The Baboon:

The Baboon in Biomedical Research John L. VandeBerg, Sarah Williams-Blangero, Suzette D. Tardif, 2009-06-04 Nonhuman primates have played critical roles in biomedical research and they are among the few animals whose use in research continues to increase The scientific value of nonhuman primates derives from their close phylogenetic proximity to man and their consequent anatomic physiologic and genetic similarities to man Only nonhuman primates can provide adequate models for many complex physiological and disease processes of humans The baboon is a relative newcomer to the repertoire of nonhuman primates used in biomedical research However in less than 50 years since its first use in the U S it has become one of the most popular laboratory primate species It is larger than the other widely used monkey species making it advantageous for many types of experiments and technological developments It is extraordinarily hardy and highly fecund in captivity It closely resembles humans in a variety of physiological and disease processes such as cholesterol metabolism early stages of atherosclerosis and alcoholic liver disease Its chromosomes closely resemble those of humans and many genes of the two species lie in the same chromosomal order Among all primates baboons are the most widely used models for the genetics of susceptibility to complex diseases and they are the first nonhuman primate for which a framework genetic linkage map was established In addition the baboon genome is currently being sequenced and as a result the utility of this species for biomedical research will be dramatically increased

The Baboon's Left Testicle (Part One of Two) Andrew Baker, Gary McArthur, 2008-12-31 What is there against a Baboon's Left Testicle And before you all scream The right one of course I feel duty bound to inform you that in this case you would be mistaken for our baboon has suffered a most intimate and injurious injustice his right testicle has been wrenched from its furry pouch by a person or persons unknown in order to fulfil a long held prophesy and set afoot plans for world domination And herein lies the confusion in our tale does the offending scrotal raider have the right one for the job or is it the wrong one being the right one Set alongside this an unlikely group of misfits including some completely oblivious newly weds a 200 year old dead gay unidextrous pie maker and his curious short arsed lover by the name of Gerard O had a murderous army of Welsh zombies and an all stitching all dancing counter army of equally murderous Pearly Kings and Queens and you have an almighty pile of baboon excrement but an equally almighty bloody good read

The Soul of the Ape and My Friends the Baboons Eugene Marais, 2021-05-23 Eugene Marais spent three years living in the South African wilderness in close daily contact with a troop of baboons He later described this as the happiest most content time of his troubled life This period produced two works which are testament to his research and conclusions they have very different histories Firstly there was a series of articles written in Afrikaans for the newspaper Die Vaderland They were then published in book form under the title *Burgers van die Berge* and were first published in an English translation in 1939 under the title *My Friends the Baboons* These pieces were written in a popular vein suitable to a newspaper readership and were not regarded seriously by Marais himself They are a journal a series of anecdotes and

impressions *The Soul of the Ape* which Marais wrote in beautifully clear and precise English was the more serious scientific document however after his death in 1936 it could not be found It was lost for 32 years and was recovered in 1968 and published the following year The excellent introduction by Robert Ardrey that is included in this volume was part of the 1969 and subsequent editions of *The Soul of the Ape* and adds greatly to an appreciation of its importance Together these three texts give us as complete a picture as we will ever get of Marais three year study of these complex relatives of humanity and its implications for the study of consciousness

The Incredible Parallel Marlon Reid, 2021-05-13 Can these real life research interviews and scientific experiments conducted on ten animals reveal the incredible parallel to human personality for a successful marriage relationships accelerated leadership growth and self understanding that God purposed for your life Why would one of the wisest men to ever live tell his son to go study the way of the ant to become successful and debt free Why do male porcupines leave after impregnating the females and the snake senses my heartbeat to manipulate my emotions Why did my parents tell me Don't make a horse of yourself unbelievably interesting and to identify a sly fox and cunning wolf before falling victim Does finding an entrapped baboon hilarious be an internal mirror reflecting my thought pattern Why do eagles and elephants prepare their offspring then push them out for independence while the frog rather dies in its own ego yet the zebra doesn't
