When most people think of professionalism ethics or moralism they often think of a set of rules for distinguishing between right and wrong such as the proverbial Golden Rule However the true definition of professionalism is not an easy one and it is not necessarily black and white In fact it could be argued that it is often easier to describe what is not professional versus what is professional It could also be disputed that although professionalism can be recognized when you see it you may not necessarily be able to put your finger on what it is exactly Professionalism Across Occupational Therapy Practice by Dr Elizabeth D DeJuliis provides an overview of the wide ranging knowledge skills and attitudes that encompass professionalism across the occupational therapy profession While there is no formal endorsed definition of professionalism in occupational therapy practice suggestions are provided to serve as a blueprint for use Professionalism in occupational therapy practice is a dynamic sophistication exemplified by a combination of an individual s personal skill set knowledge behaviors and attitudes and the adoption of the moral and ethical values of the profession and society Dr DeJuliis illustrates the concept of professionalism as a unique combination of intrinsic and extrinsic qualities surrounding key constructs of ethics responsibility competency and behavior Professionalism Across Occupational Therapy Practice discusses these various expectations in the academic setting the clinic workplace and in general society Professionalism Across Occupational Therapy Practice utilizes a developmental approach to teaching and learning paralleling the Revised Bloom s Taxonomy 2001 This classification system provides a graded holistic methodology to human teaching and learning The concept of
