*The Way of the Cross* Julius Bautista, 2019-09-30 Every year during Holy Week in the Philippine province of Pampanga hundreds of men and women undergo acts of excruciating self-inflicted pain in ways that evoke the Way of the Cross the torment and crucifixion that Christ endured in the last days of his earthly existence Because these Passion rituals are officially disavowed by the Filipino Roman Catholic Church most observers view them as irrational and extremist mimicry of Christ's painful ordeal Even scholars conventionally depict them as theatrical spectacle or macabre examples of Filipino folk religion But what conditions enable ritual actors to submit to such extreme pain What justifications do they give for going against official prohibitions What outcomes do they seek in channeling Christian piety in this way This book addresses these questions through its in-depth analyses of three interconnected ritual acts the *pabasa* a days-long communal chanting of Christ's Passion story the *pagdarama* the public self-flagellation of hundreds of devotees and the *pamamaku* *king krus* in which steel nails are driven through the palms and feet of ritual practitioners as part of a street play performed in front of tens of thousands of spectators Author Julius Bautista suggests that such ritual acts manifest the embodied physicality of a suffering selfhood that facilitates the expression of heartfelt sentiments of pity empathy trust and bereavement By emphasizing these outwardly focused human sensibilities as the wellsprings of ritual agency he demonstrates that Passion rituals are reinterpretations of the very idea and experience of pain hardship and suffering and premised on an appeal for a certain kind of divine intimacy The author draws on a decade of in-depth and often exclusive interviews with a host of local stakeholders including ritual practitioners clerics scholars and government officials and his own participation in a Passion

play Ethnographic insight is considered alongside primary and secondary archival sources including unpublished locally produced oral historical accounts and a survey of relevant media coverage The Way of the Cross makes a welcome contribution to the anthropology of religion by examining the unique ontological contexts in which ritual agents experience God's involvement in their lives

Morality's Muddy Waters George Cotkin, 2011-06-06 In the face of an uncertain and dangerous world Americans yearn for a firm moral compass a clear set of ethical guidelines But as history shows by reducing complex situations to simple cases of right or wrong we often go astray In *Morality's Muddy Waters* historian George Cotkin offers a clarion call on behalf of moral complexity Revisiting several defining moments in the twentieth century the American bombing of civilians during World War II the My Lai massacre racism in the South capital punishment the invasion of Iraq Cotkin chronicles how historical figures have grappled with the problem of evil and moral responsibility sometimes successfully oftentimes not In the process he offers a wide ranging tour of modern American history Taken together Cotkin maintains these episodes reveal that the central concepts of morality evil empathy and virtue are both necessary and troubling Without empathy for example we fail to inhabit the world of others with it we sometimes elevate individual suffering over political complexities For Cotkin close historical analysis may help reenergize these concepts for ethical thinking and acting *Morality's Muddy Waters* argues for a moral turn in the way we study and think about history maintaining that even when answers to ethical dilemmas prove elusive the act of grappling with them is invaluable

*Ascending Republic* Patrick Luiz Sullivan De Oliveira, 2025-06-10 Why and how the French made the balloon into one of the quintessential symbols of late nineteenth century modernity and how the balloon's reinvention shaped the airplane's assimilation in the early years of aviation On August 27 1783 a large crowd gathered in Paris to watch the first ascent of a hydrogen balloon Despite the initial feverish enthusiasm by the mid nineteenth century the balloon remained relatively unchanged and was no longer seen as the harbinger of a new era Yet that all changed in the last third of the century when following the traumatic Franco Prussian War defeat the balloon reemerged to become the modern artifact that captured the attention of many Through this process the balloon became an important symbol of the fledgling Third Republic and France established itself as the world leader in flight In *Ascending Republic* Patrick Luiz Sullivan De Oliveira tells for the first time the story of this surprising revival Through extensive research in the press and archives in France the United States and Brazil De Oliveira argues that French civil society cultivated popular enthusiasm for flight what historians call air-mindedness decades before the advent of the airplane Champions of French ballooning made the case that if the British Royal Navy controlled the seas and the Imperial German

Army dominated the continent then France needed to take ownership of the skies The French appropriated this newly imagined geopolitical space through a variety of practices from republican savants who studied the atmosphere at high altitudes to aristocrats who organized transcontinental long distance competitions All of this made Paris into the global capital of a thriving aeronautical culture that incorporated seemingly contradictory visions of sacrificial patriotism aristocratic modernity colonial anxiety and technological cosmopolitanism

How That Robot Made Me Feel Ericka Johnson, 2025-05-20 An edited collection that explores what emotions we have when encountering robots how we react emotionally to them in different contexts and why these emotional responses are so important Do robots or the AI that is driving them have emotions That is a hotly debated topic both in science fiction where such assertions are a staple of the narrative and in tech development where it often makes headlines But what about how we humans emotionally respond to robots Are our emotional responses any less important when it comes to how the robots we encounter today are designed In *How That Robot Made Me Feel* Ericka Johnson asks the authors in this collection to critically examine our emotional and affective responses to robots and what such an examination would do to the way roboticists use or toy with our emotions in their design decisions The narrative arc of this anthology follows the question of just whose emotions are being engaged through robotic interactions why and for what design ends Of course the answer is that it is our emotions that are interesting And these emotions are not universal despite the historically universalist paradigm of AI and how robotic emotions work Emotions are contingent to borrow a commonly used phrase in feminist technoscience They are placed in space time and cultural context And understanding how they are produced and engaged with will help clarify many of the political aspects of robotic interaction that are currently concealed by the shiny and allegedly neutral surfaces of robots
