The Emergence Of Dialectical Theory Philosophy Political Inquiry:

The Emergence of Dialectical Theory Scott Warren, 1984 Scott Warren's ambitious and enduring work sets out to resolve the ongoing identity crisis of contemporary political inquiry. In *The Emergence of Dialectical Theory* Warren begins with a careful analysis of the philosophical foundations of dialectical theory in the thought of Kant, Hegel, and Marx. He then examines how the dialectic functions in the major twentieth-century philosophical movements of existentialism, phenomenology, neo-Marxism, and critical theory. Numerous major and minor philosophers are discussed, but the emphasis falls on two of the greatest dialectical thinkers of the previous century: Maurice Merleau-Ponty and Jürgen Habermas. Warren's shrewd critique is indispensable to those interested in the history of social and political thought and the philosophical foundations of political theory. His work offers an alternative for those who find postmodernism to be at a philosophical impasse.

The Restructuring of International Relations Theory Mark A. Neufeld, 1995-09-14 Arguing for a theory of international politics committed to human emancipation, this text suggests that international relations theory must move in a nonpositivist direction. It explores recent developments in the discipline, including critical, Gramscian, postmodernist, feminist, and normative approaches.

Dark Traces of the Past Jürgen Straub, Jörn Rüsen, 2011-12-01 The relationship between historical studies and psychoanalysis remains an open debate that is full of tension in both a positive and a negative sense. In particular, the following question has not been answered satisfactorily: what distinguishes a psychoanalytically oriented study of historical realities from a historical psychoanalysis? Skepticism and fear of collaboration dominate on both sides. Initiating a productive dialogue between historical studies and psychoanalysis seems to be plagued by ignorance and at times a sense of helplessness. Interdisciplinary collaborations are rare. Empirical research, formulation of theory, and the development of methods are essentially carried out within the conventional disciplinary boundaries. This volume undertakes to overcome these limitations by combining psychoanalytical and historical perspectives and thus exploring the underlying unconscious dimensions and by informing academic and nonacademic forms of historical memory. Moreover, it puts special emphasis on transgenerational forms of remembrance, on the notion of trauma as a key concept in this field, and on case studies that point

and political catchphrases from the banality of evil and Big Brother to the war of all against all **Merleau-Ponty and the Foundation of Existential Politics** Kerry H. Whiteside, 2014-07-14 Drawing on previously unexplored sources Kerry H. Whiteside presents the political theory of Maurice Merleau-Ponty 1908-1961 one of France's best known twentieth-century philosophers. Whiteside argues that Merleau-Ponty's objective in his political writings was to make existentialism into the foundation for a philosophically consistent mode of political thinking. This study discusses the inadequacies Merleau-Ponty found in the traditional philosophies of empiricism and idealism and then examines the subject-object dualism that he believed deprived previous forms of existentialism of political significance. Whiteside shows how Merleau-Ponty overcame these problems by grounding political reasoning in a theory of consciousness that emphasized both its individuality and its need for socially created meaning. After explaining Merleau-Ponty's modifications of the views of Sartre, Aron, and others, the book investigates how he applied his political theory in editorial exchanges with Communists and liberals. Throughout this study, Whiteside traces and criticizes the changes in the philosopher's concept of Marxism and points to his many ideas that bear on current controversies in political theory. Knowing and History Michael S. Roth, 2019-06-30 Knowing and History charts the development of Hegelian philosophy of history in France from the 1930s through the postwar period and critically assesses its significance for an understanding of our cultural present and of the possibilities for making meaning out of change over time. Michael Roth provides detailed analyses of the works of three of the most important Hegelian thinkers: Jean Hyppolite, Alexandre Kojève, and Eric Weil. These philosophers turned to history as the source of truths and criteria of judgment; they forged connections between history and knowing as a means of confronting key modern philosophical problems and of engaging their contemporary political concerns. By the 1950s, however, they had withdrawn from the historical in search of a more secure, hopeful subject for reflection. According to Roth, the French Hegelians' work illuminates the power and limitations of the philosophical approach to history. Further, he finds in the development of their philosophies one of the crucial transformations in modern intellectual history: the shift from a concern with questions of significance to a concern with questions of use or function. He seeks to explicate the contemporary retreat from questions of significance by situating our cultural moment in relation to its intellectual antecedents. In an Afterword devoted to French post-structuralism, the author discusses Hegel's replacement by Nietzsche as the locus of philosophical authority in France in the 1960s and examines how this shift informs the work of Michel Foucault. Roth argues that the use of Nietzsche against a dialectical philosophy of history contributes to a serious disjunction between

philosophical reflection and political judgment Relevant to a wide variety of disciplines Knowing and History will appeal to those specializing in intellectual history and political theory as well as philosophers of history critical theorists and students of modern French thought and culture The Political Theory of Liberation Theology John R. Pottenger,1989-01-01

Edwards,2018-07-12 How does the preacher know what God might say now based upon the many things God said then Preachers and theologians throughout Christian history have grappled with Scripture's diverse emphases alongside the urgent task of declaring the authoritative Word of God in the contemporary pulpit Aaron Edwards offers a new way of engaging with this problem by exploring the theological relationship between biblical dialectics and heraldic proclamation Edwards highlights the theological necessity of dialectical variety without forfeiting assertiveness in the prophetic moment of preaching A vast array of key voices from the theological tradition are drawn upon including Augustine Aquinas Eckhart Luther Calvin Hegel Kierkegaard Chesterton Barth Bultmann Tillich Ebeling and others to navigate the connection between Scriptural unity clarity and paradoxical plurivocality leading to a nuanced account of dialectic Applying this to the homiletically neglected concept of heraldic confidence in preaching Edwards examines the theological possibility of preaching in light of dialectical complexity via its prophetic dimension He shows how the uniquely revelatory relationship of Word and Spirit enables Scriptural illumination prophetic discernment and dialectical decisiveness in the momentary encounter which undergirds all Christian proclamation
