## **The B 58 Hustler:**

*B-58 Hustler Units* Peter E. Davies, 2019-10-31 One of the most dramatic bombers of its day the Convair B 58 came to epitomise the Cold War power of Strategic Air Command Introduced only 12 years after the sound barrier was first broken this iconic plane became the first large long range supersonic bomber to take to the skies a feat which had seemed far fetched only a few years previously Outstripping its contemporaries in terms of speed and agile enough to escape most interceptors the B 58 was a remarkable feat of engineering setting 19 world speed records and collecting a host of trophies The first operational bomber capable of Mach 2 at 63 000 feet it was able to evade hostile fighters and represented a serious threat to targets across the Soviet Bloc Supported by contemporary first hand accounts photography and full colour illustrations this study explores the history of this ground breaking aircraft from its conception to its little known testing for use in the Vietnam War

*B-58 Hustler* David Doyle, 2015 Sleek sporting a delta wing four big engines and an external payload the Convair B 58 was the first operational bomber capable of Mach 2 In service for only a decade the supersonic bomber was dubbed the Hustler a tribute to its impressive performance The effort that resulted in the B 58 which saw its heyday in the 1960s began back in February 1949 the Air Research and Development Command at Wright Patterson Air Force Base initiated the second Generalized Bomber Study GEBO II While a number of manufacturers responded Convair's design which drew heavily on that firm's previous delta wing fighter stylings was favored During its career the B 58 equipped two Strategic Air Command SAC bomb wings The first of these the 43d Bomb Wing was based from 1960 into 1964 at Carswell Air Force Base in Fort Worth Texas adjacent to the factory where the B 58s were built then moved in 1964 to Little Rock Air Force Base in Arkansas where it remained until the Hustler's retirement in 1970 The second unit was the 305th Bomb Wing based at Bunker Hill Air Force Base later known as Grissom AFB Indiana from 1961 through 1970 While the initial operational use of the B 58 was beset with delays and in fact at one time SAC outright opposed the aircraft as the decade of the 1960s began the B 58 brought SAC much desired prestige as it set a successive number of records involving speed and altitude Among these were the 1961 Thompson Trophy the Mackay Trophy the Harmon Trophy and the Bleriot Trophy Despite its impressive performance the B 58 was not without shortcomings For one thing its 1 740 mile unrefueled range was relatively modest For another the Soviets developed the SA 2 Guideline surface to air missile that could strike the Hustler at its 63 400 foot ceiling Finally the operational cost of the bomber was extremely high Accordingly in 1965 Secretary of Defense Robert McNamara ordered the B 58 phased out by 1974 Then as the Nixon Administration made one last attempt to bring the Vietnam War to a successful end Defense Secretary Melvin Laird advanced this phase out to Fiscal Year 1970 to cut defense expenditures Accordingly the aircraft were except for a few display specimens shuttled off to Davis Monthan Air Force Base where they lingered in storage until 1977 at which time they were sold for scrap to Southwestern Alloys

**B-58 Hustler Pilot's Flight Operating Instructions** United States Air Force, 2011-11 The USAF's first jet

powered bomber capable of reaching Mach 2.0 the Convair B-58 Hustler carried a crew of three and a nuclear payload. A complex aircraft, the B-58 suffered teething problems during development and became infamous for its maintenance requirements. It also compiled a dubious safety record: out of 116 Hustlers, 26 were lost in accidents. Nevertheless, the B-58's career spanned nearly a decade between 1960-70. It might have continued even longer, but Secretary of Defense Robert McNamara believed the aircraft, which was designed for high speed, high altitude tactical approach, was vulnerable to air-to-air missile attack. Its replacement, the F-111A Aardvark, would be designed to perform a low approach attack. Originally printed by the U.S. Air Force, this B-58A flight operating manual taught pilots everything they needed to know before entering the cockpit. Originally classified Restricted, this manual was declassified long ago and is here reprinted in book form. *The B-58 Hustler* Douglas Hill Robinson, 1967 *B-58 Hustler* David Doyle, 2021-02-28 The Convair B-58 Hustler, with its distinctive delta wing shape, would become the world's first supersonic bomber and the first aircraft to fly to Mach 2. With development beginning in 1949, the B-58, which could not carry conventional weapons, would become part of the US nuclear arsenal during the height of the Cold War. Although these bombers were initially considered difficult to operate, in time the hand-chosen crews who flew them came to love and respect the aircraft. Throughout the 1960s, crews flying the B-58 set numerous speed and distance records. These planes were tremendously expensive to operate, and it was budget issues that forced the early retirement of the bomber. The story of this historic aircraft is told through carefully researched photos, which are reproduced in remarkable clarity. Large, clear photos coupled with descriptive and informative captions unlock the secrets of this aircraft. *The B-58 Hustler - Promotional Ads for the World's First Supersonic Bomber*. George Holt, 2018-11-11 This publication contains 45 Promotional Ads by Convair subcontractors and other suppliers during the development of the B-58 Hustler, the World's First Supersonic Bomber. It also contains many trophy photos, description of records set by the Hustler, and a comparison of top speeds with other bombers and fighters. **The B-58 Hustler - Promotional Ads for the World's First Supersonic Bomber. 2nd Edition.** George Holt Jr, 2019-04-02 I was one of the lucky ones to have flown in the B-58 Hustler. This large format 8 1/2 x 11 book contains 73 Promotional Ads by Convair, its subcontractors, and other suppliers for the World's First Supersonic Bomber. This 2nd Edition almost doubles the number of promotional ads about the B-58 that I had collected over the years, and that were initially presented in the first edition. I restored a number of them to make the picture quality and text sharp and more readable. This edition should now contain the most complete collection of ads in existence. It should be a valuable historical document for B-58 aficionados as well as military aircraft lovers all over the world. Like the first edition, there is a description of speed records by the Hustler, along with trophy photos and a comparison of top speeds with other bombers and fighters. **Rearming for the Cold War, 1945-1960** Elliott Vanveltnor Converse, 2012 Book Description The first publication in a multivolume series on the history of the acquisition of major weapon systems by the Department of Defense, author Elliott Converse presents a meticulously researched overview of changes in acquisition.

policies organizations and processes within the United States military establishment during the decade and a half following World War II Many of the changes that shaped the nature and course of weapons research and development production and contracting through the end of the century were instituted between 1945 and 1960 many of the problems that have repeatedly challenged defense policymakers and acquisition professionals also first surfaced during these years This study is the first to combine the histories of the Office of the Secretary of Defense OSD and the military services into one account The volume is organized chronologically with individual chapters addressing the roles of OSD the Army Navy and Air Force in two distinct periods

**History of Acquisition in the Department of Defense, Volume 1** Elliott V. Converse, 2012-06-12 This volume is a history of the acquisition of major weapon systems by the United States armed forces from 1945 to 1960 the decade and a half that spanned the Truman and Eisenhower administrations following World War II These instruments of warfare aircraft armored vehicles artillery guided missiles naval vessels and supporting electronic systems when combined with nuclear warheads gave the postwar American military unprecedented deterrent and striking power 1 They were also enormously expensive The volume is organized chronologically with individual chapters addressing the roles of OSD the Army Navy and Air Force in two distinct periods The first roughly coinciding with President Truman s tenure covers the years from the end of World War II through the end of the Korean War in 1953 The second spans the two terms of the Eisenhower presidency from 1953 through early 1961 The year 1953 marked a natural breakpoint between the two periods The Korean War had ended President Eisenhower and his defense team began implementing the New Look a policy and strategy based on nuclear weapons which they believed would provide security and make it possible to reduce military spending The New Look s stress on nuclear weapons along with the deployment of the first operational guided missiles and the rapid advances subsequently made in nuclear and missile technology profoundly influenced acquisition in the services throughout the 1950s and the remainder of the century As used in this study the term acquisition encompasses the activities by which the United States obtains weapons and other equipment In surveying the history of acquisition between 1945 and 1960 this study discusses or refers in passing to many of the hundreds of weapon system programs initiated by the services in that period but it is not a weapons encyclopedia Instead it investigates a few major programs in depth in the belief that such detailed examination best reveals the evolution of acquisition policies organizations and processes and the various forces influencing weapons programs

*The Trident* ,1955      **Air University Quarterly Review** ,1981      Famous Aircraft Douglas Hill Robinson,1967      **Always at War** Melvin G. Deaile,2018-04-15 Always at War is the story of Strategic Air Command SAC during the early decades of the Cold War More than a simple history it describes how an organization dominated by experienced World War II airmen developed a unique culture that thrives to this day Strategic Air Command was created because of the Air Force s internal beliefs but the organization evolved as it responded to the external environment created by the Cold War In the aftermath of World War II and the creation of an independent air service the Air Force formed SAC

because of a belief in the military potential of strategic bombing centralized under one commander As the Cold War intensified so did SAC s mission In order to prepare SAC s warriors to daily fight an enemy they did not see as well as to handle the world s most dangerous arsenal the command led by General Curtis LeMay emphasized security personal responsibility and competition among the command Its resources political influence and manning grew as did its culture until reaching its peak during the Cuban Missile Crisis SAC became synonymous with the Cold War and its culture forever changed the Air Force as well as those who served
