Jardine,1913 *Human Factors in Lighting* Peter Robert Boyce,2014-04-07 The availability of electric lighting has changed the lives of people the world over yet as a major user of electricity it has come under increasing scrutiny in recent years This scrutiny has focused largely on the environmental consequences with little consideration of the benefits of lighting Human Factors in Lighting Third Edition restores **The role of body and environment in cognition** Dermot Lynott,Judith Holler,Louise Connell,2014-08-25

Recent evidence has shown many ways in which our bodies and the environment influence cognition In this Research Topic we aim to develop our understanding of cognition by considering the diverse and dynamic relationship between the language we use our bodily perceptions and our actions and interactions in the broader environment There are already many empirical effects illustrating the continuity of mind body environment manipulating body posture influences diverse areas such as mood hormonal responses and perception of risk directing attention to a particular sensory modality can affect language processing signal detection and memory performance placing implicit cues in the environment can impact upon social behaviours moral judgements and economic decision making This Research Topic includes papers that explore the question of how our bodies and the environment influence cognition such as how we mentally represent the world around us understand language reason about abstract concepts make judgements and decisions and interact with objects and other people Contributions focus on empirical theoretical methodological or modelling issues as well as opinion pieces or contrasting perspectives Topic areas include perception and action social cognition emotion language processing modality specific representations spatial representations gesture atypical embodiment perceptual simulation cognitive modelling and perspectives on the future of embodiment *The Neuropsychology of Attention* Ronald A. Cohen,2013-12-11 It has been 15

years since the original publication of *Neuropsychology of Attention*. At the time of its publication, attention was a construct that had long been of theoretical interest in the field of psychology and was receiving increased research by cognitive scientists. Yet attention was typically viewed as a nuisance variable, a factor that needed to be accounted for when assessing brain function but of limited importance in its own right. There is a need for a new edition of this book within *Neuropsychology* to present an updated and integrated review of what is known about attention, the disorders that affect it, and approaches to its clinical assessment and treatment. Such a book will provide perspectives for experimental neuropsychological study of attention and also provide clinicians with insights on how to approach this neuropsychological domain.

Commonwealth Caribbean Tort Law Gilbert Kodilinye, 2014-08-13 Tort law is a subject of primary importance in the study and practice of the common law in Caribbean jurisdictions. This work is now well established as the leading text on tort law in the region and this fifth edition has been updated throughout to incorporate developments in law and legal thinking, including special contributions on medical negligence and the misuse of private information from the Hon Justice Roy Anderson and Dr Vanessa Kodilinye. The accessible writing style and integration of up-to-date material enables students to grasp the salient points and develop a thorough understanding of Tort Law in the Caribbean. Although conceived primarily as a text for the LLB degree courses in Caribbean universities, *Commonwealth Caribbean Tort Law* is also essential reading for students preparing for the CAPE Law examinations and the various paralegal courses in the region. Legal practitioners will find the book useful as a work of ready reference and it will also be of interest to those business executives, industrialists, insurance agents and journalists who require some knowledge of this most important area of the law.
