emerged as a major presence in both the local musical community and the global violin market The Hills were makers restorers dealers and connoisseurs They were also writers collectors and melomaniacs deeply implicated in London's instrument auction and exhibition scene The mutually reinforcing nature of these activities which they consciously turned to account for commercial reasons bear witness to events and developments earlier in the century Their story illuminates this first study of the violin's nineteenth century journey from simple musical instrument to mystified work of art
