## **The Emergence Of Stability In The Industrial City Manchester 1832-67:**

The Emergence of Stability in the Industrial City Martin Hewitt, 2016-12-05 The rapid eclipse of Chartism and the relative tranquility of the period 1848-67 has been one of the most enduring puzzles of nineteenth century British history. This book takes a fresh look at this conundrum treating the period between the Reform Acts of 1832 and 1867 as a coherent whole for the first time. It suggests that previous depictions of 1848 as a watershed in British history have both exaggerated the nature of the transitions which occurred at mid century and have over estimated both the collapse of radical attitudes and the fading of working class resentment. The experiences of the Manchester working class show that poverty, unemployment and hardship persisted through the mid Victorian boom. While some workers may have taken advantage of economic opportunities and the various movements of social and moral reform promoted by the middle class to acquire respectability in general, attempts at middle class moral imperialism brought only marginal changes to popular culture and attitudes. Instead, it is argued, the roots of the radical collapse and of political stability lie elsewhere in the initial failure of radical leaders to sustain a firm consensus on effective strategies of reform and in changes in the political culture of the mid century city which closed off spaces in which independent working class politics could continue to function. In the context of the most important industrial city of the era, this study provides a wide ranging analysis of the complex forces which forged the uneasy compromise on which mid nineteenth century stability rested. **Leonardo to the Internet** Thomas J. Misa, 2022-02-22

Now updated: A comprehensive 500 year history of technology in society. Historian Thomas J. Misa's sweeping history of the relationship between technology and society over the past 500 years reveals how technological innovations have shaped and have been shaped by the cultures in which they arose. Spanning the preindustrial past, the age of scientific, political and industrial revolutions, as well as the more recent eras of imperialism, modernism and global security, this compelling work evaluates what Misa calls the question of technology. In this edition, Misa brings his acclaimed text up to date by drawing on current scholarship while retaining sharply drawn portraits of individual people, artifacts and systems. Each chapter has been honed to relate to contemporary concerns. Globalization, Misa argues, looks differently considering today's virulent nationalism, cultural chauvinism and trade wars. A new chapter focuses on the digital age from 1990 to 2016. The book also examines how today's unsustainable energy systems, insecure information networks and vulnerable global shipping have helped foster geopolitical risks and instability, and takes a look at the coronavirus pandemic from the perspective of Wuhan, China's high tech district. A masterful analysis of how technology and culture have influenced each other over five centuries, *Leonardo to the Internet* frames a history that illuminates modern day problems and prospects faced by our technology dependent world. **Chivalry and the Medieval Past** Katie Stevenson, Barbara Gribling, 2016 An examination of the ways in which the fluid concept of chivalry has been used and appropriated after the Middle Ages. One of the most difficult and complex ethical and cultural codes to define, chivalry has proved a flexible, ever changing phenomenon constantly adapted in

the hands of medieval knights Renaissance princes early modern antiquarians Enlightenment scholars modern civic authorities authors historians and re enactors This book explores the rich variations in how the Middle Ages were conceptualised and historicised to illuminate the plurality of uses of the past Using chivalry as a lens through which to examine concepts and uses of the medieval it provides a critical assessment of the ways in which medieval chivalry became a shorthand to express contemporary ideals powerfully demonstrating the ways in which history could be appropriated The chapters combine attention to documentary evidence with what material culture can tell us in particular using the built environment and the landscape as sources to understand how the medieval past was renegotiated With contributions spanning diverse geographic regions and periods it redraws current chronological boundaries by considering medievalism from the late Middle Ages to the present Katie Stevenson is Senior Lecturer in Late Mediaeval History and Director of the Institute of Scottish Historical Research at the University of St Andrews Barbara Gribling is a Junior Research Fellow in the Department of History at Durham University Contributors David W Allan Stefan Goebel Barbara Gribling Steven C Hughes Peter N Lindfield Antti Matikkala Rosemary Mitchell Paul Pickering Katie Stevenson

**The British Working Class 1832-1940** Andrew August,2014-06-11 In this insightful new study Andrew August examines the British working class in the period when Britain became a mature industrial power working men and women dominated massive new urban populations and the extension of suffrage brought them into the political nation for the first time Framing his subject chronologically but treating it thematically August gives a vivid account of working class life between the mid nineteenth and mid twentieth centuries examining the issues and concerns central to working class identity Identifying shared patterns of experience in the lives of workers he avoids the limitations of both traditional historiography dominated by economic determinism and party politics and the revisionism which too readily dismisses the importance of class in British society

*Urban Politics and Space in the Nineteenth and Twentieth Centuries* Barry M. Doyle,2009-10-02 This book addresses the increasing regionalisation of urban governance and politics in an era of industrialisation suburbanisation and welfare extension It provides an important reassessment of the role structure and activities of urban elites highlighting their vitality and their interdependence and demonstrating the increasing regionalisation of municipal politics as towns sought to promote themselves extend services and even expand physically onto a regional level Moreover it explores the discourses surrounding space in which gender class morality and community all feature prominently How urban space and its uses were defined and redefined became key political weapons across the regions of England in the nineteenth century and these chapters show how a range of sources maps poems songs paintings illustrated journalism social investigations historical texts were employed by contemporaries to shape the urban and its image often by placing it in a regional context or contributing to the creation of a regional image and identity This collection illustrates the continuing vitality of the study of urban politics and governance and presents a rare attempt to place English

urban history in a regional context Barry Doyle has assembled an impressive team of experts on urban politics to examine not just party politics but the wider machinery of government the boards agencies and committees that shaped British towns and cities after 1830 Space and place were contested and negotiated and a distinctive sense of local identity emerged In so doing the collection challenges some of the generalisations about the governance of urban Britain and reminds us that despite a shrinking globe the local and regional are crucial to our everyday lives The book should be read by all interested in and especially those working for local government Professor Richard Rodger University of Edinburgh In **Urban Politics and Urban Space in the Nineteenth and Twentieth Centuries Regional Perspectives** Barry Doyle brings together nine original essays by both established and younger authors to explore three inter related themes in urban history politics space and region from the early to mid nineteenth century to the mid twentieth century The book is conveniently divided into three sections dealing with structures of politics politics institutions and urban management and governance discourses and space Each of the contributions to this volume promises to both enrich our knowledge of specific moments in British politico urban development through the study of discrete developments in time and space and to open up and extend the debate on the British variant of urban modernity Each examines the ways in which local power space and regional relations developed and changed between the early nineteenth and mid twentieth century Localities their politics and communal identities are never really far from a national context indeed they largely shaped it as these essays make clear Doyle is to be commended for his endeavour not just as the editor but in particular for his introduction to the volume In a richly referenced essay that comes in at just over seven and half thousand words he casts a panoramic view over the field in the last few decades making connections where few contemporary urban historians care to tread Doyle gives us a forceful challenge to what he sees as a particularly English malaise in this period namely that of failing to recognise the potential of regional and local government to shape and manage the major reallocation of space and power a vital sphere of public life that is contemporary to our own times It is a masterly and well informed piece of writing that will set the standard for some years to come Professor Anthony McElligott University of Limerick

**Chartism** Malcolm Chase, 2013-07-19 Chartism the

mass movement for democratic rights dominated British domestic politics in the late 1830s and 1840s. It mobilised over three million supporters at its height. Few modern European social movements certainly in Britain have captured the attention of posterity to quite the extent it has done. Encompassing moments of great drama, it is one of the very rare points in British history where it is legitimate to speculate how close the country came to revolution. It is also pivotal to debates around continuity and change in Victorian Britain: gender, language and identity. Chartism: A New History is the only book to offer in depth coverage of the entire chronological spread 1838-58 of this pivotal movement and to consider its rich and varied history in full. Based throughout on original research including newly discovered material, this is a vivid and compelling narrative of a movement which mobilised three million people at its height. The author deftly intertwines analysis and narrative, interspersing his chapters with short Chartist Lives relating the intimate and personal to the realm of the social and political. This book will become essential reading for anyone with an interest in early Victorian Britain: specialists, students and general readers alike.

***Making News*** Richard R. John, Jonathan Silberstein-Loeb, 2015. This book charts the rise and fall of the newspaper as the primary medium for the conveyance of news. The book focuses on two of the most influential media markets in the modern world: Great Britain and the United States between 1688 and 1995. In 1688, Parliament created institutional arrangements that would hasten the rise of the newspaper as the dominant medium for the circulation of news. In 1995, the National Science Foundation commercialized the Internet, encouraging an astonishing proliferation of information on all manner of topics, including the news. Per capita newspaper circulation had been declining for decades, partly due to shifting social norms and partly due to the rise of broadcast news. The Internet exacerbated this trend, partly because it provided a cheaper news source and partly because it quickly became a superior vehicle for advertising, a major source of revenue for newspaper publishers for over two hundred years. However, only rarely has advertising revenue and direct sales covered costs. Almost never has the demand for news generated the revenue necessary for its supply. Non-market institutional arrangements have ranged from direct government subsidies to organizational forms that enabled news organizations to cooperate. From a historical perspective, the large profits reaped by a handful of newspaper publishers in the post-Second World War era were anomalous and in no sense a baseline for public policy. Never again will the newspaper be the dominant news medium. To guarantee an informed citizenry in the future, it is necessary to understand how the news business worked in the past. This book is organized around eight essays, each written by a distinguished specialist and each explicitly comparative. Its theme is the indispensability in both Great Britain and the United States of non-market institutional arrangements in the provisioning of news.

**Manchester's Radical Mayor** Joanna M. Williams,Jeremy Roberts,2017-09-01 Known in his day as the man who built the Town Hall Abel Heywood was a leading Manchester publisher who entertained royalty at his home and twice became Mayor of Manchester Yet before he found success his life was one of poverty and hardship marked by a prison term in his pursuit of a free press A campaigner for votes for all and social reform Heywood attempted to enter Parliament twice but his working class origins and radical ideas proved an insurmountable obstacle As councillor alderman and mayor he worked passionately and tirelessly to build the road railway and tram systems develop education improve the provision of hospitals museums and libraries better the living conditions of the poor and make Manchester a great city Going beyond the experiences of one man this book explores the wider political cultural and class context of the Victorian city It is an honest tale of rags to riches that will appeal to all who wish to discover more about the dramatic history of industrial Manchester and its people

**Leisure, citizenship and working-class men in Britain, 1850-1940** Brad Beaven,2013-07-19 From the bawdy audience of a Victorian Penny Gaff to the excitable crowd of an early twentieth century football match working class male leisure proved to be a contentious issue for contemporary observers For middle class social reformers from across the political spectrum the spectacle of popular leisure offered a view of working class habits and a means by which lifestyles and behaviour could be assessed For the mid Victorians gingerly stepping into a new mass democratic age the desire to create a bond between the recently enfranchised male worker and the nation was more important than ever This trend continued as those in governance perceived that good leisure and citizenship could fend off challenges to social stability such as imperial decline the mass degenerate city hooliganism civic and voter apathy and fascism Thus between 1850 and 1945 the issue of male leisure became enmeshed with changing contemporary debates on the encroaching mass society and its implications for good citizenry Working class culture has often been depicted as an atomised and fragmented entity lacking any significant cultural contestation Drawing on a wealth of primary and secondary source material this book powerfully

challenges these recent assumptions and places social class centre stage once more Arguing that there was a remarkable continuity in male working class culture between 1850 and 1945 Beaven contends that despite changing socio economic contexts male working class culture continued to draw from a tradition of active participation and cultural contestation that was both class and gender exclusive This lively and readable book draws from fascinating accounts from those who participated in and observed contemporary popular leisure making it of importance to students and teachers of social history popular culture urban history historical geography historical sociology and cultural studies

**Poverty and Protest as Public Discourse during the Cotton Crisis** Rachel Broady,2024-12-16 This book constitutes the first book length study of journalistic responses to poverty and protest during the Lancashire cotton crisis The cotton crisis of 1861 1865 is a popular subject in history culture and education Workers voices are comprehensively studied in terms of newspapers publishing fiction and poetry and the broader political response to the crisis the American Civil War and British workers support of Lincoln s Emancipation Proclamation They are though overlooked in terms of journalistic representation of workers Ironically discussions of the cotton crisis including where efforts are made to assess the workers experience have consistently relied upon journalism as primary sources and the first witness of history without assessing the news copy s political unconscious This lack of attention is especially apparent when considering workers challenging poverty through dedicated protest Amid the celebrated workers opposition to slavery and their sublime heroism as noted by American President Abraham Lincoln there were less studied local struggles for financial help for education and for the vote

**Lecturing the Victorians** Anne B. Rodrick,2024-07-25 We are a much lectured people wrote Robert Spence Watson in 1897 Beginning at mid century cities and towns across England used the popular lecture for purposes ranging from serious education to effervescent entertainment and from regional pride to imperial belonging Over time the popular lecture became the quintessential embodiment of Victorian knowledge based culture which itself ranged from the production of new knowledge in the most elite of learned societies to the consumption of established knowledge in middle class clubs and the hundreds of humble mechanics institutions initially founded to provide scientific instruction to workers What did the average Victorian talk and think about How did the knowledge based culture of lecture and debate enable men and women to demonstrate both civic engagement and cultural competence How does this knowledge based culture and its changing expression give us ways to look at Victorian citizenship long before the extension of the franchise With engaging and accessible prose Anne Rodrick draws from a variety of primary sources to provide fascinating answers to these pertinent questions Based on the analysis of several thousand lectures and debates delivered over more than 50 years this book digs deeply into what those individuals below the most elite levels thought heard debated and claimed as a badge of cultural competence By the turn of the 20th century the popular lecture was competing for attention with new institutions of leisure and of higher education and the discourse surrounding its place in contemporary England helps illuminate important debates over access to and deployment

of knowledge and culture      **A Victorian Woman's Place** Simon Morgan, 2007-01-26 While the image of bourgeois Victorian women as angels in the house isolated from the world in private domesticity has long been dismissed as an unrealistic ideal women have remained marginalised in many recent accounts of the public culture of the middle class Simon Morgan aims to redress the balance By drawing on a variety of sources including private documents he argues that women actually played an important role in the formation of the public identity of the Victorian middle class Through their support for cultural and philanthropic associations and their engagement in political campaigns women developed a nascent civic identity which for some informed their later demands for political rights *Middle Class Women and Victorian Public Culture* offers numerous insights for the reader into the public lives of women in this fascinating period      **Women, Welfare and Local Politics, 1880-1920** Steven King, 2010-04-07 Offers a reappraisal of the role of women in the politics and practice of welfare in late Victorian and early Edwardian England Using a working diary written by the activist and female poor law guardian Mary Haslam this book portrays Bolton women as sophisticated political operators      Middle-Class Life in Victorian Belfast Alice Johnson, 2020-02-29 This book vividly reconstructs the social world of upper middle class Belfast during the time of the city's greatest growth between the 1830s and the 1880s Using extensive primary material including personal correspondence memoirs diaries and newspapers the author draws a rich portrait of Belfast society and explores both the public and inner lives of Victorian bourgeois families Leading business families like the Corrys and the Workmans alongside their professional counterparts dominated Victorian Belfast's civic affairs taking pride in their locale and investing their time and money in improving it This social group displayed a strong work ethic a business oriented attitude and religious commitment and its female members led active lives in the domains of family church and philanthropy While the Belfast bourgeoisie had parallels with other British urban elites they inhabited a unique place and time Linenopolis was the only industrial city in Ireland a city that was neither fully Irish nor fully British and at the very time that its industry boomed an unusually violent form of sectarianism emerged *Middle Class Life in Victorian Belfast* provides a fresh examination of familiar themes such as civic activism working lives philanthropy associational culture evangelicalism recreation marriage and family life and represents a substantial and important contribution to Irish social history      *Women and the People* Helen Rogers, 2017-05-15 Based on extensive new research investigating the range of women's involvement in early nineteenth century popular politics mid Victorian reform and the women's movements of the late century *Women and the People* makes an original intervention in the historiography of the radical tradition by exploring the interconnections of populism liberalism and feminism Attending to authorship the study argues that the representational forms adopted by radicals were as important as the content of what they said in shaping their self perception their construction of others and the reception of their ideas In fiction poetry and autobiography as well as in political writing speeches and journalism women reworked radical conventions and imagined new models of political identity participation and authority Though in general

radicals appealed to the people women were often positioned as the suffering objects of reform rather than as the agents of change By showing how they challenged or reinforced these conceptions of women and the people the book contends that radical women invoked alternative communities of sex class and nation and helped to remake and discipline the political sphere as they strove to make it their own
