in contrast with the many theories of emergence or complexity that rely on some underlying force or law the Synergism Hypothesis as Peter Corning calls it is in essence an economic theory of biological complexity it is fully consistent with mainstream evolutionary biology Corning refers to it as Holistic Darwinism Among the many important insights that are provided by this new paradigm Corning presents a scenario in which the human species invented itself synergistic behavioral and technological innovations were the pacemakers of our biological evolution Synergy has also been the key to the evolution of complex modern societies he concludes *The Great Referendum* , **Scientists as Writers** James
