Whyte, C. Hollenbach, 2009-04-19 In *Foraging the Tennessee River Valley 12 500 to 8 000 Years Ago* Hollenbach analyzes and compares botanical remains from archaeological excavations in four rockshelters in the Middle Tennessee River Valley *TVA Archaeology* Erin E. Pritchard, 2009 Since its inception in 1933 the Tennessee Valley Authority has played a dual role as federal agency and steward of the Tennessee River Valley While known to most people today as an energy provider the agency is also charged with managing and protecting the nation s fifth largest river system the Tennessee River and vast tracts of land and resources encompassing Tennessee and portions of Alabama Georgia Kentucky Mississippi North Carolina and Virginia Included in TVA s mandate is the preservation of the archaeological record of the valley s prehistoric peoples a record that would have been forever lost beneath floodwaters had TVA not demonstrated a commitment to minimize its impact on the valley and sought to protect its archaeological resources In *TVA Archaeology* fourteen contributors who have worked with TVA in its conservation effort discuss prehistoric excavations conducted at Tellico Normandy Jonathan s Creek and many other sites They explore TVA s role in the excavations and how the agency facilitated prehistoric investigations along proposed dam sites They also delve into the history of TVA as it grew from a New Deal program to a federal corporation and reveal how during the agency s formative years the TVA board responded to prodding from archaeologists David DeJarnette and William Webb and molded TVA into the steward of a region it is today TVA remains a mainstay of progress and conservation within an important region of the United States and its safeguarding of the valley s prehistory cements its legacy as more than just an energy supplier Students and researchers interested in prehistoric archaeology the Tennessee Valley and the history of TVA will find this volume an invaluable contribution to the study of the region Erin E Pritchard is an archaeologist with the Tennessee Valley Authority Her work includes multiple archaeological site investigations most notably Dust Cave in northern Alabama and she has authored and coauthored numerous site reports for TVA The American Southeast at the End of the Ice Age D. A Land Imperiled John Nolt, 2005 Cherokees called the magnificent mountain range in eastern Tennessee land of the blue mist which European settlers later changed to Smoky Mountains Today the Great Smoky Mountains National Park is one of Southern Appalachia's leading tourist attractions But that fabled blue mist isn't so blue or healthy any longer Particularly in the summer months the smoke of the Smokies is a haze of sulfate particles and other pollutants released by coal burning power plants a mixture more likely to create dangerous ozone levels for visiting tourists than the invigorating mountain air so many come to seek It is a story common throughout Southern Appalachia one of America's most beautiful biologically diverse and fragile bioregions *A Land Imperiled* is a symptom by symptom look at the myriad of ecological issues threatening the health of the southern high country Sections on air water plants and animals food energy waste transportation and population and urbanization make this the most comprehensive environmental study of Southern Appalachia to date a much needed wake up call for anyone concerned about the region's natural legacy But it is not just the future we have to worry about the author asserts pollution development and other forms of degradation are already affecting our quality of life The excessively high ozone levels plaguing the Smokies have been connected to a host of respiratory problems including chronic bronchitis and asthma Once crystal streams are green and sluggish with runoff from agricultural wastes Over half of the South's natural forests are gone and a mere 2 percent of the remaining forests have protected status The environment of Southern Appalachia is a collection of complex interrelated systems that needs care and protection to function in full health *A Land Imperiled* not only illustrates the many ways in which the health of this bioregion is being affected but also provides examples of how the damage can be reversed to sustain ourselves and this natural treasure

Prehistory and History Along the Upper Savannah River ,1988 **Advances in Archaeological Method and Theory**
,2014-06-28 Advances in Archaeological Method and Theory *Time before History* H. Trawick Ward,R. P. Stephen Davis
Jr.,2018-06-15 North Carolina s written history begins in the sixteenth century with the voyages of Sir Walter Raleigh and the
founding of the ill fated Lost Colony on Roanoke Island But there is a deeper unwritten past that predates the state s
recorded history The region we now know as North Carolina was settled more than 10 000 years ago but because early
inhabitants left no written record their story must be painstakingly reconstructed from the fragmentary and fragile
archaeological record they left behind Time before History is the first comprehensive account of the archaeology of North
Carolina Weaving together a wealth of information gleaned from archaeological excavations and surveys carried out across
the state from the mountains to the coast it presents a fascinating readable narrative of the state s native past across a vast
sweep of time from the Paleo Indian period when the first immigrants to North America crossed a land bridge that spanned
the Bering Strait through the arrival of European traders and settlers in the sixteenth and seventeenth centuries
