Electronic Media* Simon Penny,2015-03-10 *Critical Issues in Electronic Media* is an interdisciplinary sourcebook that offers

new critical perspectives directly related to or arising from the practice of electronic media art. It sketches the changing topology of culture as it enters electronic space and specifically addresses questions of art practice in that space. Some of the contributions focus on the dynamics of specific emerging media such as interactive media while others look at the cultural conditions formed by and forming around new technological complexes. Still others examine contemporary technocultural manifestations against a background of social and technological history. The contributors are professionally and geographically diverse representing professional fields such as computer graphics, video, sound, drama, and visual arts as well as media, cultural, and literary theory and the social sciences. Together these essays provide a rich survey of contemporary technological critique and offer a perspective on creative practice in technological media. *The Dream Home* Kristoff

Chimes, *The Dream Gatherer* Kristen Britain, 2019-12-10 Britain presents a novella and two short stories set in the universe of her bestselling Green Rider series in celebration of the twentieth anniversary of the publication of her first novel *Green Rider*. Dust jacket flap ***The Dream Machine*** M. Mitchell Waldrop, 2018-09-25 The story of the man who instigated the work that led to the internet and shifted our understanding of what computers could be. Behind every great revolution is a vision and behind perhaps the greatest revolution of our time is the vision of J. C. R. Licklider. He did not design the first personal computers or write the software that ran on them nor was he involved in the legendary early companies that brought them to the forefront of our everyday experience. He was instead a relentless visionary who saw the potential in the way that individuals could interact with computers and software. At a time when computers were a short step removed from mechanical data processors, Licklider was writing treatises on human computer symbiosis, computers as communication devices, and a now not so unfamiliar Intergalactic Network. His ideas became so influential, his passion so contagious that author M. Mitchell Waldrop calls him computing's Johnny Appleseed. In a simultaneously compelling personal narrative and comprehensive historical exposition, Waldrop tells the story of the man who not only instigated the work that led to the internet but also shifted our understanding of what computers were and could be. This Stripe Press edition also includes the original texts of Licklider's three most influential writings: *Man-Computer Symbiosis* (1960) which outlines the vision that led to the personal computer revolution of the 1970s; his *Intergalactic Network* memo (1963) which outlines the vision that inspired the internet; and *The Computer as a Communication Device* (1968) coauthored with Robert Taylor which amplifies his vision for what the network could become. **Conceptual Structures: Fulfilling Peirce's Dream** Dickson

Cinema is a dream Andrea Rabbito,2017-05-30T00:00:00+02:00 The emergence and spread of new images photography film television and audiovisual have brought about an important epistemological revolution that has encouraged contemporary man to have a new attitude of confidence not only towards the image but also to reality The modern knowledge that exploded man s certainties into hundreds of relative truths has been removed The perfect doubling of reality offered by the new media has quietly eliminated doubt about the faithful restitution of reality into images and consequently into the events of the outside world Opposing this credulity this mental breakdown as Joseph Conrad called it we will need to recover the principles and themes of modern thought that came into existence in the Seventeenth century This recovery will serve not only to oppose illusions and deceits but also to understand the nature of the new images better
