Mirrors of the Economy Yoshiko M. Herrera,2017-08-28 As international institutions multiply and more governments sign on to standardized ways of organizing economies and societies resistance to globalization persists In Mirrors of the Economy Yoshiko M Herrera explores the variance in implementation of international institutions through an examination of the international System of National Accounts SNA and in particular the success of post Soviet Russia and other formerly communist countries in implementing the SNA The SNA is the basis for all national economic indicators including Gross Domestic Product and is therefore a critical institution for economic policy and development Herrera tests existing theories of implementation of international institutions and proposes a novel theoretical concept conditional norms to suggest that the conditions attached to norms may result in institutional change On the basis of content analysis of statistical publications and more than seventy five interviews throughout Russia particularly in Moscow and in Washington she forms a clear picture of the implementation of the SNA in Russia in the early 1990s In Soviet times a stable conditional

norm delineated the appropriateness of statistical institutions based on the structure of the economy The transformation of the economic system triggered a shift in support among Russian and Eastern European statisticians in favor of the SNA Herrera s argument increases our understanding of the role of norms structural conditions and professional communities in institutional implementation
