Harvey Lemelin, Jackie Dawson, Emma J. Stewart, 2013-03-01 Concerns over vanishing destinations such as the Great Barrier Reef Antarctica and the ice cap on Mt Kilimanjaro have prompted some travel operators and tour agencies to recommend these destinations to consumers before they disappear This travel trend has been reported as disappearing tourism doom tourism and most commonly last chance tourism where tourists explicitly seek vanishing landscapes or seascapes and or disappearing natural and or social heritage However despite this increasing form of travel there has been little examination in the academic literature of last chance tourism phenomenon This is the first book to empirically examine and evaluate this contemporary tourism development providing a new angle on the effects of global change and pressures of visitation on tourism destinations It aims to develop the conceptual definition of last chance tourism examine the ethics surrounding this type of travel and provide case studies highlighting this form of tourism in different regions and in different contexts In particular it critically reviews the advantages of publicizing vulnerable destinations to raise awareness and promote conservation efforts Conversely the book draws attention to the issue of attracting more tourists seeking to undergo such experiences before they are gone forever accelerating the negative impacts It further examines current trends discusses escalating challenges provides management strategies and highlights future research opportunities Last Chance Tourism is a timely and multi disciplinary volume featuring contributions from leading scholars in the fields of leisure tourism anthropology geography and sociology It draws on a range of international case studies and will be of interest to students researchers and academics interested in Tourism Environmental Studies and Development Studies **Dominion of Bears**

Sherry Simpson, 2013-10-18 Long ago we invited bears into our stories our dreams our nightmares our lives We have always sought them out where they live for their hides their meat their beauty their knowingness Human country and bear country exist side by side As Sherry Simpson suggests the relationship between bears and humans is ancient and ongoing and in Alaska profoundly and often uncomfortably close A huge number of North America's bears live in Alaska including at least 31 000 brown bears 100 000 black bears and 3 500 polar bears And nearly every aspect of Alaskan society reflects their presence from hunting to tourism marketing to wildlife management to urban planning A long time Alaskan Simpson offers a series of compelling essays on Alaskan bears in both wild and urban spaces because in Alaska bears are found not only in their natural habitat but also in cities and towns Combining field research interviews and a host of up to date scientific sources her finely polished prose conveys a wealth of information and insight on ursine biology behavior feeding mating social structure and much more Simpson crisscrosses the Alaskan landscape in pursuit of bears as she muses marvels and often stands in sheer awe before these charismatic creatures Firmly grounded in the expertise of wildlife biologists hunters and viewing guides she shows bears as they actually are not as we imagine them to be She considers not only the

occasionally aggressive behavior bears need to survive but also the violence exacted upon them by trophy hunters advocates of predator control or suburbanites who view bears as land sharks that threaten the safety of their families Shifting effortlessly between fascinating facts and poetic imagery Simpson crafts an extended meditation on why we are so drawn to bears and why they continue to engage our imaginations populate indigenous mythologies and help define our essential visions of wilderness As Simpson observes The slightest evidence that bears share your world or that you share theirs can alter not only your sense of the landscape but your sense of yourself within that landscape

Literature and the Brain Norman Norwood Holland, 2009 LITERATURE AND THE BRAIN goes straight to the human core of literature when it explains the different ways our brains convert stories poems plays and films into pleasure When we are deep into a film or book we find ourselves absorbed unaware of our bodies or our surroundings We don't doubt the existence of Spider Man or Harry Potter and we have real feelings about these purely imaginary beings Our brains are behaving oddly because we know we cannot act to change what we are seeing This is only one of the special ways our brains behave to with literature ways that LITERATURE AND THE BRAIN reveals 474 pp 13 ill

Wildlife Conservation Legislation United States. Congress. Senate. Committee on Environment and Public Works, 1999

A Source of Wilderness Novice Survival Skills Donald F. Grantham, 2001-03-02 Modern man or woman for that matter from city town or farm has little knowledge of the real wilderness Many hunters fisherfolk joggers backpackers hikes and adventures know how to handle a prepared path planned campsite or landscaped trail but the real woods were every thing and I mean every thing is natural they are lost They have never seen any food walking around or any plants out of a plastic package Thus off the planned path they hit the panic button and may needlessly die A considerable number of people lost in the wilds die every year just because they did not have the basic knowledge to

survive A recent example from the Western states was a group of people perished in the woods with a host of good food all around They just didn't know what to eat as they had never seen it growing in the ground Few of today's citizens realize they are never more than a few seconds from trouble as their car rolls to a stop many miles from civilization with a dead engine Every year many people buy a gun and become hunters They know they are hunters they now have a hunting license The license gives them no knowledge of the woods but they don't realize this until they get lost on the first trip Some die Some get themselves out with just dumb luck and fear to ever return to the woods again many hours of true fun have been lost forever This book could have helped save a life or made their trip a fun adventure to be enjoyed again and again This book is full of basic information and how to for the novice but the experienced outdoors person will find a wealth of useful information here as well There are details on many different ways to live in the outdoors with little professional equipment some may be new or a little different to other books on the subject to build a fire break in boots walk approach game travel finding food water shelter how to cook without pots or pans tell coming weather what works in many places and what doesn't How to make the things you need with only what tools you can devise or may have with you at the time is stressed as is outdoor first aid and confidence All subjects very different to what you will experience in town or in a formal camping backpacking or hiking situation This book is different in that everything here has been tested over and over all over the country to be sure everything will work for the novice as well as the experienced outdoors person This is not a table top or book shelf book it is a book to put in your pocket and take with you It may well save a life

Human

Dimensions of Wildlife Management in Japan Ryo Sakurai, 2019-05-07 This book discusses the findings of research on the human dimensions of wildlife management conducted in Japan demonstrating how such research and approaches have contributed to mitigating human wildlife conflicts Human wildlife conflicts including agricultural and property damage as well as occasional casualties are a global problem for which local residents managers and stakeholders around the world are struggling to find solutions Human dimensions of wildlife management HDW is an academic field developed in North America in the 1970s to gather information on the social aspects of human wildlife issues to help wildlife managers and stakeholders implement effective decision making measures However HDW is not widely recognized or applied outside North America and few studies have investigated whether HDW approaches would be effective in different cultural settings This is the first book written in English to introduce the HDW theories and practices implemented in Asia Presenting innovative approaches and research techniques as well as tips on how to introduce HDW methods into culturally different societies it is a valuable resource not only for researchers and students in this field but also for government officials managers NGOs residents and other stakeholders who are affected by human wildlife conflicts around the globe Seeking Communion as Healing Dialogue Margaret M. Mullan, 2021-06-10 Seeking Communion as Healing Dialogue Gabriel Marcel s Philosophy for Today discusses society s problems with interpersonal communication arguing that these issues are more deeply rooted in problems in being Margaret M Mullan draws on the work of Gabriel Marcel to explore the meaning of body of being with and of being at all in today s world answering questions about why we are often unable to dialogue with the people around us why we feel disconnected and alone even in an increasingly technological world and how these changing technologies expose and sometimes exacerbate our weak connections to others Engaging Marcel s reflective method and theory of communion Mullan explores how we seek communion amid technology and proposes that Marcel s reflections are generative contributions to the understanding and study of communication offering a way to seek healing dialogue in present day Scholars of communication philosophy conflict studies and media studies will find this book particularly useful Awareness of Dying Barney G.
