**The English Bowman in the Hundred Years War** M J Trow, 2025-10-30 They were often half starved marching through an alien land with few signposts and no maps They were often suffering from dysentery their legwear rolled down and they sometimes fought naked from the waist down They were paid 6d a day the same as a civilian craftsman and they swore like the troopers they were That was why the French called them the Goddamns and king and peasant alike were terrified of them With their yew wood bows and ash arrows a clothyard long they were the victors in countless clashes during the Hundred Years War and in the three great battles of Crecy Poitiers and Agincourt They robbed pillaged raped and murdered often in their king s name Yet they won battles and it is no exaggeration to say that England became a powerful nation state because of them If they were caught in action by the enemy they would have their bow fingers cut off and their throats slit We know the names of very few of them They were not worthy of ransom unlike the knights they fought for Most of them ended up in mass burial pits or some unmarked plot beside a French road The vast majority was illiterate so we have no firsthand accounts of their campaigns from the bowmen themselves For all they won battles and renown for all they helped indirectly to increase the power of the common man they are like ghosts drifting over the battlefield They were the bowmen

**The English and French Navies, 1500-1650** Benjamin W. D. Redding, 2022 Challenges the received wisdom about the relative weakness of French naval power when compared with that of England This book traces the advances and deterioration of the early modern English and French sea forces and relates these changes to concurrent developments within the respective states Based on extensive original research in correspondence and memoirs official reports and accounts receipts of the exchequer and inventories in both France where the sources are disparate and dispersed and England the book explores the rise of both kingdoms naval resources from the early sixteenth to the mid seventeenth centuries As a comparative study it shows that in sharing the Channel and with both countries increasing their involvement in maritime affairs English and French naval expansion was intertwined Directly and indirectly the two kingdoms influenced their neighbours sea programmes The book first examines the administrative transformations of both navies then goes on to discuss fiscal and technological change and finally assesses the material expansion of the respective fleets In so doing it demonstrates the close relationship between naval power and state strength in early modern Europe One important argument challenges the received wisdom about the relative weakness of French naval power when compared with that of England
