Tripathi,Dushyant Kumar Singh,Sanjeevikumar Padmanaban,P. Raja,2021-04-13 There is not a single industry which will not be transformed by machine learning and Internet of Things IoT IoT and machine learning have altogether changed the technological scenario by letting the user monitor and control things based on the prediction made by machine learning algorithms There has been substantial progress in the usage of platforms technologies and applications that are based on these technologies These breakthrough technologies affect not just the software perspective of the industry but they cut across areas like smart cities smart healthcare smart retail smart monitoring control and others Because of these game changers governments along with top companies around the world are investing heavily in its research and development Keeping pace with the latest trends endless research and new developments is paramount to innovate systems that are not only user friendly but also speak to the growing needs and demands of society This volume is focused on saving energy at different levels of design and automation including the concept of machine learning automation and prediction modeling It also deals with the design and analysis for IoT enabled systems including energy saving aspects at different level of operation The editors and contributors also cover the fundamental concepts of IoT and machine learning including the latest research technological developments and practical applications Valuable as a learning tool for beginners in this area as well as a daily reference for engineers and scientists working in the area of IoT and machine technology this is a must have for any library

Inevitable Aging? Annette Baudisch,2008-01-08 Aging is inevitable this is gerontological dogma And humans do inevitably grow old which is probably why it seems so unlikely to us that other forms of life could escape aging Escaping aging is not escaping death Death is an inherent part of life and it can strike any time But the question is whether death necessarily becomes more likely as life proceeds And it does not The theoretical results in this monograph indicate that life provides alternative strategies While some organisms will deteriorate over adult ages for others mortality appears to fall or remain constant at least over an extended period of life after reproductive maturity This is empirically observed especially for species that keep on growing during adult ages Perhaps the diversity of aging matches the diversity of life My thesis the central insight of this monograph is to deeply understand why some species age it is necessary to understand why other species do not

Merolla,Jeffrey A. Hall,2025-02-11 A deep dive into the importance of daily communication and how we can harness its power to create a better life We spend much of our waking lives communicating with others How does each moment of interaction shape not only our relationships but also our worldviews And how can we create moments of connection that improve our health and well being particularly in a world in which people are feeling increasingly isolated Drawing from their extensive research Andy J Merolla

and Jeffrey A Hall establish a new way to think about our relational life as existing within social biomes complex ecosystems of moments of interaction with others Each interaction we have no matter how unimportant or mundane it might seem is a building block of our identities and beliefs Consequently the choices we make about how we interact and who we interact with and whether we interact at all matter more than we might know Merolla and Hall offer a sympathetic practical guide to our vital yet complicated social lives and propose realistic ways to embrace and enhance connection and hope
