Strategic Management Sushil, Sanjay Dhir, 2024-09-25. This book emphasizes the concepts of strategic innovation and entrepreneurship which are quite prevalent in today's organizations. Going beyond traditional approach that follows strategic analysis choice and implementation framework and traditional theories based on industrial organization paradigm and resource based view, the book considers current business environment which is volatile, uncertain, complex, chaotic, conflicting and ambiguous VUCA. It takes the strategic flexibility view to cope with these strategic challenges. The book introduces the subject matter of strategic management in retrospect and prospect, highlighting critical theories of strategic management. It uses a strategic learning framework rather than a purely analytical approach to dynamically learn about the external situation, internal resources and capabilities. The evolution of strategy is given in terms of generic strategies in practice and adaptation in specific contexts. It further deals with essential topics such as strategic alliances and networks, mergers and acquisitions and global strategy. It then provides the execution framework and models covering restructuring, leadership, corporate governance and change management. The strategy in specific areas such as strategic technology management, e-business and knowledge management and functional strategies and policies are discussed to understand the implementation depth. Finally, it touches upon contemporary issues such as sustainable enterprise, stakeholder perspectives and comparative strategies in various contexts. It then outlines future directions of strategic management. In the end, case analysis guidelines are provided with sample cases from different parts of the world. The book also used interpretive and simulation methods such as system dynamics and total interpretive structural modeling to grasp the relationships and their dynamic impact provided throughout the book. It will be an invaluable resource for researchers of business strategy as well as students studying these courses; it will also be useful for industry practitioners, corporates and business policy makers. The Essentials of Knowledge Management John S. Edwards, 2016-04-29. This book reviews the field of Knowledge Management taking a holistic approach that includes both soft and hard aspects. It provides a broad perspective on the field rather than one based on a single viewpoints from Computer Science or Organizational Learning, offering a comprehensive and integrated conception of Knowledge Management. The chapters represent the best Knowledge Management articles.

published in the 21st century in Knowledge Management Research Practice and the European Journal of Information Systems with contributors including Ikujiro Nonaka, Prahalad, and David Schwartz. Most of the chapters contribute significantly to practice as well as theory. The OR Essentials series presents a unique cross section of high quality research work fundamental to understanding contemporary issues and research across a range of Operational Research topics. It brings together some of the best research papers from the highly respected journals of the Operational Research Society, also published by Palgrave Macmillan.

Knowledge Services Guy St. Clair, 2016-11-07 Knowledge services converges information management, knowledge management, KM, and strategic learning into a single enterprise wide discipline for the benefit of the business or organization in which it is practiced. As the acknowledged framework for strategic knowledge management, knowledge services, the responsibility of the knowledge strategist leads to excellence in knowledge sharing and ultimately to shaping the organization as a knowledge culture. Knowledge Services: A Strategic Framework for the 21st Century Organization provides guidance for the knowledge strategist and is designed specifically to serve as a reference for that management employee and for those seeking to become knowledge strategists.

Organizations and Knowledge Management Marco Valeri, 2025-10-03 The premise of this book is that in the contemporary fast evolving competitive landscape, traditional management models are outdated. The author emphasizes instead the importance of continuous knowledge regeneration and human capital in achieving sustainable success. Through insightful chapters on post modernism, in organizational design, complexity, and strategic learning, this book guides organizations in recognizing the value of human knowledge and the dynamic nature of routines. It challenges outdated management models, urging leaders to reinvent their organizations with intelligence and adaptability. Essential reading for business leaders, managers, and academics, this book offers a comprehensive framework for fostering innovative, knowledge driven organizations.

Powerful Environments for Promoting Deep Conceptual and Strategic Learning Lieven Verschaffel, 2005 Over the past years, a substantial amount of research has been undertaken relating to the development of powerful learning environments for the acquisition in students of worthwhile educational objectives focussing on conceptual understanding, higher order cognitive and metacognitive skills, and self regulated learning. This research has been mainly undertaken from three distinct but related perspectives in the study of learning and instruction: namely instructional psychology, instructional technology, and instructional design. Against this background, a research community involving 14 European research teams has recently been initiated with the aim of interactively contributing to the advancement of theory and methodology relating to the design, implementation, and evaluation of powerful learning environments. This volume, based on the plenary lectures and working sessions during the community's third workshop, constitutes a collective output of this research community focussing on the identification and analysis of major components and dimensions of powerful learning environments aimed at the promotion of deep conceptual and strategic learning in major domains of school curricula like mathematics, physics, history, and social sciences. In Part I of

the volume three chapters present general perspectives on the central theme of the third workshop In Part II six studies are reported wherein novel learning environments for elementary and secondary mathematics education have been designed implemented and evaluated In Part III of the volume another set of five investigations is presented relating to the design implementation and evaluation of powerful learning environments in other subject matter domains physics history social sciences and in teacher training
