**Between Imitation and Innovation** Robert Boyer,Elsie Charron,Ulrich Jurgens,Steven Tolliday,1998-11-19 Recent

years have seen intense debates among management and academics on the rise of lean production and Japanization. Some authors have stressed the universal impact of new forms of work organization and best practice while others have questioned the limits of convergence, stressed the weight of national contexts or societal effects or highlighted the evolutionary effects of unpredictability in the external environment. The international automobile industry has been a focus for much of this debate and this book, written by a team of leading international researchers in the field, uses this industry to examine in detail the actual practice of the transfer and adaptation of productive models and the trajectories of innovation, compromise and failure that can result. Case studies cover in detail the Japanese transplant experience in North America and the global experience of hybrid production systems in Europe, Latin America and Asia. The book contributes to theoretical discussions about the transfer, adaptation or convergence of productive models. In particular, the authors argue that direct transplantation or imitation of these models is rarely feasible or even desirable. Systems cannot be transferred without being significantly reshaped. Instead, the book focuses on the process of hybridization, the complex interaction of productive models with national and societal effects. Hybridization, it is argued, is inevitable. But this should be seen not simply as a process of compromise and retreat but also as an important dynamic of innovation and learning. This book is from the French-based international research network GERPISA (Groupe d'étude de recherche permanente sur l'industrie et les salaires de l'automobile). See related titles below.

[Japanese Management in the Low Growth Era](#) Daniel Dirks, Jean-François Huchet, Thierry Ribault, 2012-12-06 Japanese firms are in the midst of the most protracted economic crisis in their post-war history. The end of the bubble economy has led to a long era of low growth. This change in the general business environment has profound consequences for the management and the organization of corporate Japan as well as for the theory of the Japanese firm. The contributions to this book cover a broad range of subjects from the strategies and organizational structures to the management of human resources and innovation processes in the 1990s. These changes are systematically commented on by field specialists from abroad, especially Europe, relating the situation in Japan to comparable developments in other countries.

*Supply Chain Strategies* Tony Hines, 2014-01-10 *Supply Chain Strategies* demonstrates how organizations must take strategic decisions in order to manage their supply chains to sustain competitiveness in the global economy. Whereas many textbooks on supply chain management focus on purchasing and operations, this new edition of Tony Hines' text focuses upon the direction setting and efficient resource allocation that organizations need to provide in order to satisfy their customers. Overcoming tensions between political, economic, technological, ethical and environmental considerations is shown to be vital to ensure a sensible strategy for managing the supply chain. This impressive text makes the most of integrated case studies to show how strategic thinking and supply chain management play out in the real world. As such, the book is ideal for courses on supply chain management, especially those which require a strategic element.

**Cross-Border Outsourcing and Boundaries of Japanese Firms** Eiichi Tomiura, 2018-06-26 This book is the first book that provides comprehensive economic analysis of

cross border outsourcing by Japanese manufacturing firms based on microdata Previous literature on many other countries has often been constrained by limited data availability about outsourcing but research contained in this book exploits unique firm level data and directly tests theoretical hypotheses derived from new firm heterogeneity trade models Productivity capital labor ratio and R D intensity are examined at the firm level While rich empirical results in this book convince us how powerful the orthodox economic theory is in understanding Japanese firms detailed firm level findings combined with accessible and concise overviews of Japanese international trade are widely informative for international economists experts of Japanese society business strategists for offshoring and policy makers in both developed and developing economies This book further discusses how boundaries of Japanese firms traditionally sheltered by language and cultural barriers are affected by outsourcing decisions simultaneously crossing national borders and firm boundaries The interpretations of Japanese characteristics in outsourcing have deep implications for understanding drastically changing Japanese business amid globalization

*Collaborative Strategy* Luiz F. Mesquita, Roberto Ragozzino, Jeffrey J. Reuer, 2017 This book provides approachable and insightful chapters that summarize state of the art thinking and research on alliances and networks Contributions by leading scholars cover foundations or fundamentals as well as frontier areas through a diverse range of perspectives

**Crisis Or Recovery in Japan** David Bailey, 2007-01-01 Explores Japan s economic crisis and recovery analysing the role of corporations the state macroeconomic and industrial policy and the changing status of Japan as an economic role model This book covers such topics as the relevance of Western economic models to the Japanese case and the Japanese macro economy and financial system

Exploiting Linkages for Building Technological Capabilities Mai Fujita, 2014-01-10 One of the key ingredients of success in building internationally competitive industries lies in amassing a sizeable pool of competent suppliers of parts components and accessories This monograph examines how in developing countries suppliers of mechanical components at the low end of the technological trajectory build up key capabilities over time The focus is on Vietnam s motorcycle industry which was rapidly transformed from a small highly protected market to the world s fourth largest motorcycle producer This rare success resulted from intense competition between leading Japanese motorcycle manufacturers and local Vietnamese assemblers of imported Chinese components both attempting to gain supremacy in the emerging market In particular the book analyzes how local Vietnamese suppliers of motorcycle components exploited participation in contrasting types of value chains developed by the two groups of leading manufacturing firms referred to here as Japanese and or Vietnamese Chinese chains for accumulating strategic know how On the basis of historical evidence and recent empirical data collected through repeated rounds of in depth fieldwork the analysis finds first those suppliers learning trajectories evolved over time resulting in a divergence in learning performance extending across suppliers in later phases of industrial development In the later stage high performing suppliers amassed basic innovative expertise constituting the bedrock of this fast growing industry Second the analysis finds that the diverging

performance can be explained by the combination of roles played by lead firms in inducing and facilitating supplier learning and those of suppliers in mobilizing their own sources of knowledge. These conclusions not only provide dynamic insightful accounts of supplier learning in developing country contexts but also make key theoretical and methodological contributions to the research on value chain participation and supplier learning.

**Changes in Japanese Employment Practices** Arjan Keizer, 2010-01-21. Keizer examines changing employment practices in Japan focusing on the position of the Japanese firm that is confronted with the need to address the changing economic circumstances while also maintaining some fit with the wider set of institutions that govern the Japanese labour market.

**The Oxford Handbook of Business Groups** Asli M. Colpan, Takashi Hikino, James R. Lincoln, 2010-08-06. Business groups large diversified often family controlled organizations with pyramidal ownership structure such as the Japanese zaibatsu the Korean chaebol and the grupos economicos in Latin America have played a significant role in national economic growth especially in emerging economies. Earlier variants can also be found in the trading companies often set up in Britain which operated in Asia Africa and Latin America. Business groups are often criticized as premodern forms of economic organization and occasionally as symptomatic of corrupt crony capitalism but many have shown remarkable resilience navigating and adjusting to economic and political turbulence international competition and technological change. This Handbook provides a comprehensive analysis of business groups around the world. It examines the adaptive and competitive capabilities of business groups and their evolutionary dynamics. 16 individual country chapters deal with business groups from Asia to Africa the Middle East to Latin America while overarching chapters consider the historical and theoretical context of business groups. With contributions from leading experts The Oxford Handbook of business groups provides a comprehensive empirically and theoretically rich guide for scholars and policy makers.

**Modern Economic Development in Japan and China** X. Huang, 2013-10-29. The contributors provide a comparative analysis of the modern economic development of Japan and China that are often explained in frameworks of East Asian developmentalism varieties of capitalism or world economic system and explore their broader significances for the rise and global expansion of modern economy.

**"Rich Nation, Strong Army"** Richard J. Samuels, 2018-08-06. Since World War II Japan has become not only a model producer of high tech consumer goods but also despite minimal spending on defense a leader in innovative technology with both military and civilian uses. In the United States nearly one in every three scientists and engineers was engaged in defense related research.

and development at the end of the Cold War but the relative strength of the American economy has declined in recent years. What is the relationship between what has happened in the two countries? And where did Japan's technological excellence come from? In an economic history that will arouse controversy on both sides of the Pacific, Richard J. Samuels finds a key to Japan's success in an ideology of technological development that advances national interests. From 1868 until 1945 the Japanese economy was fired by the development of technology to enhance national security, the rallying cry "Rich Nation, Strong Army" accompanied the expanded military spending and aggressive foreign policy that led to the disasters of the War in the Pacific. Postwar economic planners reversed the assumptions that had driven Japan's industrialization. Samuels shows promoting instead the development of commercial technology and infrastructure. By valuing process improvements as much as product innovation, the modern Japanese system has built up the national capacity to innovate while ensuring that technological advances have been diffused broadly through industries such as aerospace that have both civilian and military applications. Struggling with the uncertainties of a post-Cold War economy, the United States has important lessons to learn from the way Japan has subordinated defense production yet emerged as one of the most technologically sophisticated nations in the world. The Japanese, like the Venetians and the Dutch before them, show us that butter is just as likely as guns to make a nation strong, but that nations cannot hope to be strong without an ideology of technological development that nourishes the entire national economy.

*Organisational Learning in the Automotive Sector* Dr Penny West, Penny West, 2002-01-04. This book considers the concepts of organisational learning and the learning organisation and critically examines their take-up within the context of four contemporary work organisations in the European automotive sector. Within this dynamic environment, the pursuit and implementation of approaches that encourage individuals to learn and challenge existing orthodoxy are now dominant on the management agenda. Changes to processes, structures, cultures, and the employment relationship per se.
