Poverty and Inequality Raphael Kaplinsky, 2013-05-13 Globalization is characterised by persistent poverty and growing inequality Conventional wisdom has it that this global poverty is residual as globalization deepens the poor will be lifted out of destitution The policies of the World Bank the IMF and the WTO echo this belief and push developing countries ever deeper into the global economy Globalization Poverty and Inequality provides an alternative viewpoint It argues that for many particularly for those living in Latin America Asia and Central Europe poverty and globalization are relational It is the very workings of the global system which condemn many to poverty In particular the mobility of investment and the large pool of increasingly skilled workers in China and other parts of Asia are driving down global wages This poses challenges for policy makers in firms and countries throughout the world It also challenges the very sustainability of globalisation itself Are we about to witness the implosion of globalisation as occurred between 1913 and 1950 Using a variety of theoretical frameworks and drawing on a vast amount of original research this book will be an invaluable resource for all students of globalization and its effects **Three Decades of Enterprise Culture?** D. which it provides The data provided in the appendix includes official United Nations data previously unpublished This will be of use for all research into trends in the use of machine tools **Development of National Technological Capacity for Production of Indigenous Building Materials** ,1991
