The Economy Of Kent 1640 1914 Kent History Project 3:

The Economy of Kent, 1640-1914 Alan Armstrong, 1995 In recent years historians interpretations of the economic history of Britain from the seventeenth to the nineteenth century have changed significantly There is less emphasis on the idea of a cataclysmic industrial revolution pioneered in and confined to the northern and midland counties with increasing amounts of attention devoted to the long neglected economic history of the southern counties The Economy of Kent 1640 1914 is the first authoritative survey of the topic Subjects considered include the population of Kent its growth mobility and distribution agriculture industry transport labour and the importance of the sea to Kent Its findings suggest that Kent retained its place as an important constituent of the expanding British economy throughout the period and that by its steady economic progress it avoided many of the strains and stresses experienced by counties more directly touched by industrialisation along with the painful processes of readjustment that other regions have faced more recently ALAN ARMSTRONG is Professor of Economic and Social History at Kent University The contributors are MARY DOBSON ALAN ARMSTRONG GORDON MINGAY DAVID ORMROD JAMES PRESTON THEO BARKER ROBIN CRAIG JOHN WHYMAN CHRISTOPHER CHALKLIN TOM RICHARDSON ALAN ARMSTRONG Royal Historical Society Annual Bibliography of British and Irish History Austin Gee, 1996 The Royal Historical Society s Annual Bibliography of British and Irish History provides a comprehensive and authoritative survey of books and articles on historical topics published in a single calendar year The volume covers all periods of British and Irish history from Roman Britain to the late twentieth century and also includes a section on imperial and commonwealth history It is the most complete and up to date bibliography of its type and an indispensable tool for historians **Local Population Studies**, 1996 **Historical Abstracts**, 1998 **Disease, Class and Social Change** Marc Arnold, 2012-11-15 This previously unexamined history of open air treatment in English coastal resorts demonstrates how contrasting meanings were assigned to tuberculosis along lines of class It assesses the shifting inter relation of medical political and social forces in determining responses to this devastating disease and analyses the relationship between scientific ideas in particular social evolution and germ theory and attitudes to poverty and chronic disease In Folkestone and Sandgate these conflicting perceptions of the disease were highlighted in a clash of interests between reformist public health officials in overcrowded London Boroughs and a provincial plutocracy with a vested interest in maintaining the status quo in an elite health resort This local controversy precipitated calls for state treatment of the disease and throws light on the ways in which doctors politicians and academics have tended to frame the issue of tuberculosis according to their own political perspectives and values Medical approaches to tuberculosis varied between viewing it as a disease of poverty that could most efficiently be eradicated through addressing problems of poor housing and overcrowding to a focus on the isolation and sterilisation of those deemed to possess an hereditary taint Conflicts between an infection model of the disease and a focus on social reform still characterise approaches to tuberculosis treatment today
