China: The Balance Sheet C. Fred Bergsten,Bates Gill,Nicholas R. Lardy,Derek Mitchell,2007-03-13 China s emergence as a major international power is perhaps the most important development in world affairs of the 21st century Now this book provides an indispensable survey of that country the world s largest a vast land with 1 4 billion people and the world s most dynamic economy Over the past year Dr Bates Gill C Fred Bergsten Nicholas R Lardy and Derek Mitchell have led four task forces through a rigorous exercise of investigation and intelligence compiling and analyzing the authoritative data on China s economy foreign and domestic policy and national security Now that material has been shaped into an accessible narrative filled with facts but written for the general reader The expert judgements presented in China The Balance Sheet will inform policymakers in Washintgon scholars and the business community for years to come The Emergence of China Throughout Asia United States. Congress. Senate. Committee on Foreign Relations. Subcommittee on East Asian and Pacific Affairs,2006 Huawei Goes Global Wenxian Zhang,Ilan Alon,Christoph Lattemann,2020-10-22 Huawei Goes Global provides a much needed comprehensive and scholarly examination of the business environment and the striving global operations of China s technology giant With theoretical research case studies data analysis and empirical studies this two volume work tells a fascinating story of internationalization in an emerging economy As one of the most powerful Chinese companies in the global economy the largest global telecommunications equipment producer and a leading consumer electronics manufacturer Huawei is a great example of the globalization of the Chinese enterprises in the twenty first century In Volume I scholars critically examine the rise of Huawei as a Chinese global enterprise from the political economy and public policy perspectives as well as Huawei s development strategies innovations and talent management In Volume II multiple authors carefully study the growth of Huawei from regional and geopolitical perspectives and its corporate communication and crisis management Within the framework of the trade conflicts between China and the US controversies over economic sanctions intellectual property disputes and espionage and cyber security concerns this groundbreaking work makes an important contribution to both academic literature and the ongoing public discourse on

Huawei Volume II is available here <https://www.palgrave.com/gp/book/9783030475789> *The New Presence of China in Africa* Meine Pieter van Dijk, 2009 This book describes China's growing range of activities in Africa especially in the sub-Saharan region. The three most important instruments China has at its disposal in Africa are development aid, investments and trade policy. The Chinese government, which believes the Western development aid model has failed, is looking for new forms of aid and development in Africa. China's economic success can partly be ascribed to the huge availability of cheap labour which is primarily employed in export-oriented industries. China is looking for the required raw materials in Africa and for new marketplaces. Investments are being made on a large scale in Africa by Chinese state-controlled firms and private companies, particularly in the oil-producing countries Angola, Nigeria and Sudan, and countries rich in minerals Zambia. Third, the trade policy China is conducting is analysed in China and compared with that of Europe and the United States. In case studies, the specific situation in several African countries is examined. In Zambia, the mining industry, construction and agriculture are described. One case study of Sudan deals with the political presence of China in Sudan and the extent to which Chinese arms suppliers contributed to the current crisis in Darfur. The possibility of Chinese diplomacy offering a solution in that conflict is discussed. The conclusion considers whether social responsibility can be expected of the Chinese government and companies and if this is desirable and to what extent the Chinese model in Africa can act as an example or not for the West. Publisher's description *The World Under Pressure* Carl Dahlman, 2011-11-09 The rapid rise of China and India is reshaping our global economic and environmental systems, raising major issues of stability, governance and sustainability. This book develops a framework that shows the interdependence between economic size, trade, finance, technology, environment, security and global governance. Author Carl J. Dahlman uses this framework to provide data on the speed of global power shifts and to trace the implications for nations worldwide. Analyzing this critical moment in historical context, he offers insights into our most pressing concerns. Specifically, China and India's unchecked growth has the potential to ignite trade, resource, cold and conventional wars. Moreover, these nations could set in motion monumental challenges related to climate change. The text warns that the current international governance system is not up to the challenges of defusing these frictions. Major powers, including China and India, must do more to address the gathering storm. Developing sustainable economic and social relationships will be a most difficult charge, but the cost of putting off reforms will be lower global welfare. Dahlman ends the book with starting points for change **Science, Technology, and Global Economic Competitiveness** United States. Congress. House. Committee on Science, 2006
