Section A Correctly list all the data in the sets.

Even numbers between 1 and 10 = { } }

Odd numbers between 5 and 15 = { } }

Section B Sort the data and choose the correct statement below, A, B, or C.

Even = {2, 4, 6, 8, 10}

Odd = {1, 3, 5, 7, 9}

A Even \cup Odd = {1, 2, 3, 4, 5, 6, 7, 8, 9, 10}

B Even \cup Odd = {0}

C Even \cup Odd = {1, 2, 5, 8}

Even = {2, 4, 6, 8, 10}

Prime = {2, 3, 5, 7}

A Even \cap Prime = {2, 4, 7}

B Even \cap Prime = {2}

C Even \cap Prime = {6, 8}

Even = {2, 4, 6, 8, 10, 12, 14, 16}

Square = {4, 9, 16, 25}

A Even \cap Square = {2, 4, 6}

B Even \cup Square = {4, 9, 16}

C Even \cap Square = {4, 16}

Section C

A Chess board has black pieces (B) and rooks (R).

1) How many pieces are black and rooks.

2) Describe $B \cup R$ in words.

survey type articles dealing with the various main directions in mathematics where a rather fine subdivision has been used. The main requirement for these articles has been that they should give a reasonably complete up to date account of the current state of affairs in these areas and that they should be maximally accessible. On the whole these articles should be understandable to mathematics students in their first specialization years to graduates from other mathematical areas and depending on the specific subject to specialists in other domains of science engineers and teachers of mathematics. These articles treat their material at a fairly general level and aim to give an idea of the kind of problems techniques and concepts involved in the area in question. They also contain background and motivation rather than precise statements of precise theorems with detailed definitions and technical details on how to carry out proofs and constructions. The second kind of article of medium length contains more detailed concrete problems results and techniques. [Encyclopaedia of Mathematics](#)

Language Education Research Jean L. Turner, 2014-02-18 Assuming no familiarity with statistical methods this text for language education research methods and statistics courses provides detailed guidance and instruction on principles of designing conducting interpreting reading and evaluating statistical research done in classroom settings or with a small number of participants. While three different types of statistics are addressed descriptive parametric non parametric the emphasis is on non parametric statistics because they are appropriate when the number of participants is small and the conditions for use of parametric statistics are not satisfied. The emphasis on non parametric statistics is unique and complements the growing interest among second and foreign language educators in doing statistical research in classrooms. Designed to help students and other language education researchers to identify and use analyses that are appropriate for their studies taking into account the number of participants and the shape of the data distribution the text includes sample studies to illustrate the important points in each chapter and exercises to promote understanding of the concepts and the development of practical research skills. Mathematical operations are explained in detail and step by step illustrations in the use of R a very powerful online freeware program to perform all calculations are provided. A Companion Website extends and enhances the text with PowerPoint presentations illustrating how to carry out calculations and use R practice exercises with answer keys data sets in Excel MS DOS format and quiz midterm and final problems with answer keys **Canadian**
