Forster, Kristin Gjesdal, 2015-02-05 The Oxford Handbook of German Philosophy in the Nineteenth Century is the first collective critical study of this important period in intellectual history. The volume is divided into four parts The first part explores individual philosophers including Fichte Hegel Schopenhauer Marx and Nietzsche amongst other great thinkers of the period The second addresses key philosophical movements Idealism Romanticism Neo Kantianism and Existentialism The essays in the third part engage with different

areas of philosophy that received particular attention at this time including philosophy of nature philosophy of mind philosophy of language philosophy of history and hermeneutics Finally the contributors turn to discuss central philosophical topics from skepticism to mat erialism from dialectics to ideas of historical and cultural Otherness and from the reception of antiquity to atheism Written by a team of leading experts this Handbook will be an essential resource for anyone working in the area and will lead the direction of future research Reclaiming Childhood William Crain, 2004-02 A thoughtful and valuable resource for parents and teachers looking for alternative approaches to education Booklist As our children are pushed harder than ever to perform so that they will one day make the grade in the adult world parents are beginning to question the wisdom of scheduling childhood's basic pleasures In Reclaiming Childhood William Crain argues that rather than trying to control a young child the best a parent can offer is a patient and unobtrusive presence that gives the child the security and the freedom to explore the world on her own He examines how children find their way to natural development through experiences with nature art and language and makes a strong case for child centered education a movement that may be under fire but that is very much alive The Idealist Illusion and Other Essays Maurice Blondel, 2013-03-09 I was very happy when in 1997 Fiachra Long came to spend part of his sabbatical leave at the Archives Maurice Blondel at Louvain Ia Neuve This allowed him to bring together and complete his translation of three important articles from Maurice Blondel known as the philosopher of Aix en Province These three articles fonn a unity they make explicit certain aspects of the method used in the great thesis of 1893 Action This thesis it is well known aroused many polemic debates after its appearance Thomist theologians accused Blondel of turning back towards Kantian idealism whereas the philosophers of the Revue de metaphysique et de morale accused him on the contrary of falling back on a pre critical realism The three articles translated here each in its own way attempt to pass beyond these two opposite charges The Idealist Illusion 1898 underlines the fact that the content of consciousness should be unfurled as it appears by withdrawing from any idealist or realist prejudice before judging the consistency of its content as a whole In this way Blondel supports the phenomenological method used in his thesis The Elementary Principle of a Logic of the Moral Life 1903 is a very well worked text which shows that the logic of possession and privation is broader than the logic of amnnation and negation Using these words Blondel develops certain striking laws of action such as that of the parallelogram of contrary forces The ^AOxford Handbook of **Children's Rights Law** Jonathan Todres, Shani M.
