Elliott,F. Gresham,J.C. Witt,2013-11-11 What do we know about behavioral analysis and intervention in educational settings Given that educational institutions were among the first to embrace the new technology of behavior change in the late 1950s and early 1960s it is apparent that we have had the opportunity to learn a great deal The evolution of the field of behavior therapy has witnessed a change in the behavior therapist from an adolescent fascination with repeatedly demonstrating the effectiveness of the new technology to a mature recognition of the complex implications of the behavioral paradigm for individuals systems and society Many facts now taken for granted were considered impossibilities a mere two decades ago In her 1986 presidential address to Division 25 of the American Psychological Association Beth Sulzer Azaroff reviewed a number of changes in attitude in education that were strongly influenced by behavior therapy Most educators now agree that a everyone can learn b complex skills can be taught c precise general and durable performance can be taught and d barriers to learning can be overcome In addition we would add that behavior therapy is being applied to increasingly more complex human problems such as social skill deficits internalizing disorders and dysfunctional systems and organizations **Civilization and Barbarism** Graeme R. Newman,2020-03-01 Challenges the established corrections paradigm and argues for replacing mass incarceration with a viable and more humane alternative The practice of mass incarceration has come under increasing criticism by criminologists and corrections experts who nevertheless find themselves at a loss when it comes to offering credible practical and humane alternatives In *Civilization and Barbarism* Graeme R Newman argues this impasse has arisen from a refusal to confront the original essence of punishment namely that in some sense it must be painful He begins with an exposition of the traditional philosophical justifications for punishment and then provides a history of criminal punishment He shows how over time the West abandoned short term corporal punishment in favor of longer term incarceration justifying a massive bureaucratic prison complex as scientific and civilized Newman compels the reader to confront the biases embedded in this model and the impossibility of defending prisons as a civilized form of punishment A groundbreaking work that challenges the received wisdom of corrections *Civilization and Barbarism* asks readers to reconsider moderate corporal punishment as an alternative to prison and for the most serious offenders forms of incapacitation without prison The book also features two helpful

appendixes a list of debating points with common criticisms and their rebuttals and a chronology of civilized punishments Newman's book is a monumental piece of scholarship that presents a controversial set of propositions about how punishment in the future should be administered Readers will likely learn many new things about the history of punishment and be challenged about their current views of just punishment for wrongdoing Martha J. Smith, coeditor of *Theory for Practice in Situational Crime Prevention*

Behavioral Approaches to Crime and Delinquency Edward K. Morris, Curtis J. Braukmann, 2012-12-06 The systematic application of behavioral psychology to crime and delinquency was begun only 20 years ago yet it has already contributed significantly to our practical knowledge about prevention and correction and to our general understanding of a pressing social problem In this handbook we review and evaluate what has been accomplished to date as well as what is currently at the leading edge of the field We do so in order to present a clear comprehensive and systematic view of the field and to promote and encourage still more effective action and social policy reform in the future The chapters in this text have been written by professionals who were among the original innovators in applying behavioral psychology to crime and delinquency and who continue to make critical contributions to the field's progress and by a new generation of energetic young professionals who are taking the field in important and innovative directions The contributors have attempted to review and evaluate their areas with critical dispassion to provide thorough but not overly specialized discussion of their material and to draw implications for how research application and social policy might be improved in the future For our part as editors we have tried to foster integration across the chapters and to provide background and conceptual material of our own
