Aeromobilities Saulo Cwerner, Sven Kesselring, John Urry, 2009-01-13 Aeromobilities is a collection of essays that tackle in many different ways the growing importance of aviation and air travel in our hypermobile globalized world Providing a multidisciplinary focus on issues ranging from global airports to the production of airspace from airline work to helicopters and from movement in airports to software systems Aeromobilities seeks to enhance our understanding of space time and mobility in the age of mass air travel From Sao Paulo to Sydney Aeromobilities draws on local experiences of airspaces to generate theory and research that are global in scope It is the first book of its kind bringing together a wide range of theoretical and methodological approaches to aviation and air travel in the social sciences and humanities while emphasizing the central role of aeromobilities in contemporary social relations In a world where virtually every aspect of social life is touched upon in one way or another by the complex global network of airline flows with its large passenger aircraft and iconic international airports Aeromobilities provides innovative analyses of some of the most fundamental and influential mobility networks of our time **Storms over the Mekong** William Pace Head, 2020-04-30 From the defeat of the Army of the Republic of Vietnam at Ap Bac to the battles of the Ia Drang Valley Khe Sanh and more Storms over the Mekong offers a reassessment of key turning points in the Vietnam War Award winning historian William P Head not only reexamines these pivotal battles but also provides a new interpretation on the course of the war in Southeast Asia In considering Operation Rolling Thunder for example which Head dubs as too much rolling and not enough thunder readers will grasp the full scope of the campaign from specifically targeted bridges in North Vietnam to the challenges of measuring success or failure the domestic political situation and how over time Head argues slowly but surely Rolling Thunder dug itself into a hole Likewise Head shows how the battles for Saigon and Hue during the Tet Offensive of 1968 were tactical defeats for the Communist

forces with as many as 40 000 killed and no real gains At the same time however Tet made it clear to many in Washington that victory in Vietnam would require a still greater commitment of men and resources far more than the American people were willing to invest Storms over the Mekong is a blow by blow account of the key military events to be sure But beyond that it is also a measured reconsideration of the battles and moments that Americans thought they already knew adding up to a new history of the Vietnam War
