The Gun Trail:

The Gun Trail Henry Andrew DeRosso,2015 Quinton a drifter stands by as a greedy rancher wreaks havoc throughout the region No one is safe not even cattle as his gang rides through the hills with a murderous intent However when they point their guns at Quinton he fights back and the range explodes into a bloody gun battle **The Gun Trail** H. DeRosso,2015-04-01 Quinton a drifter stands by as a greedy rancher wreaks havoc throughout the region No one is safe not even cattle as his gang rides through the hills with a murderous intent However when they point their guns at Quinton he fights back and the range explodes into a bloody gun battle **The Gun Trail** Tom Alberti,2014-04 Ethan Marconi had

grown soft sitting behind a desk When a shipment of revolutionary repeating rifles and pistols are stolen from the Marconi Arms Company of Denver he is ordered by his father to track and recover the arms In doing so he finds himself thrust into the middle of the Civil War **The Gun Trail** Thane Docker,1967 Specifications and Drawings of Patents Issued from

the United States Patent Office United States. Patent Office,1909 *The Handy Book of Gun Drill and Practical Instructor* Charles Hastings COLLETTE,1862 *The Guns of Normandy* George Blackburn,2012-03-26 In the weeks after D Day the

level of artillery action in Normandy was unprecedented In what was a relatively small area both sides bombarded each other relentlessly for three months each trying to overwhelm the other by sheer fire power The Guns of Normandy puts the reader in the front lines of this horrific battle In the most graphic and authentic detail it brings to life every aspect of a soldier s existence from the mortal terror of impending destruction to the unending fatigue to the giddy exhilaration at finding oneself still inexplicably alive The story of this crucial battle opens in England as the 4th Field Regiment receives news that something big is happening in France and that after long years of training they are finally going into action The troop ships set out from besieged London and arrive at the D Day beaches in the appalling aftermath of the landing What follows is the most harrowing and realistic account of what it is like to be in action as the very lead man in the attack an artillery observer calling in fire on enemy positions The story unfolds in the present tense giving the uncomfortably real sense that You are here The conditions under which the troops had to exist were horrific There was near constant terror of being hit by incoming shells prolonged lack of sleep boredom weakness from dysentery sudden and gruesome deaths of close friends and severe physical privation and mental anguish And in the face of all this men were called upon to perform heroic acts of bravery and they did Blackburn provides genuine insight to the nature of military service for the average Canadian soldier in the Second World War something that is all too often lacking in the accounts of armchair historians and television journalists The result is a classic account of war at the sharp end From the Hardcover edition *Official Gazette of the United States*

Rossi,2017-09-29 In 1978 the Social and Demographic Research Institute of the University of Massachusetts Amherst received a grant from the National Institute of Justice to undertake a comprehensive review of the literature on weapons crime and violence in the United States The purpose of the project is best described as a sifting and winnowing of the claims and counterclaims from both sides of the Great American Gun War the perennial struggle in American political life over what to do if anything about guns about violence and about crime The review and analysis of the available studies consumed the better part of three years the results of this work are contained in this volume The intention of any review is to take stock of the available fund of knowledge in some topical area Under the Gun is no different our goal has been to glean from the volumes of previous studies those facts that in our view seem firmly and certainly established those hypotheses that seem adequately supported by or at least approximately consistent with the best available research evidence and those areas or topics about which it seems we need to know a lot more than we do One of our major conclusions can be stated in advance despite the large number of studies that have been done many critically important questions have not been adequately researched and some of them have not been examined at all Much of the available research in the area of weapons and crime has been done by advocates for one or another policy position As a consequence the manifest intent of many studies is to persuade rather than to inform We have tried to approach the topic from a purely agnostic point of view treating as an open question what policies should be enacted with regard to gun or crime control Thus we have tried to judge each study on its own merits on the basis of the routine standards normally applied to social scientific research and not on the basis of how effectively it argues for a particular policy direction It would of course be presumptuous to claim that we have set aside all our own biases in conducting this study Whether or not our treatment is fair and objective is clearly something for the reader and not us to decide **Handbook for Gardner and Nordenfelt Rifle Calibre Machine Guns** ,1891 **Engineering** ,1900 **Cumulative Paperback Index, 1939-1959** R. Reginald,2009-12-01 This was the first bibliography and guide to the American mass market paperback book and it remains one of the most definitive The major index is by author and lists author title publisher book number year of publication and cover price The title index lists titles and authors only The publisher index provides a history of that imprint with addresses number ranges and general physical description of the books issued This is the place that all study of the American paperback must begin **German Self-Propelled Artillery Guns of the Second World War** Craig Moore,2019-03-19 One of the few books that explores the design and deployment of German artillery self propelled guns SPGs to support tanks and infantry during the Second World War A great reference book for military modellers historians and tank wargamers interested in German SPGs A comprehensive guide to German SPGs between 1939 and 1945 in one volume for the very first

time including previously unpublished information on the little known Hummel Wespe proving that at least twelve units were built Authentic camouflage suggestions for military modellers A single towed artillery gun required a team of six horses and nine men During the Second World War German engineers mounted an artillery gun on top of a tank chassis this new technology reduced the amount of valuable war resources as self propelled guns only required a four or five man crew They could also be made ready to fire more rapidly German Self Propelled Artillery Guns of the Second World War covers the development and use of this new weapon between 1939 and 1945 One type was successfully deployed in the invasion of France in 1940 and more were used on the Eastern Front against Soviet forces from 1941 until the end of the war The Desert Fox Ewin Rommel demanded artillery guns that could keep up with his panzers in North Africa He was sent 15 cm howitzers mounted on top of Panzer II tank chassis and captured French Army Lorraine 37L tracked armoured supply vehicles Rommel's forces in northern France were equipped with a variety of new self propelled guns which were used against the Allies on the beaches of Normandy during D Day in 1944 Includes 81 colour photographs The new Popular encyclopedia.
